Automotive Technology–Diploma (Resident)	122
Diesel Technology–Diploma (Resident)	124
Associate of Occupational Science Diesel Technology-(Resident)	124
Associate of Occupational Science Diesel Technology-(Hybrid)	128
Electrical Technology-Diploma (Resident)	121
HVAC/R–Diploma (Resident)	132
Welding Basics – Diploma	139
Advanced Welding – Diploma	140
Welding–Diploma (Resident)	141

ABOUT US

Welcome to Community Care College, Clary Sage College, and Oklahoma Technical College! We are thrilled you have made the decision to join our college family! One thing that makes our colleges great is our CARES culture. CARES stands for Courtesy, Accountability, Respect, Excellence, and Success. You will find a poster with this message in every one of our classrooms and this is what we expect from every student and employee at our colleges. This culture enables us to foster a positive learning environment and ensure your success in your chosen field. All employees at our colleges have an open door policy and we want to hear from you! Please let us know if there is ever anything we can do to make your experience as a student better. We want to hear your success stories too! We are all your biggest cheerleaders and we can't wait to see you walk across the stage at Graduation!

Sincerely,

Dr. Raye Mahlberg
President

MISSION

As a private, nonprofit college, the mission of the institution is to transform lives and contribute to society by providing career-focused higher education opportunities that empower students to obtain successful employment, develop leadership skills, and serve their communities.

PURPOSE AND OBJECTIVES

The College believes that our value in the community is measured by the students' success. We continue through our mission to accomplish this by providing educational opportunities for our students through our commitment to the needs of the industry; therefore, we are dedicated to the accomplishments of the following objectives:

- To provide specialized educational services to impart graduates with competitive technical skills
- To provide in-depth education in technical programs for the direct entry of the graduate into the job market
- To assist employers by providing entry-level employees who are educated in the skills that meet the needs of the industry
- To assist the graduate on a local and national level in securing gainful employment in their chosen industry in addition to future positions according to the graduate's abilities, interests and skills

HISTORY AND STATEMENT OF LEGAL CONTROL

The College is an Oklahoman 501(c) (3) nonprofit corporation operating under the control of Community HigherEd Institute. The college was established by Teresa Knox in 1995, originally as a for-profit institution, and then converted to nonprofit status in 2015 in order to further enhance the mission of the college, to expand educational opportunities to those who need it the most, and to increase commitment to the community. Dr. Raye Mahlberg is the College President and reports to the executive board of the nonprofit. All inquiries can be made to Dr. Raye Mahlberg at rmahlberg@communitycarecollege.edu.

PUBLIC CHARITY MISSION STATEMENT

The mission of Community HigherEd, is to advance the purpose of Community Care College, Clary Sage College, and Oklahoma Technical College through active engagement, advocacy, fundraising, and stewardship.

PHYSICAL FACILITY DESCRIPTION

Community Care College (CCC) is located on the northwest corner of 43rd Street and South Sheridan Road in Tulsa, Oklahoma. The modern three-story structure is constructed of reinforced steel with a glass and aluminum façade with an interior area of approximately 66,000 square feet.

Clary Sage College (CSC) is located on six acres off the Broken Arrow Expressway at Sheridan in Tulsa, Oklahoma. Equipped with a walking path and courtyard, the outdoor space is conducive to student fellowship. One of the largest schools of its kind in the United States, the multi-million-dollar educational space is comprised of two floors.

The three buildings comprising the **Oklahoma Technical College (OTC)** campus are situated on a nine-acre tract located at 4444 South Sheridan Road, Tulsa.

Student-to-instructor ratios have a maximum of 25 students per instructor in a lab environment. Student-to-instructor ratios average approximately 30 students per instructor in lecture and online courses.

HOURS OF OPERATION

The Colleges' administrative offices are open from 7:30 a.m. to 10:30 p.m. Monday through Thursday and 7:30 a.m. to 5:00 p.m. on Friday. Numerous courses are available between the hours of 7:30 a.m. to 10:30 p.m. Course schedules are as follows:

Community Care College Diploma Programs: 8:00 a.m. to 1:00 p.m. Monday-Thursday or 9:00 a.m. to 12:00p.m. Monday-Friday or 1:00 p.m. to 6:00 p.m. Monday-Thursday or 5:30 p.m. to 10:30 p.m. Monday-Thursday or 9:00 a.m. to 12:45 p.m. Monday-Thursday

Community Care College Hybrid Programs: 8:00a.m to 1:00 p.m. Monday, Tuesday, Wednesday, Thursday, or Friday or 5:30 p.m. to 10:30 p.m. Monday, Tuesday, Wednesday, or Thursday

Community Care College - Associate Degrees Courses: 7:30 a.m. to 10:30 a.m. Monday-Friday or 11:00 a.m. to 2:00 p.m. Monday-Friday or 2:30 p.m. to 5:30 p.m. Monday-Friday or 6:00 p.m. to 9:00 p.m. Monday-Friday or 8:00 a.m. to 5:00 p.m. Monday-Friday or 7:30 a.m. to 11:15 a.m. Monday-Thursday or 11:00 a.m. to 2:45 p.m. Monday-Thursday or 6:00 p.m. to 9:45 p.m. Monday-Thursday or 7:30 a.m. to 10:20 a.m. Monday-Thursday or 11:00 a.m. to 1:50 p.m. Monday-Thursday or 6:00 p.m. to 8:50 p.m. Monday-Thursday or 9:00 a.m. to 11:50 a.m. Monday-Thursday

Clary Sage College Diploma Programs: Monday-Friday 9:00 a.m. to 3:00 p.m. or Monday-Friday 8:00 a.m. to 2:00 p.m. or Monday-Thursday 8:00 a.m. to 1:00 p.m. or Monday-Thursday 9:00 a.m. to 2:00 p.m. or Monday-Thursday 12:30 p.m. to 5:30 p.m. or Monday-Thursday 5:30 p.m. to 10:30 p.m. or Monday-Thursday 3:00 p.m. to 8:00 p.m. or Monday-Thursday 9:00 a.m. to 3:00 p.m. and Saturday 9:00 a.m. to 3:00 p.m. or Monday-Tuesday 9:00 a.m. to 3:00 p.m. and Wednesday 9:00 a.m. to 12:00 p.m.

Oklahoma Technical College Diploma Programs: 7:00 a.m. to 12:00 p.m. Monday-Friday or 8:00 a.m. to 2:00 p.m. Monday-Friday or 12:30 p.m. to 5:30 p.m. Monday-Friday or 8:00 a.m. to 1:00 p.m. Monday-Thursday or 5:30 p.m. to 10:30 p.m. Monday-Thursday or 5:30 p.m. to 9:30 p.m. and 9:00 a.m. to 1:00 p.m. Monday-Thursday and Saturday or 4:30 p.m. to 10:30 p.m. & 9:00 a.m. to 2:00 p.m. or 10:00 a.m. to 3:00 p.m. Monday-Thursday and Saturday

Online Courses at Community Care College and Clary Sage College: These courses are asynchronous and taught completely online around the students' personal schedule; however, some lectures and content is scheduled depending on the discretion of the instructor. Learners access primary content and instruction using a variety of tools from the Learning Management System.

APPROVALS & LICENSES

Community Care College, Clary Sage College, and Oklahoma Technical College are *licensed* by the Oklahoma Board of Private Vocational Colleges and are *authorized* by Oklahoma State Regents for Higher Education to offer Associate of Occupational Science Degrees.

Community Care College, Clary Sage College and Oklahoma Technical College have *approvals* by, Vocational Rehabilitation, Bureau of Indian Affairs, Workforce Oklahoma, and the United States Department of Education. Community Care College, Clary Sage College and Oklahoma Technical College are also approved for Veteran's Education.

Community Care College has partnered with the CDA Council to help support the professional development of our early care and education professionals toward achieving The Child Development Associate (CDA) Credential™. Our ECE courses will count toward the 120 professional education hours required to apply for the CDA.

Clary Sage College is *licensed* by the Oklahoma State Board of Cosmetology and Barbering located at 2401 NW 23rd, Suite 84 Oklahoma City, Oklahoma 73107, (405) 521-2441. Programs licensed: Barber, Cosmetology, Esthetician, Nail Technician, Makeup Artist/Cosmetician, and Master Instructor. Clary Sage College is recognized as a National Certification Board for Therapeutic Massage & Bodywork (NCBTMB) Assigned School.

ACCREDITATION

The College is accredited by the Accrediting Commission of Career Schools and Colleges (ACCSC). ACCSC is located at 2101 Wilson Boulevard, Suite 302, Arlington, Virginia 22201, (703) 247-4212. The accreditation is granted through February 2023.

At Community Care College, the Medical Assistant program is programmatically accredited by the Accrediting Bureau of Health Education Schools (ABHES). ABHES is located at 7777 Leesburg Pike, Suite 314N in Falls Church, Virginia 22043, (703) 917-9503. The accreditation is granted through December 31, 2022.

At Community Care College, the Surgical Technologist program is programmatically accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP.) CAAHEP is located at 1361 Park Street in Clearwater, FL 33756, (727) 210-2350.

At Oklahoma Technical College, the Automotive Technology program is programmatically accredited by the National Automotive Technician Education Foundation (NATEF). NATEF is located at 101 Blue Seal Drive, S.E. Suite 101 Leesburg, Virginia 20175, (703) 669-6650. The accreditation is granted through May 31, 2020.

ACADEMIC POLICIES

CURRICULUM

In order to maintain the high quality of our programs and avail ourselves of modern technological changes, the College reserves the right to change the curriculum content, program hours, and tuition and fees with the approval of the Oklahoma Board of Private Vocational Schools.

CREDIT DEFINITION

Community Care College, Oklahoma Technical College, and the Massage Therapy program at **Clary Sage College** residential programs are on a continuous term and the semester formula for determining credit is recognized. One Credit Hour is equal to 15 hours of lecture or 30 hours of laboratory or 45 hours of internship/externship.

Clary Sage College programs, except for Massage Therapy, are on a continuous term and the semester formula for determining credit is recognized. One Semester Credit Hour is equal to 30 clock hours of theory and lab.

Distance Education programs are on a continuous term and the semester formula for determining credit is recognized. One Credit Hour is equal to 15 hours of lecture or 30 hours of laboratory or 45 hours of internship/externship.

TRANSFER OF CREDIT TO OTHER COLLEGES

Because acceptance of prior credit is at the discretion of each receiving institution, the College does not imply, promise, or guarantee transferability of credits earned at the College. Programs offered at the College are essentially terminal in nature and designed for entry level employment upon graduation.

PREVIOUS EDUCATION

The College may grant academic and financial credit for the same or essentially the same course taken at an institution accredited by an agency recognized by the United States Department of Education or the Council for Higher Education Accreditation. The College may require the student seeking credit to undergo an assessment to verify the student possesses the knowledge and skill provided by the course for which credit is sought. The student seeking transfer credit must provide an official transcript. The College must receive the official transcript mailed directly from the granting institution or the granting institutions transcript provider. Student copies of a transcript will not be accepted.

The College honors some military transfer credits. This includes military classes, including basic training, as well as other formal training. If the troops or sailor's training directly matches one of the College programs, additional credits can be accepted. These will be reviewed on an individual basis. The College must receive certified true copies of a student's Military Qualification Record to review for awarding of transfer credit. The documents that are acceptable for evaluation of military service, basic training, military education and military occupation include: Army - Form 2-1, and AARTS transcript; Navy - Page 4's, SMART transcript; Air Force - official transcript from CCAF; Coast Guard - Page 3 or official CG transcript from CG Institute; Marine Corps - NAVMC 118 8a, SMART transcript. The College accepts the DD Form 214 (Discharge) only for evaluation of military service and basic training.

The College also honors some high school transfer credits earned at accredited vocational programs and will be evaluated on a case by case basis.

Transfer credit will only be granted for courses completed with a grade of "C" or better. Transfer credits are limited to a maximum of 75% of the total credits required for completion of the program. Exception to the 75% and "C" grade rule can be made for both residential and online students for those students who have graduated from the College. For example; if a student graduates from a Diploma program and returns at a later time and enrolls in the complementary AOS Degree. Those that fall in that category can earn an Associate of Occupational Science degree by taking the General Education segment of the program. However, 25% or more of required program credits must be completed at the College. Transfer credits do not affect grade point average. However, transfer credits do affect the maximum time frame policy found within the SAP policy.

PRIOR LEARNING ASSESSMENT (PLA)

Students may receive college credits for learning earned through non-traditional settings. The PLA, or prior learning assessment, must be related to the student's academic program. PLA includes job training or experience, volunteer work, online and independent study courses, workshops, professional licenses, military, credentials, apprenticeships, and certifications. Students must complete an application packet which is evaluated by the appropriate college personnel. There is a fee associated with the application process.

GRADING SYSTEM

The College has a letter grading system to evidence the learning, knowledge, and skills of students. An evaluation of student achievement is made on a regular basis after each course is completed.

Grade	Equivalent	Achievement	Points
A	90-100	Excellent	4.0
B	80-89	Good	3.0
C	70-79	Average	2.0
D	60-69	Poor	1.0
F	0-59	Fail	0.0
W	****	Withdraw-CA*	****
I	****	Incomplete	****
RS	****	Reschedule	****
TC	****	Transfer Credit	****
CR	****	Credit Earned	****
AU	****	Audit	****
L	****	Leave of Absence	****
TW	****	Term Withdraw	****
EC	****	Experiential Credit**	****

The Surgical Technologist program requires a 70% or greater in order to successfully complete each course (the only exception to the 70% or greater rule is AH100 Career and Life Development). Refer to the Surgical Technologist Handbook for additional guidance.

*CA is defined as "Credit Attempted"

**Includes "Prior Learning Assessment (PLA)"

STUDENT ADVISEMENT

Personal, academic, and/or financial problems may interfere with the students' ability to learn; therefore, each Department Head of the College is available to assist, advise or refer out when a need exists.

TUTORING

All residential and on-line students experiencing difficulty with the material presented in their programs should contact their instructors to arrange for tutoring outside regular class hours. Tutoring is available for all programs at no charge.

MAKE-UP WORK

Make-up work is available to students when absent. Arrangements are made between the student and faculty member. Make-up work may be allowed under specified circumstances per the Directed Study agreement. The absence will be recorded and may affect overall grade.

GRADUATION REQUIREMENTS

Students must successfully complete each individual course within the program. In addition, students must complete all areas of the program with a program grade point average of 2.0 or better and satisfactorily complete the externship/internship portion to be deemed a graduate. A Diploma or an Associate of Occupational Science Degree is awarded to those meeting all graduation requirements. Formal graduation ceremonies are held each year and will include graduates from the main campus; Community Care College and graduates from the two branch campuses; Clary Sage College and Oklahoma Technical College. In order to participate in the graduation ceremony, must either have successfully completed all program requirements or be on schedule to meet all program requirements by the cut-off date. Cut-off dates are set by the Registrar's office and typically fall 6 weeks following to the graduation ceremony date. If a graduate should complete all course requirements after the cut-off date, the graduate will not be eligible to participate in the ceremony and instead will be invited to attend the subsequent ceremony scheduled.

COURSE NUMBERING SYSTEM

Core (Diploma-level) Courses: The alpha prefix of a course number designates to which program or discipline each course belongs. The numeric digits indicate the course number within a program or discipline.

ADMISSIONS

ELIGIBILITY REQUIREMENTS

This Admissions Policy is used to define the enrollment requirements for individuals who wish to enroll at the College as a regular student. The College must adhere to the U.S. Department of Education, Accrediting Commission of Career Schools and Colleges, Accrediting Bureau of Health Education Schools, Oklahoma Board of Private Vocational Schools, and Oklahoma State Board of Cosmetology and Barbering. Finally, it is the philosophy of the College that an individual shall not be denied admission to any program because of race, color, national origin, handicap, religion, gender identity, or sex.

GENERAL ADMISSIONS REQUIREMENTS

In order to be accepted to the College, applicants are required to provide the following:

- High school transcript that lists the date of graduation, or high school diploma that lists the date of graduation, or *recognized equivalents of a high school diploma
- Personal interview with Admissions Representative
- Getting to Know You Form
- Recommendation by Admissions Representative

***Recognized equivalents of a high school diploma as listed in the Department of Education's *Federal Student Aid (FSA) Handbook*:**

- A GED certificate (containing the state seal and/or signature of the state official);
- A certificate or other official completion documentation demonstrating that the student has passed a state-authorized examination (such as the Test Assessing Secondary Completion (TASC) the High School Equivalency Test (HiSET), or, in California, the California High School Proficiency Exam) that the state recognizes as the equivalent of a high school diploma (certificates of attendance and/or completion are not included in this qualifying category);
- An associate's degree;
- Successful completion of at least 60 semester or trimester credit hours or 72 quarter credit hours that does not result in the awarding of an associate's degree, but that is acceptable for full credit toward a bachelor's degree at any institution; or
- Enrollment in a bachelor's degree program where at least 60 semester or trimester credit hours or 72 quarter credit hours have been successfully completed, including credit hours transferred into the bachelor's degree program.

In addition to the above requirements, the following apply to Surgical Technologist applicants:

- Three Letters of Reference
- Pass O'Connor Dexterity Test at 390 seconds or less for women and 405 seconds or less for men
- Must pass a urinary drug screening prior to acceptance into the program
- Personal interview with Surgical Technologist Faculty Member

If drug screening is passed and prospective student does not start on original start date, the passed drug screening can be used on the next available start date. If start date needs to be pushed out past the next available start date, the prospective student will need to obtain another drug screening at their expense.

If drug screening is not passed, the prospective student will have an opportunity to retest for a future start date. If prospective student does not pass on second attempt, admission to the Surgical Technologist program will be denied for one year at which time the prospective student can start the process again.

Drug screening will be performed on the same day as the O'Connor Dexterity Test. Prospective students who refuse to have a drug screening will not be considered for admission to the Surgical Technologist program. Prospective students taking substances other than prescription drugs such as over the counter substances are advised to determine whether these substances may result in a positive drug screening prior to having the drug screen.

Inconclusive test results that require retesting will be done at the expense of the prospective student. Inconclusive findings may include test results that are negative for stated drugs but reflect dilution of urine. Prospective students with inconclusive drug test results who refuse to be retested will be denied admission to the Surgical Technologist program.

Community Care College students are required to follow site-specific policies related to vaccines, drug and alcohol testing, and prescription drug use including medical marijuana. Students who have concerns about use of medical marijuana or vaccine requirements should schedule an appointment with the Surgical Technologist Department Head and/or the Campus Director.

Concurrent enrollment is available for current high school Juniors and Seniors. To be accepted, applicants are required to provide the following:

- Official High School transcript with an unweighted GPA of 3.0 or higher on a 4.0 scale
- Completed concurrent enrollment application signed by a parent and the High School Principal or Counselor (must be returned in an envelope with the school seal)
- Personal interview with Admissions Representative and Department Head
- Getting to Know You Form
- Recommendation by Admissions Representative

Applicants who received a homeschool education must provide a transcript, signed by the parent or guardian of the homeschooled student that lists the secondary school courses the student completed and documents the successful completion of a secondary school education in a homeschool setting. A copy of the secondary school completion credential for homeschool (other than a high school diploma or its recognized equivalent) if state law requires homeschooled students to obtain that credential

Unaccredited High School Graduates

Applicants that are a graduate of a private, parochial, or other non-public high school, which is not accredited by a recognized accrediting agency or recognized by the department of education in the state in which the high school is located and is not a diploma mill, must provide:

- A copy of the high school diploma or transcript, and
- ACT, SAT, or ACCUPLACER test scores. Acceptable scores for entry are as follows:

Test	Minimum Score Required
ACT Test	15
SAT Test	810
ACCUPLACER Test	720

If applicant fails to meet minimum score on the ACCUPLACER Test on the first attempt, applicant may retest after waiting 72 hours. If applicant fails to meet minimum score on the second attempt, applicant may retest after waiting one week. If applicant fails to meet minimum score on the third attempt, applicant must wait one year to retest.

Homeschooling

The student can be eligible to receive Title IV, HEA funds if their secondary school education was in a homeschool that state law treats as a home or private school. Some states issue a secondary school completion credential to homeschoolers. If this is the case in the state where the student was homeschooled, the student must obtain this credential to be eligible for FSA funds.

Foreign High School diploma or transcript

Note: The high school diploma or transcript requirement can also be from a foreign school if it is equivalent to a U.S. high school diploma; the original secondary education document must be translated into English and certified as the equivalent of high school completion in the United States by a College-accepted service. Original transcript, and translation if applicable, is also required.

English Language Proficiency

All applicants must be proficient in English (reading, writing, and speaking). This requirement is met by one of the following:

- U.S. citizen (including those naturalized), or
- transcript indicating "C" or higher in a college-level writing/composition course from a nationally or regionally accredited U.S. college, or
- graduating from a high school where the primary language of instruction is English

Those for whom English is a second language must provide proof of English proficiency by meeting the following standards of TOEFL (Test of English as a Foreign Language) examples as follows:

- 450 or above on the paper-based test, or
- 173 or above on the computer-based test, or
- 61 or above on the internet-based test, or
- 6 or above for the IELTS (International English Language Testing System)

Non-High School graduates or its equivalent (Clary Sage College ONLY)

All applicants must be at least 21 years of age (beyond the age of compulsory) will be required to pass the Ability-To-Benefit tests. Ability-To-Benefit (ATB) students are required to pass one of the Ability-To-Benefit tests available approved by the U.S. Department of Education. Students subject to these criteria are referred to as students admitted under the Ability-To-Benefit guidelines. ATB student services are rendered and documented in the same way as regular students.

Our college uses the Wonderlic Basic Skills Test (WBST), Verbal Form VS1 & VS2 and Quantitative Form QS1 & QS2. This test is approved by The U.S. Department of Education with a passing score of (200) for Verbal Form VS1 or VS2, (210) for Quantitative Form QS1 or QS2. This test will be administered by an Independent Test Administrator and not by any school representatives. The college's admissions representative will provide applicants with additional information as how to arrange for the Ability-to-Benefit test. All Ability-to-Benefit students must take and pass the test prior to admission.

Ability-to-Benefit (ATB) students can no longer become eligible for federal financial aid. However, students who were enrolled in an eligible program at any Title IV institution prior July 1, 2012 may continue to establish Title IV eligibility under the ATB test (*Federal Student Aid Handbook 2018-2019, Volume 1 Student Eligibility, Chapter 1, Page 8*).

Diploma Mill Definition

Any entity that:

1. Charges someone a fee and requires him to complete little or no education or coursework to obtain a degree, diploma, or certificate that may be used to represent to the general public that the student has completed a program of secondary or postsecondary education or training; and
2. Lacks accreditation by an agency or association that is recognized as an accrediting body for institutions of higher education by the Secretary (pursuant to Part H, Subpart 2 of Title IV) or a federal agency, state government.
3. The Registrar will keep a list of known diploma mill High Schools. Students with diplomas from a diploma mill cannot enroll under the guidelines of Unaccredited High School Graduates.

Financial Arrangements

The student must make financial arrangements with the Financial Aid Office in regards to FAFSA application, Scholarships and/or Cash payment plan prior to enrolling.

Transfer Students

Enrollment is available for students wishing to transfer to the College after they have withdrawn from other schools both in and out of state. The College does not recruit students already attending or admitted to another school offering similar programs of study. The student must submit transcripts prior to signing the enrollment agreement. Credit for previous training and education in accredited programs may be granted. The acceptance of transfer hours is at the discretion of the College and there is a possibility that no such credit will be granted.

Note: *All hours attempted will count toward the Title IV, HEA funding 150% quantitative requirements not just the hours that were accepted as transfer hours.*

The student must meet all regular entrance and registration requirements. A transferring student may be required to enroll for a minimum number of hours or credits. Before a transferring or returning student can be enrolled, they will be evaluated according to the Satisfactory Academic Progress policy (see policy listed in the school catalog). Students accepted for admission may be required to purchase the school's current kit, textbooks, uniforms, and other supplies. Students applying for re-entry or transfer-in from other schools may be required, as a condition of enrollment, to bring delinquent prior student loans to a current status.

ONLINE ENROLLMENT

With the exception of the three policy types listed below, all of the College's policies and procedures listed in the catalog apply to Online Students.

Admissions Requirements

Students taking advantage of distance learning opportunities are goal oriented. They know how to manage time to meet course objectives and schedules.

Technical Requirements

The College's distance learning program uses a Learning Management System to deliver online and web-enhanced courses. To participate in the program, basic technology requirements include computer and high speed Internet access, Adobe Flash Player, Adobe Acrobat Reader, and audio capabilities. Students planning to register for online courses must have entry-level computer skills and a valid e-mail account prior to enrollment.

Attendance and Participation Requirements

A student is considered to be attending an online course if he/she logs into the course at least twice during the week and participates in homework assignments and weekly discussion forums. Failure to abide by the guidelines set forth in this policy may result in the student receiving an SIP.

A student is in attendance if he/she logs into the class during the week and participates in homework assignments or weekly discussion forums. The discussion forum is essential for the learning process and is the area of instructor and student interaction. The discussion forums are where students, in collaboration with the instructor and classmates, will explore the course material to fully develop skill in the course objectives. To receive participation points, students must submit each week's assignment by the assigned date and participate in the discussion forums a minimum of two days. The participation grades are based on the number of days the student takes part in the discussion and the content of his or her contributions. The degree of added value a student contributes to the discussion determines the earned participation points.

Also, please note the following:

- Faculty is available to assist students with questions. The student may email instructor for a one-on-one on campus or meet during posted office hours during the week.
- Student engagement is a critical key to success in the online environment; therefore, attendance is mandatory.
- Tutoring services are available at no charge to assist in the courses.

At Clary Sage College - Hybrid Learning Oklahoma State Board of Cosmetology and Barbering Programs

In the event of an emergency, inclement weather, or pre-approved scheduled time away, students may be eligible to earn credit through hybrid learning assignments located in learning management system for each course. The total amount of hybrid hours earned cannot total more than 10% of the student's theory hours. Degree credit hours through hybrid learning are exempt.

COLLEGE POLICIES

NON-DISCRIMINATION POLICY

The college admits students of any race, color, national and ethnic origin to all the rights, privileges, programs and activities generally accorded or made available to students at the school. It does not discriminate on the basis of race, color, sexual orientation, gender identity, gender expression, national and ethnic origin in administration of its educational policies, admissions policies, scholarship and loan programs and athletic and other school-administered programs.

In accordance with the requirements of Title IX of the Education Amendments of 1972 and their regulations, the College does not discriminate on the basis of sex in the educational programs and activities which it operates, including employment and admissions. The College Accreditation and Compliance Director is the School's Title IX coordinator to coordinate Title IX compliance.

CANCELLATION OF PROGRAM

The College reserves the right to cancel a program prior to the start date when enrollment is insufficient or when a qualified instructor is unavailable. The College will not cancel or postpone a program once it has started.

DISABILITIES

The College is equipped with ramp access from the parking lot, extra wide hallways and doors, A.D.A. required door handles, and restrooms to accommodate students in wheelchairs. It is the responsibility of the student to inform the College of any disabilities, physical and/or mental, which might in any way affect the student's academic progress. Students with disabilities may contact the Admissions Department by way of telephone, writing, email, social media, facsimile or in person for further assistance. The College will make reasonable accommodation to meet the needs of any student with a disability. Students are encouraged to notify the Admissions Department as early as possible to allow for time to make appropriate accommodations.

DRESS CODE

All students are expected to dress for their profession. See the Admissions Department for program specific dress code requirements.

TOBACCO POLICY

The College campuses are a tobacco-free facility. The College recognizes the need to create and maintain an environmental quality which sustains and enhances the general health and well-being of its faculty, staff, students, and visitors. All tobacco products, including smokeless tobacco and any non-tobacco products designed to emulate tobacco products, are strictly prohibited on campus property. This includes the parking lot, vehicles parked on College property, and all surrounding areas. The College operates according to a strict "three strikes" policy. First Strike: Verbal warning, Second Strike: Written Warning, Third Strike: Expulsion.

DRUG-FREE

The College enforces a policy to maintain a drug-free workplace and educational environment for all employees and students. All employees and students are informed that the unlawful manufacture, distribution, dispensing, possession, transportation, or use of any controlled substance is prohibited on the premises, within 500 feet surrounding the facility, and/or during any college-related activities. The College reserves the right to participate in random, reasonable belief, and post-accident drug testing for both students and employees.

All employees and students are expected to comply with the above policy in order to maintain a drug and alcohol-free environment. Anyone not in compliance with the above policy will be subject to local, state, and federal laws for unlawful possession, use, or distribution of illicit drugs and alcohol and will be subject to drug testing and possible dismissal from enrollment or employment. Please refer to the College's Campus Crime and Security manual for more details.

RECORDS

Student records are secured in a designated area. They may be inspected for approved purposes upon receipt of proper written notification to the Office of Registrar. Official transcripts may be requested through the Office of Registrar via our college websites under the resource tab. No official transcripts or diploma will be released to anyone with a balance owed to the College. We do not issue unofficial transcripts.

FAMILY EDUCATIONAL RIGHTS AND PRIVACY ACT (FERPA)

The Registrar's Office maintains a file on each enrolled student. Student files contain correspondence and communication that takes place between the student, the institution, and the public. Information within the file is maintained according to the Family Educational Rights and Privacy Act

(FERPA) of 1974, as amended. This act, with which this institution intends to comply fully, was designed to protect the privacy of education records, to establish records, and to provide guidelines for the correction of inaccurate or misleading data through informal and formal hearings.

Directory information includes:

- Student's name
- Address
- Telephone Listing
- Email Address
- Photograph
- Date and place of birth
- Major Field of Study
- Grade level
- Enrollment status (e.g. undergraduate or graduate, full or part-time)
- Dates of attendance
- Participation in officially recognized activities and sports
- Degrees, honors and awards granted or received, and dates granted or received
- Most recent educational agency or institution attended

Students also have the right to file complaints with FERPA concerning alleged failures by the institution to comply with the act.

Currently enrolled students may withhold disclosure of any information under FERPA. To withhold disclosure, written notification must be received in the Registrar's Office after enrolling and within one month of starting class. The College assumes that failure on the part of any student specifically to request the withholding of categories of information indicates individual approval for disclosure.

Federal law permits educational institutions to disclose academic and financial information to the parents of financially dependent children.

- Parents may obtain information (grades, GPA, etc.) only at the discretion of the institution and after it has been determined that their child is legally their dependent. Dependent status can be established via submission of a certified copy of the parents' most recent Federal Income Tax Form unless there is a court order, state statute, or other legally binding document prohibiting such.
- Parents of independent students may obtain information only if the Student signs a Family Education Rights and Privacy Act (FERPA) Release Form. This consent is valid for a one time use only and the College must obtain a second signed consent form before any additional information may be released.

CLOSING

The College will authorize campus closings or delayed opening when hazardous weather conditions are predicted or occur that present a serious threat to the campus' safe and efficient operation and the wellbeing and safety of its students and employees. The College will be closed and neither employees nor students will have access to enter facilities. Various departments will be available via email, the College's Learning Management System (LMS), and phone to accommodate students. Students are expected to stay in contact with their instructor to ensure educational goals will be met and assignment and class schedule maintained.

WITHDRAWAL POLICY

Official Withdraw: Any student wishing to withdraw from a program may initiate the process by way of telephone, writing, email, facsimile or in person in which he/she informs the College of his/her intentions. The withdraw policy also applies when a student is terminated by the College for a documented reason. The Office of the Registrar is the specific department that processes and completes a withdraw form. If the student is unable to personally make the notification, a notification can be provided on behalf of the student.

Termination Date: The termination date for refund computation purposes is the last date of actual attendance by the student. Items of extra expense are not returnable or refundable.

Unofficial Withdrawal: If a student fails to attend classes for a period of 14 calendar days they are flagged as a possible withdrawal. If the student fails to attend for a subsequent 14 calendar days without being on an official LOA, the College will unofficially withdraw the student. However, the Date of Determination (DOD) used for the R2T4 calculation will in no case be more than 14 calendar days from the student's Last Date of Attendance (LDA). He or she will be automatically terminated from the program on the following business day.

All electronic devices received by a student are non-refundable.

A student withdrawing from the College will receive a tuition adjustment in accordance with the refund policy stated on her/his Enrollment Agreement. If monies are owed to the College, they will become due upon receipt of statement.

FINANCIAL AID

ENROLLMENT STANDARDS

The minimum enrollment standards are as follows:

Full Time: 12 semester credits per semester

$\frac{3}{4}$ Time: 9 semester credits per semester

$\frac{1}{2}$ Time: 6 semester credits per semester

Less than $\frac{1}{2}$ Time: less than half of the workload of the minimum full-time requirement.

Courses in programs are offered and scheduled in terms. Students may lose student loan funds for the term if their enrollment status is reduced to Less than $\frac{1}{2}$ Time status.

Pell grant awards will be recalculated and the appropriate amount of aid will be returned for students whose enrollment status changed due to a reduction in their academic course load. For those eligible, an additional grant aid will be awarded to students whose enrollment status changed due to an increase in their course load within the term. Additional grant aid may be awarded by the end of the semester and upon documented attendance for all courses in the term.

ACCELERATION OF PROGRAM

Residential students will not be allowed to enroll in simultaneous courses without signed authorization from a school official. Financial aid packaging is based on a normal (non-accelerated) class schedule and acceleration often substantially can reduce the amount of financial aid funding a student will receive. Any reduction in that funding will create a balance due from the student that must be covered by excess funds or paid by the student before the acceleration is permitted.

CANCELLATION/REFUND POLICY

Three-day cancellation: All monies paid by an applicant will be refunded within three days of signing an enrollment agreement and making an initial payment. Student subsequently requesting cancellation shall be entitled to a refund of all monies paid minus a registration fee of 10% of the total contract price, not to exceed \$100.

In accordance with school policy, any student who begins classes and then withdraws, or is terminated by the College, will be refunded tuition and fees as follows:

- During the first 14 calendar days, tuition retained by the College will be 10% of the total contract price of the program plus \$150, but in no event will more than \$350 be retained.
- After 14 calendar days, but within the first 25% of the program, the tuition retained by the College shall be 25% of the total contract price plus \$150.
- After a student completes over 25%, but within 50% of the program, the tuition retained by the College shall be 50% of the total contract price, plus \$150.
- A student completing more than 50% of the program is not entitled to any tuition refund.

Any refund due shall be paid within 60 days after cancellation or termination, unless the refund is payable directly to the applicant or student, in which case it shall be paid within 30 days after cancellation or termination.

Special Cases: In case a student has a prolonged illness, accident, death in the family, or other circumstances that make it impractical to complete the course, the school shall make a settlement that is reasonable and fair to both.

Discontinued Class: In case a class is discontinued by the school, all tuition monies paid to the school will be refunded. The school will have 30 days to restart the class or pay the refund.

Rejection: An applicant rejected by the school shall be entitled to a refund of all monies paid.

Official Withdraw: Any student wishing to withdraw from a program may initiate the process by way of telephone, writing, email, facsimile or in person in which he/she informs the College of his/her intentions. The withdraw policy also applies when a student is terminated by the College for a documented reason. The Office of the Registrar is the specific department that processes and completes a withdraw form. If the student is unable to personally make the notification, a notification can be provided on behalf of the student.

Termination Date: The termination date for refund computation purposes is the last date of actual attendance by the student.

Items of extra expense are not returnable or refundable.

FINANCIAL AID

The College is an eligible institution for various funding sources including Federal Student Aid such as Direct Loans (PLUS, Unsubsidized, Subsidized), Federal Pell Grants. Financial Aid is available to those who qualify. Additional funding for students may come from Institutional Scholarships, Workforce Oklahoma, Vocational Rehabilitation, and Bureau of Indian Affairs. Furthermore; the College is approved for Veteran's Education. For those using Direct Loan Borrower Services and have questions or need assistance with monthly payment; contact Direct Loans at [1-888-877-7658](tel:1-888-877-7658) or visit the website at www.direct.ed.gov to get more information on deferment, forbearance, consolidation, payment plans, interest rates, and loan calculators.

How Eligibility is determined for TITLE IV, HEA

To be Eligible to receive Federal Student Aid, you will need to:

1. Qualify to obtain a college or career school education, either by having a high school diploma or General Educational Development (GED) certificate, or by completing a high school education in a homeschool setting approved under state law.
2. Be enrolled or accepted for enrollment as a *regular student* in an eligible degree or certificate program.
3. Be registered with Selective Service, if you are a male (you must register between the ages of 18 and 25). Men exempted from the requirement to register include;
 - Males currently in the armed services and on active duty (this exception does not apply to members of the Reserve and National Guard who are not on active duty);
 - Males who are not yet 18 at the time that they complete their application (an update is not required during the year, even if a student turns 18 after completing the application);
 - Males born before 1960;

- Citizens of the Freely Associated States: The Federated States of Micronesia and the Republics of Palau and the Marshall Islands;
 - Noncitizens that first entered the U.S. as lawful non-immigrants on a valid visa and remained in the U.S. on the terms of that visa until after they turned 26.
4. Have a valid Social Security number unless you are from the Republic of the Marshall Islands, Federated States of Micronesia, or the Republic of Palau.
 5. Completed a FAFSA and the school must have a current ISIR to start the initial eligibility process.
 6. Sign certifying statements on the *FAFSA* stating that:
 - you are not in default on a federal student loan
 - do not owe a refund on a federal *grant*
 - Sign the required statement that you will use federal student aid only for educational purposes
 7. Maintain *satisfactory academic progress (SAP)* while you are attending college or a career school.
 8. Be enrolled at least halftime to receive assistance from the Direct Loan Program.
 9. The Pell Grant program does not require full time enrollment, but the student enrollment status does affect the amount of Pell Grant a student may receive. A student may be eligible to receive Pell Grant for a total of 12 payment periods or 600% which is the lifetime maximum that includes all schools the student attended and receive Pell Grant. Once the student has reached this limit, no further Pell Grant may be received.

In addition, you must meet one of the following:

1. Be a U.S. CITIZEN or U.S. NATIONAL
 - You are a U.S. citizen if you were born in the United States or certain U.S. territories, if you were born abroad to parents who are U.S. citizens, or if you have obtained citizenship status through naturalization. If you were born in American Samoa or Swains Island, then you are a U.S. national.
2. Have a Permanent Resident Card.
 - You are eligible if you have a Form I-551, I-151, or I-551C, also known as a green card, showing you are a U.S. permanent resident.
3. Have an ARRIVAL-DEPARTURE RECORD
 - Your Arrival-Departure Record (I-94) from U.S. Citizenship and Immigration Services must show one of the following:
 - Refugee
 - Asylum Granted
 - Cuban-Haitian Entrant (Status Pending)
 - Conditional Entrant (valid only if issued before April 1, 1980)
 - Parolee
4. Have BATTERED IMMIGRANT STATUS
 - You are designated as a “battered immigrant-qualified alien” if you are a victim of abuse by your citizen or permanent resident spouse, or you are the child of a person designated as such under the Violence Against Women Act.
5. Have a T-VISA
 - You are eligible if you have a T-visa or a parent with a T-1 visa.
6. “U-Visa” holders are not designated as qualified aliens under the Personal Responsibility and Work Opportunity Reconciliation Act (PRWORA), and are therefore not eligible for Title IV, HEA program funds. However, U-Visa holders may convert to lawful permanent resident (LPR) status after they have physically been present in the United States for a continuous period of at least three years after the date of admission given on their U-Visa.

Once LPR status has been granted, the holder of LPR status becomes a qualified alien under the PRWORA (see above), and thus potentially eligible for Title IV, HEA funds (assuming they meet all other eligibility requirements, for example, being enrolled as a regular student in an eligible program, having a high-school diploma or its recognized equivalent, having a Social Security number.

SATISFACTORY ACADEMIC PROGRESS

Satisfactory progress in attendance and academic work is a requirement for all students enrolled in this school. Federal regulations require all schools participating in state and federal financial aid programs to monitor SAP. These standards are applicable to all students attending the College. To be making Satisfactory Academic Progress (SAP) towards a Diploma or an Associate of Occupational Science Degree, students must maintain a specific grade point average as well as proceed through the program at a pace leading to completion in the specified time frame outlined below.

Students who re-enroll to earn a second credential will have their SAP measured on the current program without regard to the previous completed program. Students who change programs will have their SAP standing count toward their new program of study based on applicable credits or clock hours earned. Transfer credit can and do affect completion rates.

The College’s SAP standards have been established to ensure the quality of educational programs offered and to ensure academic integrity and the responsible disbursement and administration of Federal Title IV, HEA Financial Aid. SAP standards are applicable to all students regardless of method of payment (i.e. cash pay, VA, etc.). Any student who does not meet SAP may request an appeal due to mitigating circumstances (see SAP Appeals/Reinstatement section). SAP is not affected for those students on LOA.

Students who are making SAP, as defined by this policy, are considered to be in good standing and eligible to receive Federal Financial Aid. SAP is required to remain eligible for Title IV, HEA Federal Financial Aid and Graduation.

SAP - Academic Standards

Students must attain an overall grade point average of 2.0 (C). Satisfactory progress is measured at the beginning of each term and, at midpoint for the clock hour programs at Clary Sage College. If a student falls below this average, the student will be placed on Title IV, HEA academic warning for one payment period at which time the student must generate a grade of 2.0 or higher. The student will remain on institution academic warning, which is not the same as a Title IV, HEA academic warning, until the average generates a grade of 2.0 or higher. Any course failed must be repeated; however, not more than 50% of the total program may be repeated. Grades assigned for repeated courses will replace the prior grades. The College does not assign non-punitive grades. Non-credit and remedial courses are not offered. Grades are furnished to the student throughout the program and upon request.

SAP - Financial Aid Satisfactory Academic Progress Policy

As with all student's financial aid recipients are required to meet two separate requirements in order to maintain satisfactory academic progress.

- First, students are required to maintain a minimum satisfactory cumulative grade point average to fulfill Department of Education's qualitative component.
- Second, students are required to complete (pass) at least 70% of the program credits attempted or clock hours attempted for each of the terms/payment period in order to fulfill Department of Education's quantitative component.

These two requirements are summarized in the tables below. Failure to meet both these minimum academic standards could result in the loss of the student's Title IV, HEA financial aid eligibility.

For programs less than 30 weeks:

Attempted credits	Minimum G.P.A (Qualitative)	Percentage of Attempted Credit Hours (Quantitative)	Attempted Clock Hours	Minimum G.P.A (Qualitative)	Percentage of Attempted Clock Hours (Quantitative)
2	0.4	70%	150	0.5	70%
4	0.8	70%	300	1.0	70%
6	1.2	70%	450	1.5	70%
8	1.6	70%	600	2.0	70%
10 and up	2.0	70%			

For programs 30 weeks or longer:

Attempted credits	Minimum G.P.A (Qualitative)	Percentage of Attempted Credit Hours (Quantitative)	Attempted Clock Hours	Minimum G.P.A (Qualitative)	Percentage of Attempted Clock Hours (Quantitative)
3	0.5	70%	250	0.5	70%
6	1.0	70%	500	1.0	70%
9	1.5	70%	750	1.5	70%
12 and up	2.0	70%	1000	2.0	70%

SAP - Financial Aid Warning Policy

1. SAP is calculated at the end of each term/payment period.
2. Students not meeting the above requirements will be placed on warning and will receive a letter from the Financial Aid Office. Students placed on financial aid warning remain eligible to receive financial aid for one payment period only.
3. At the end of the subsequent term or at the midpoint of a clock hour program, another SAP evaluation will be conducted to determine if the student on warning has met the SAP requirements.
4. If upon evaluation, the student is able to meet SAP requirements, the student will be removed from academic and Title IV, HEA financial aid warning status.
5. If upon evaluation, the student once again fails to meet SAP requirements the student will be placed on Title IV, HEA financial aid suspension and will receive a letter from the Financial Aid Office stating they have lost Title IV, HEA financial aid eligibility.
6. A student placed on Title IV, HEA financial aid suspension cannot receive funds from financial aid programs, until they reestablish SAP or successfully appeal the SAP decision.
7. Students remain responsible for all tuition, costs and fees under their enrollment agreements that are incurred while on Title IV, HEA financial aid suspension.
8. If a student wishes to appeal a SAP decision, he or she may do so in writing. (see paragraph on appeal/reinstatement below)

Academic Year Definitions

- 24 credits / 30 weeks (Term type A) 15 week terms
- 24 credits / 32 weeks (Term type B) 16 week terms
- 24 credits / 36 weeks (Term type C) 18 week terms

To remain eligible for Title IV, HEA financial aid and maintain continued active enrollment, students are required to progress satisfactorily. Students must attain a grade point average of 2.0 in classroom subjects and complete their chosen program within one and a half (1 ½) times the published length of the program and for clock hour programs this time frame will be measured in terms of clock hours attempted.

The maximum period within a program is one and a half (1 ½) times of a program length. Students failing to progress satisfactorily or if they do not complete their chosen program within one and a half (1 ½) times the published length of the program will be withdrawn. All students are evaluated for SAP at least once during their program. All clock hours at the College and transfer hours must be counted toward the 150% eligibility whether a student received Title IV, HEA federal student aid or not in order to graduate within the maximum time frame.

SAP - Schedule of Program Completion

Credit Hour Programs

Standard Program Length

20 Credit Units
25 Credit Units

Maximum Length

30.0 Credit Units Attempted
37.5 Credit Units Attempted

33 Credit Units	49.5 Credit Units Attempted
50 Credit Units	75.0 Credit Units Attempted
69 Credit Units	103.5 Credit Units Attempted

Clock Hour Programs

<u>Standard Program Length</u>	<u>Maximum Length</u>
300 Clock Hours	450 Clock Hours Attempted
600 Clock Hours	900 Clock Hours Attempted
1000 Clock Hours	1500 Clock Hours Attempted

A Leave of Absence and Scheduled Holiday Breaks are not considered when calculating maximum time frame, since credit is not available during those times.

In addition to attendance standards relating to Satisfactory Academic Progress (SAP), students are also required to adhere to certain other general institutional policies relating to attendance and tardiness. These policies are outlined in the course syllabus.

SAP - Failed Course

Students who fail a course are allowed to repeat the course provided they are able to complete the program within one and one half times the published program length. Repeating a course will be at the students' expense. Eligible students may use financial aid to cover the expense. Students repeating a course must complete all class work and tests. The earned grade for the repeated course is recorded on the official transcript. To successfully repeat a failed course a student must earn a minimum cumulative GPA of 2.0 for the repeated course.

SAP – Incomplete (I)

An Incomplete (I) grade is given when required tests and coursework have not been completed by the end of the course. All work and/or testing must be completed within 30 days after the class has ended. Failure to comply within the time limit will result in the incomplete grade reverting to a final grade for all tests and/or course work completed. Student must contact their instructor to make-up any incomplete course work and/or tests within 30 days after the class has ended. Incomplete grades will count in credits attempted and clock hours attempted and completion percentage but do not affect GPA.

SAP – Withdraw (W)

Students who withdraw or are terminated from a program of study are charged according to the refund policy on the enrollment agreement. All courses not attempted within the term at the time of Withdraw will be assigned grades of "TW". All courses attempted within the term will receive a final grade based upon completed coursework and attendance. Grades of "W" will count in credits attempted and clock hours attempted and completion percentage but do not affect GPA.

SAP – Rescheduled Courses (RS)

Students may be rescheduled for a course due to attendance reasons. A grade of RS does not affect GPA or credits attempted or clock hours attempted at Clary Sage College, however, it does affect the maximum timeframe completion. Rescheduling a course will be at the students' expense. Eligible students may use financial aid to cover the expense.

SAP - Academic Warning/Expulsion

Students need to be aware that Academic Warning is not the same as Title IV, HEA warning. Students who fail to meet the minimum GPA for total credit units and clock hours attempted are placed on academic warning until the student is able to raise his/her GPA to an acceptable level. If the student's continued progress indicates his/her inability to raise the GPA to a minimum level, the Campus Director/President will evaluate whether it is in the student's best interest to be terminated from the program or be allowed to continue on warning status for a period of 30 days. The student will be provided notification in written form. If after this period of time has elapsed and the student is still not achieving the minimum GPA, the student will be expelled from the College. The student will be provided written notification of the College's decision of expulsion.

SAP - Readmission/Re-Enrollment

All withdrawn or terminated students who re-enter must have all monies previously owed to the College satisfied. The student will be responsible for the following fees: re-enrollment fee, tuition fee minus any money received from the prior enrollment, and any other published fees as necessary. Applicable credits attempted or clock hours attempted in the prior enrollment will be included in the credits or clock hours used to determine if the student can complete the program with 1 ½ times the length of the program. For a repeated course, the most recent grade is counted in the student GPA.

Students being re-admitted/re-enrolled will enter with the same SAP standing that they left on. So if you left on Title IV, HEA Warning and/or Academic Warning, or Title IV, HEA probation, you would be admitted with the same SAP standing and requirements.

SAP – Title IV, HEA Appeals/Reinstatement

A student who loses their Title IV, HEA financial aid eligibility due to not making SAP at the end of a financial aid warning has the right to file an appeal regarding their Satisfactory Academic Progress Evaluations. Students who wish to appeal the decisions concerning satisfactory progress regarding Title IV, HEA warning and/or termination based on failure to meet SAP must do so in writing to the Campus Director/President within 14 calendar days of receipt of the written warning/termination notice.

The student must describe any unusual circumstance(s) that the student believes deserve special consideration. The basis on which a student may file an appeal:

1. death of a relative,
2. an injury,
3. illness of the student or
4. other special circumstance.

The student must provide information as to why they did not make SAP and what has changed that will allow them to make SAP by the next evaluation point.

Students with mitigating circumstances should submit an appeal letter to describe any circumstances that the student feels deserve further consideration. Any supporting documentation must be attached to the submitted letter. The Campus Director/President, in turn, will investigate the student's concerns and provide a final written determination within 14 calendar days to the student. The Campus Director/President's decision is final.

Students who have lost Title IV, HEA eligibility for financial aid can be reinstated by improving their academic grade point average to the designated standards of satisfactory progress definition, prevailing at an appeal, returning from a leave of absence which commenced while the student was making satisfactory progress, or satisfactorily resolving the warning. Students can reinstate their ability to receive aid through an evaluation process. Once an appeal has been granted students will be eligible to receive Title IV, HEA funds for that term or payment period only. Students placed on suspension due to SAP are considered to be on Academic warning for the term/payment period.

Financial Aid Probation Status and Financial Appeal Granted:

Should the student prevail upon their appeal, they will be placed on a Title IV, HEA Financial Probation for that payment period only. The student will then be eligible for Title IV, HEA funds for that payment period. While on Financial Aid Probation, the student must meet the institution's Satisfactory Academic Progress standards and complete the requirements of the Academic Improvement Plan, which was developed by the institution to assist the student in regaining their Title IV, HEA eligibility. A student on Financial Aid Probation because of a successful appeal is eligible for Title IV, HEA funds for ONE payment period.

The student may also be placed on an individual development plan to assist the student in regaining SAP at the end of this payment period. Those who are not making SAP at the end of the Financial Aid probation period will be ineligible to receive Title IV, HEA funds for the following payment periods. A student must meet SAP prior to having eligibility reinstated. The individual development plan will identify the student's requirements that must be met to regain Title IV HEA financial aid eligibility and will be monitored by the Registrar and Financial Aid Departments at the College.

Probation Not Granted:

If the student is not granted a Probation they will remain on **Academic Warning** with a loss of Title IV, HEA funding for at least one payment period, at which time they must be making SAP in order to regain Title IV, HEA funding for the next payment period.

Reinstatement of Aid:

This process is limited to the period under evaluation. Students making SAP by the conclusion of the probation period will be removed from the probation status and will regain eligibility for Title IV, HEA aid.

Attendance:

Students are expected to attend all regularly scheduled classes, clinical/laboratory sessions and externship/internship. Poor attendance generally results in poor grades. Attendance in class is a requirement and will be considered in the evaluation of student performance. Students having difficulties due to absenteeism must discuss this matter with their instructor. Refer to the course syllabus for individual course attendance requirements. A student is considered to have completed a whole week if they have attendance in that week and attempted a subsequent week.

RETURN OF TITLE IV FUNDS, HEA POLICY

When you apply for financial aid, you sign a statement that you will use the funds for educational purposes only. Therefore, if you withdraw before completing your program, a portion of the funds you received may have to be returned. The College will calculate the amount of tuition to be returned to the Title IV, HEA Federal fund programs according to the policies listed below.

RETURN TO TITLE IV FUNDS POLICY

This policy applies to students who **withdraw official, unofficially or fail to return from a leave of absence or dismissed from enrollment** at the College. It is separate and distinct from the College refund policy. (Refer to institutional refund policy)

The calculated amount of the Return of Title IV, HEA (R2T4) funds that are required for the students affected by this policy, are determined according to the following definitions and procedures as prescribed by regulations.

The amount of Title IV, HEA aid earned is based on the amount of time a student spent in academic attendance, and the total aid received; it has no relationship to student's incurred institutional charges. Because these requirements deal only with Title IV, HEA funds, the order of return of **unearned** funds do not include funds from sources other than the Title IV, HEA programs.

Title IV, HEA funds are awarded to the student under the assumption that he/she will attend school for the entire period for which the aid is awarded. When student withdraws, he/she may no longer be eligible for the full amount of Title IV, HEA funds that were originally scheduled to be received. Therefore, the amount of Federal funds earned must be determined. If the amount disbursed is greater than the amount earned, unearned funds must be returned.

The institution has 45 days from the date that the institution determines that the student withdrew to return all unearned funds for which it is responsible. The school is required to notify the student if they owe a repayment via written notice. The school must advise the student or parent that they have 14 calendar days from the date that the school sent the notification to accept a post withdraw disbursement. If a response is not received from the student or parent within the allowed time frame or the student declines the funds, the school will return any earned funds that the school is holding to the Title IV, HEA programs.

Withdraw Before 60%

The institution must perform a R2T4 to determine the amount of earned aid through the 60% point in each payment period or period of enrollment. The institution will use the Department of Education's prorate schedule to determine the amount of the R2T4 funds the student has earned at the time of withdraw.

Withdraw After 60%

After the 60% point in the payment period or period of enrollment, a student has earned 100% of the Title IV, HEA funds he or she was scheduled to receive during this period. The institution must still perform a R2T4 to determine the amount of aid that the student has earned.

The College measures progress in Clock Hours, and uses the payment period for the period of calculation.

The Calculation Formula: Clock Hour Programs

Determine the amount of Title IV, HEA aid that was disbursed plus Title IV, HEA aid that could have been disbursed.

Calculate the percentage of Title IV, HEA aid earned:

- a. Divide the number of clock hours scheduled to be completed in the payment period as of the last date of attendance in the payment period by the total clock hours in the payment period.

$$\frac{\text{HOURS SCHEDULED TO COMPLETE}}{\text{TOTAL HOURS IN PERIOD}} = \% \text{ EARNED}$$

- b. If this percentage is greater than 60%, the student earns 100%.
- c. If this percent is less than or equal to 60%, proceeds with calculation.
Percentage earned from (multiplied by) Total aid disbursed, or could have been disbursed = AMOUNT STUDENT EARNED.
Subtract the Title IV aid earned from the total disbursed = AMOUNT TO BE RETURNED.
100% minus percent earned = UNEARNED PERCENT
Unearned percent (multiplied by) total institutional charges for the period = AMOUNT DUE FROM THE SCHOOL.

If the percent of Title IV aid disbursed is greater than the percent unearned (multiplied by) institutional charges for the period, the amount disbursed will be used in place of the percent unearned.

If the percent unearned (multiplied by) institutional charges for the period are less than the amount due from the school, the student must return or repay one-half of the remaining unearned Federal Pell Grant.

Student is not required to return the overpayment if this amount is equal to or less than 50% of the total grant assistance that was disbursed /or could have been disbursed. The student is also not required to return an overpayment if the amount is \$50 or less.

The College will issue a grant overpayment notice to student within 30 days from the date the school's determination that student withdrew, giving student 45 days to either:

- d. Repay the overpayment in full to the College or Sign a repayment agreement with the U.S. Department of Education.

Example of Calculation: - Credit Hour Programs

1. Determined the percentage of Title IV, HEA aid earned by the student by taking the calendar days completed in the payment period, divided by the total calendar days in the payment period (excluding breaks of 5 days or more *and* days the student was on an approved LOA

$$\frac{18(\text{completed days})}{118(\text{total days})} = 15.3\% \text{ (\% of completed calendar days)}$$

2. Determine the amount of Title IV, HEA aid earned by the student by multiplying the percentage of Title IV, HEA aid earned times the total of the Title IV, HEA aid disbursed **plus** the Title IV, HEA aid that could have been disbursed for the payment period.
 $15.3\% \times \$2805.00 = 429.17$ (Amount of aid earned by student)
3. If this percentage is greater than 60%, the student earns 100% of the disbursed Title IV, HEA funds or aid that could have been disbursed.
4. If this percentage is less than 60%, then the percentage earned is equal to the calculated value.
5. Funds are returned to the appropriate federal program based on the percent of Percentage of aid earned = the number of scheduled hours in the payment period completed unearned aid using the following formula:
6. Aid to be returned = (100% minus the percent earned) multiplied by the amount of aid disbursed toward institutional charges. If a student earned less aid than was disbursed, the institution would be required to return a portion of the funds and the student may be required to return a portion of the funds. All Title IV funds that the institution must return will be made no later than 45 calendar days after the date the school determines that the student withdrew.
7. When Title IV, HEA funds are returned, the student may owe a balance to the College.

Order of Return

The College is authorized to return any excess funds after applying them to current outstanding Cost of Attendance (COA) charges. A copy of the Institutional R2T4 work sheet performed on your behalf is available through the office upon student request.

In accordance with Federal regulations, when Title IV, HEA financial aid is involved, the calculated amount of the R2T4 Funds" is allocated in the following order:

- Unsubsidized Direct Stafford loans (other than PLUS loans)
- Subsidized Direct Stafford loans
- Parent Plus loans
- Direct PLUS loans
- Federal Pell Grants for which a Return is required
- Iraq and Afghanistan Service Grant for which a Return is required
- Other Title IV, HEA assistance
- State Tuition Assistance Grants
- Private and institutional aid
- The Student funds as outlined in the Refund

Earned AID:

Title IV, HEA aid is earned in a prorated manner on a per diem basis (calendar days or clock hours) up to the 60% point in the semester. Title IV, HEA aid is viewed as 100% earned after that point in time. A copy of the worksheet used for this calculation can be requested from the financial aid director.

Post Withdraw

If you did not receive all of the funds that you have earned, you may be due a post-withdrawal disbursement. The College may use a portion or all of your post-withdraw disbursement for tuition and fees (as contracted with the College).

The College will offer any post-withdraw disbursement of loan funds within 30 days of the date it determines the student withdrew.

The College must disburse any Title IV, HEA grant funds a student is due as part of a post-withdrawal disbursement within 45 days of the date the school determined the student withdrew and disburse any loan funds a student accepts within 180 days of that date.

For all other school charges, the College needs your permission to use the post-withdraw disbursement. If you do not give permission, you will be offered the funds. However, it may be in your best interest to allow the school to keep the funds to reduce your debt at the school. The post-withdrawal disbursement must be applied to outstanding institutional charges before being paid directly to the student.

Time frame for returning an unclaimed Title IV, HEA credit balance

If a school attempts to disburse the credit balance by check and the check is not cashed, the school must return the funds no later than 240 days after the date the school issued the check.

If a check is returned to a school or an EFT is rejected, the school may make additional attempts to disburse the funds, provided that those attempts are made not later than 45 days after the funds were returned or rejected. When a check is returned or EFT is rejected and the school does not make another attempt to disburse the funds, the funds must be returned before the end of the initial 45-day period.

The school must cease all attempts to disburse the funds and return them no later than 240 days after the date it issued the first check.

Institution Responsibilities in regards to return of Title IV, HEA funds

The College's responsibilities in regards to Title IV, HEA funds follow:

- Providing students information with information in this policy;
- Identifying students who are affected by this policy and completing the return of Title IV, HEA funds calculation for those students;
- Returning any Title IV, HEA funds due to the correct Title IV, HEA programs.

The College is not always required to return all of the excess funds; there are situations once the R2T4 calculations have been completed in which the student must return the unearned aid.

Overpayment of Title IV, HEA Funds

Any amount of unearned grant funds that the student must return is called overpayment. The amount of grant overpayment that the student must repay is half of the grant funds the student received or was scheduled to receive. The student must make arrangement with Community Care College, Clary Sage College, Oklahoma Technical College or Department of Education to return the amount of unearned grant funds.

Student Responsibilities in regards to return of Title IV, HEA funds

- Returning to the Title IV, HEA programs any funds that were dispersed to the student in which the student was determined to be ineligible for via the R2T4 calculation.
- Any notification of withdrawal should be in writing and addressed to the appropriate institutional official.
- A student may rescind his or her notification of intent to withdraw. Submissions of intent to rescind a withdrawal notice must be filed in writing.
- Either these notifications, to withdraw or rescind to withdraw must be made to the official records/registration personnel at your school.

Refund vs. Return to Title IV, HEA Funds

The requirements for the Title IV, HEA program funds when you withdraw are separate from any refund policy that the College may have to return to you due to a cash credit balance. Therefore, you may still owe funds to the school to cover unpaid institutional charges. The College may also charge you for any Title IV, HEA program funds that they were required to return on your behalf.

If you do not already know what the College refund policy is, you may ask your School's Financial Specialist for a copy.

Return to Title IV, HEA questions?

If you have questions regarding Title IV, HEA program funds after visiting with your financial aid director, you may call the Federal Student Aid Information Center at 1-800-4-fedaid (800-433-3243). TTY users may call 800-730-8913. Information is also available on student aid on the web www.studentaid.ed.gov.

STUDENT POLICIES

ATTENDANCE

Students are expected to attend all regularly scheduled classes, clinical/laboratory sessions and externalities/internship. Poor attendance generally results in poor grades. Attendance in class is a requirement and a part of a students' grade. Students having difficulties due to absenteeism must discuss their matter with their instructor. Refer to the course syllabus for individual course attendance requirements. If a students' overall attendance percentage drops below 70% they will be placed on academic warning/probation for 90 days or until their attendance is raised above 70%. A student is considered to have completed a whole week if they have attendance in that week and attempted a subsequent week for online students.

ACADEMIC HONESTY

Academic honesty is expected of all students. No cheating will be tolerated. Examples of cheating include:

- Talking or bringing written notes during a test
- Looking at another student's paper during testing
- Plagiarism-submitting another's work and claiming it as your own

STUDENT SERVICES

At Community Care College, Clary Sage College and Oklahoma Technical College we understand that life happens. The role of Student Services is to provide students with guidance and resources to help students address and overcome any obstacles they may encounter during their education. Whether students are on-ground or on-line they can visit www.mycourseconnection.com to find a full list of resources available to students who are struggling. If additional help is needed, students can e-mail studentservices@communitycarecollege.edu or visit the student services coordinator on your campus.

CAREER SERVICES

The College will assist students in obtaining employment upon graduation. This is a service and is not to be considered as a guarantee of employment or job placement.

The College makes contact with and obtains referrals from potential employers regarding job openings. Information obtained from these contacts is matched against the known qualifications and backgrounds of students and/or graduates. Students or graduates who meet the employer's qualification requests are advised of the opening and are expected to pursue the job opportunity and/or job offer from the employer.

The College assists in arranging interviews for graduating students and eligible graduated students. This service is not available to graduates who have lost their jobs through negligence, failure to maintain standards prescribed by their employers, or misconduct. This service is only available to graduates that are in good standing with all departments of the College.

LEAVE OF ABSENCE

A Leave of Absence is a privilege extended to the student by a consenting staff member. A leave of absence is rarely granted. If a student wishes to request a leave of absence, the student must first follow the approval process. Students must submit a written request for permission to take a leave of absence to the Department Head. The request must include: A beginning and ending date, the reason for the request, and supporting documentation. Students must be in good academic standing at the time of the leave to qualify for the leave of absence. Action on the requested leave will be determined by the Registrar and is based on a student's individual situation and academic standing with the college. If a leave of absence is granted the leave cannot exceed a total of 180 days in any 12-month period. Students not returning to class on the LOA return date or properly extending their LOA will be withdrawn from the program. The College may grant more than one leave of absence in the event that unforeseen circumstances arise, such as medical reasons affecting the student or a member of student's immediate family, military service requirements, or jury duty, provided that the combined leaves of absence do not exceed 180 days within the 12-month period.

CONDUCT

As professionals in training, students are expected to have a certain level of honesty, ethical conduct, and respect for each other. Therefore, it is the protocol of the College to discipline any student committing violations of conduct policies. In most cases, the student is first placed on a warning. If a student repeats the same offense, the student's warning may be extended or the student will be expelled from the College. This decision will be made by the President.

Plagiarism, Copying, Cheating: Any student found to have plagiarized, copied, or otherwise attempted to indicate the work of another as their own, in an attempt to benefit themselves or otherwise enhance their standing within the class, may be expelled.

Theft: Any student found to have committed theft of property from another person or from the College will be expelled. The school reserves the right to take legal recourse including, but not limited to, arrest.

Illegal Drug Usage: It is the Colleges' policy to comply with all local, state, and federal laws. Therefore, if a student is caught consuming drugs on campus, in possession of drugs, or attends class under the influence of drugs, the school reserves the right to notify local law enforcement agencies. Any student determined to be under the influence of any drug that may impair their ability to function or endanger others, will be dismissed from class and it shall be considered an unexcused absence.

Tobacco Use: The Colleges are tobacco-free campuses. Students may not use tobacco products while on campus grounds. If a student wishes to use tobacco products the student must leave the campus premises.

Public Display of Affection: Inappropriate public displays of affection are not permitted on campus.

Weapons or Firearms: No forms of weapons or firearms are allowed on campus property. If a student is caught with a weapon or firearm it is grounds for immediate expulsion as well as contacting appropriate officials. The school reserves the right to determine what is or is not a weapon.

GRIEVANCE PROCEDURE

The purpose of the grievance procedure is to provide an opportunity to resolve concerns as quickly as possible. A student with a concern may contact the instructor, Department Head or President. Recommendations, directives, or suggestions will be made. The following guidelines are to be followed:

1. Problems are to be addressed outside of class, during break, or after class.

2. Complaints should first be resolved by discussion with the instructor and/or Department Head for academic concerns. If the grievance is not resolved satisfactorily with these individuals, it can then be submitted to the President, whose decision is considered final in all matters pertaining to the College.

If the complaint cannot be resolved after exhausting the College's grievance procedure, the student may file a complaint with the following:

Oklahoma Board of Private Vocational Schools
3700 N. Classen Blvd., #250
Oklahoma City, OK 73118

If a student does not feel that the college has adequately addressed a complaint or concern, the student may consider contacting the Accrediting Commission. All complaints reviewed by the Commission must be in written form and should grant permission for the Commission to forward a copy of the complaint to the college for a response. This can be accomplished by filing the ACCSC Complaint Form. The complainant(s) will be kept informed as to the status of the complaint as well as the final resolution by the Commission. Please direct all inquiries to:

Accrediting Commission of Career Schools and Colleges
2101 Wilson Boulevard, Suite 302
Arlington, VA 22201 (703) 247-4212
www.accsc.org

A copy of the ACCSC Complaint Form is available at the college and may be obtained by contacting the Accreditation and Compliance Director or online at www.accsc.org.

Medical Assistant Students may contact:

Accrediting Bureau of Health Education Schools
7777 Leesburg Pike, Suite 314
Falls Church, VA 22043

Nebraska residents may contact the program director of Private Postsecondary Schools at:

Nebraska Department of Education (402) 471-4825
301 Centennial Mall South
P.O. Box 94987
Lincoln, NE 68509-4987

EXPULSION/TERMINATION

Students who fail to meet all requirements of a disciplinary action can be expelled by the President/Campus Director. The student will be notified in writing that he or she is being expelled with an explanation of reasons normally based on violation of a warning or corrective action. In some cases such as theft, highly inappropriate behavior, or misuse of college records or documents (includes forgery, alteration and destruction); however, the student may be expelled without a warning period. Expulsion/termination will be conducted during a private counseling session. Students will be offered the opportunity to sign a copy of the expulsion form and it will be placed into the student record. The student will also be given a copy of the form. Students may appeal using the procedures below.

APPEAL AND REINSTATEMENT POLICY

Expelled students or those who have withdrawn are not entitled to readmission unless a written request is submitted to the Campus Director/President and is approved. Students re-entering the college are charged current tuition rates for the time required to complete the program, plus a \$150 reinstatement fee, and will be required to re-enter on a conditional status. If the student feels the college has made an error in its decision to expel, he or she should submit arguments in writing and address it to the attention of the Campus Director/President. The case will then be reviewed by the Campus Director/President whose decision is final. Students who are denied initial admission to the College may reapply for admission after 90 days from the date of the denial.

ACADEMIC WARNING/CORRECTIVE ACTION/PROBATION

Students are placed on academic warning if they are failing to meet Satisfactory Academic Progress (SAP) guidelines, their Grade Point Average (GPA) falls below a 2.0, they have excessive failed courses, excessive tardiness, or their overall attendance percentage falls below 70%. Students are placed on corrective action in instances where behavior (non-academic) is unacceptable and in most cases have received at least one warning. The terms academic warning and corrective action are used in place of probation. Students are placed on academic warning or corrective action for a minimum of 30 days and no longer than 90 days.

PROGRAM CHANGE

A student must obtain the approval of administration for permission to change a program of study. The student must be in good standing with all departments and meet all prerequisites for the desired program. The form for requesting changes may be obtained from the student's current Department Head to initiate the change. There is a \$150 fee assessed with the program change.

To change programs, students must follow these procedures.

1. Complete the change of major form, including obtaining all required signatures. Students may be required to meet additional admission criteria for the new program.

2. Return the completed form and all supporting documentation to Admissions.
3. Consult with the Financial Aid office to determine payment obligations for any fees incurred from the date of the change forward.

VETERAN/MILITARY OVERVIEW

All students attending the college, receiving veteran education benefits, are required per the Federal Regulation 38 CFR 214253 (d)(1)(iv) to:

Adhere to Attendance Policy

Students are expected to attend all regularly scheduled classes, clinical/laboratory sessions and externalities/internship. Poor attendance generally results in poor grades. Attendance in class is a requirement and a part of a students' grade. Students having difficulties due to absenteeism must discuss their matter with their instructor. Refer to the course syllabus for individual course attendance requirements. If a students' overall attendance percentage drops below 70% they will be placed on academic warning/probation for 90 days or until their attendance is raised above 70%. A student is considered to have completed a whole week if they have attendance in that week and attempted a subsequent week for online students.

Must comply with the colleges SAP (Satisfactory Academic Process) Policy

Satisfactory progress in attendance and academic work is a requirement for all students enrolled in this school. Federal regulations require all schools participating in state and federal financial aid programs to monitor SAP. These standards are applicable to all students attending the College.

To be making Satisfactory Academic Progress (SAP) towards a Diploma or an Associate of Occupational Science Degree, students must maintain a specific grade point average as well as proceed through the program at a pace leading to completion in the specified time frame outlined below.

Students who re-enroll to earn a second credential will have their SAP measured on the current program without regard to the previous completed program. Students who change programs will have their SAP standing count toward their new program of study based on applicable credits or clock hours earned. Transfer credit can and do affect completion rates.

The College's SAP standards have been established to ensure the quality of educational programs offered and to ensure academic integrity and the responsible disbursement and administration of Federal Title IV, HEA Financial Aid. SAP standards are applicable to all students regardless of method of payment (i.e. cash pay, VA, etc.). Any student who does not meet SAP may request an appeal due to mitigating circumstances (see SAP Appeals/Reinstatement section). SAP is not affected for those students on LOA.

Students who are making SAP, as defined by this policy, are considered to be in good standing and eligible to receive Federal Financial Aid. SAP is required to remain eligible for Title IV, HEA Federal Financial Aid and Graduation.

SAP - Academic Standards

Students must attain an overall grade point average of 2.0 (C). Satisfactory progress is measured at the beginning of each term and, at midpoint for the clock hour programs at Clary Sage College. If a student falls below this average, the student will be placed on Title IV, HEA academic warning for one payment period at which time the student must generate a grade of 2.0 or higher. The student will remain on institution academic warning, which is not the same as a Title IV, HEA academic warning, until the average generates a grade of 2.0 or higher. Any course failed must be repeated; however, not more than 50% of the total program may be repeated. Grades assigned for repeated courses will replace the prior grades. The College does not assign non-punitive grades. Non-credit and remedial courses are not offered. Grades are furnished to the student throughout the program and upon request.

SAP - Financial Aid Satisfactory Academic Progress Policy

As with all student's financial aid recipients are required to meet two separate requirements in order to maintain satisfactory academic progress.

- First, students are required to maintain a minimum satisfactory cumulative grade point average to fulfill Department of Education's qualitative component.
- Second, students are required to complete (pass) at least 70% of the program credits attempted or clock hours attempted for each of the terms/payment period in order to fulfill Department of Education's quantitative component.

These two requirements are summarized in the tables below. Failure to meet both these minimum academic standards could result in the loss of the student's Title IV, HEA financial aid eligibility.

For programs less than 30 weeks:

Attempted credits	Minimum G.P.A (Qualitative)	Percentage of Attempted Credit Hours (Quantitative)	Attempted Clock Hours	Minimum G.P.A (Qualitative)	Percentage of Attempted Clock Hours (Quantitative)
2	0.4	70%	150	0.5	70%
4	0.8	70%	300	1.0	70%
6	1.2	70%	450	1.5	70%
8	1.6	70%	600	2.0	70%
10 and up	2.0	70%			

For programs 30 weeks or longer:

Attempted credits	Minimum G.P.A (Qualitative)	Percentage of Attempted Credit Hours (Quantitative)	Attempted Clock Hours	Minimum G.P.A (Qualitative)	Percentage of Attempted Clock Hours (Quantitative)
3	0.5	70%	250	0.5	70%
6	1.0	70%	500	1.0	70%
9	1.5	70%	750	1.5	70%
12 and up	2.0	70%	1000	2.0	70%

SAP - Financial Aid Warning Policy

1. SAP is calculated at the end of each term/payment period.
2. Students not meeting the above requirements will be placed on warning and will receive a letter from the Financial Aid Office. Students placed on financial aid warning remain eligible to receive financial aid for one payment period only.
3. At the end of the subsequent term or at the midpoint of a clock hour program, another SAP evaluation will be conducted to determine if the student on warning has met the SAP requirements.
4. If upon evaluation, the student is able to meet SAP requirements, the student will be removed from academic and Title IV, HEA financial aid warning status.
5. If upon evaluation, the student once again fails to meet SAP requirements the student will be placed on Title IV, HEA financial aid suspension and will receive a letter from the Financial Aid Office stating they have lost Title IV, HEA financial aid eligibility.
6. A student placed on Title IV, HEA financial aid suspension cannot receive funds from financial aid programs, until they reestablish SAP or successfully appeal the SAP decision.
7. Students remain responsible for all tuition, costs and fees under their enrollment agreements that are incurred while on Title IV, HEA financial aid suspension.
8. If a student wishes to appeal a SAP decision, he or she may do so in writing. (see paragraph on appeal/reinstatement below)

Academic Year Definitions

- 24 credits / 30 weeks (Term type A) 15 week terms
- 24 credits / 32 weeks (Term type B) 16 week terms
- 24 credits / 36 weeks (Term type C) 18 week terms

To remain eligible for Title IV, HEA financial aid and maintain continued active enrollment, students are required to progress satisfactorily. Students must attain a grade point average of 2.0 in classroom subjects and complete their chosen program within one and a half (1 ½) times the published length of the program and for clock hour programs this time frame will be measured in terms of clock hours attempted.

The maximum period within a program is one and a half (1 ½) times of a program length. Students failing to progress satisfactorily or if they do not complete their chosen program within one and a half (1 ½) times the published length of the program will be withdrawn. All students are evaluated for SAP at least once during their program. All clock hours at the College and transfer hours must be counted toward the 150% eligibility whether a student received Title IV, HEA federal student aid or not in order to graduate within the maximum time frame.

SAP - Schedule of Program Completion

Credit Hour Programs

Standard Program Length

20 Credit Units	Maximum Length 30.0 Credit Units Attempted
25 Credit Units	37.5 Credit Units Attempted
33 Credit Units	49.5 Credit Units Attempted
50 Credit Units	75.0 Credit Units Attempted
69 Credit Units	103.5 Credit Units Attempted

Clock Hour Programs

Standard Program Length

300 Clock Hours	Maximum Length 450 Clock Hours Attempted
600 Clock Hours	900 Clock Hours Attempted
1000 Clock Hours	1500 Clock Hours Attempted

A Leave of Absence and Scheduled Holiday Breaks are not considered when calculating maximum time frame, since credit is not available during those times.

In addition to attendance standards relating to Satisfactory Academic Progress (SAP), students are also required to adhere to certain other general institutional policies relating to attendance and tardiness. These policies are outlined in the course syllabus.

SAP - Failed Course

Students who fail a course are allowed to repeat the course provided they are able to complete the program within one and one half times the published program length.

Repeating a course will be at the students' expense. Eligible students may use financial aid to cover the expense. Students repeating a course must complete all class work and tests. The earned grade for the repeated course is recorded on the official transcript. To successfully repeat a failed course a student must earn a minimum cumulative GPA of 2.0 for the repeated course.

SAP – Incomplete (I)

An Incomplete (I) grade is given when required tests and coursework have not been completed by the end of the course. All work and/or testing must be completed within 30 days after the class has ended. Failure to comply within the time limit will result in the incomplete grade reverting to a final grade for all tests and/or course work completed. Student must contact their instructor to make-up any incomplete course work and/or tests within 30 days after the class has ended. Incomplete grades will count in credits attempted and clock hours attempted and completion percentage but do not affect GPA.

SAP – Withdraw (W)

Students who withdraw or are terminated from a program of study are charged according to the refund policy on the enrollment agreement. All courses not attempted within the term at the time of Withdraw will be assigned grades of "TW". All courses attempted within the term will receive a final grade based upon completed coursework and attendance. Grades of "W" will count in credits attempted and clock hours attempted and completion percentage but do not affect GPA.

SAP – Rescheduled Courses (RS)

Students may be rescheduled for a course due to attendance reasons. A grade of RS does not affect GPA or credits attempted or clock hours attempted at Clary Sage College, however, it does affect the maximum timeframe completion. Rescheduling a course will be at the students' expense. Eligible students may use financial aid to cover the expense.

SAP - Academic Warning/Expulsion

Students need to be aware that Academic Warning is not the same as Title IV, HEA warning. Students who fail to meet the minimum GPA for total credit units and clock hours attempted are placed on academic warning until the student is able to raise his/her GPA to an acceptable level. If the student's continued progress indicates his/her inability to raise the GPA to a minimum level, the Campus Director/President will evaluate whether it is in the student's best interest to be terminated from the program or be allowed to continue on warning status for a period of 30 days. The student will be provided notification in written form. If after this period of time has elapsed and the student is still not achieving the minimum GPA, the student will be expelled from the College. The student will be provided written notification of the College's decision of expulsion.

SAP - Readmission/Re-Enrollment

All withdrawn or terminated students who re-enter must have all monies previously owed to the College satisfied. The student will be responsible for the following fees: re-enrollment fee, tuition fee minus any money received from the prior enrollment, and any other published fees as necessary. Applicable credits attempted or clock hours attempted in the prior enrollment will be included in the credits or clock hours used to determine if the student can complete the program with 1 ½ times the length of the program. For a repeated course, the most recent grade is counted in the student GPA.

Students being re-admitted/re-enrolled will enter with the same SAP standing that they left on. So if you left on Title IV, HEA Warning and/or Academic Warning, or Title IV, HEA probation, you would be admitted with the same SAP standing and requirements.

SAP – Title IV, HEA Appeals/Reinstatement

A student who loses their Title IV, HEA financial aid eligibility due to not making SAP at the end of a financial aid warning has the right to file an appeal regarding their Satisfactory Academic Progress Evaluations. Students who wish to appeal the decisions concerning satisfactory progress regarding Title IV, HEA warning and/or termination based on failure to meet SAP must do so in writing to the Campus Director/President within 14 calendar days of receipt of the written warning/termination notice.

The student must describe any unusual circumstance(s) that the student believes deserve special consideration. The basis on which a student may file an appeal:

5. death of a relative,
6. an injury,
7. illness of the student or
8. other special circumstance.

The student must provide information as to why they did not make SAP and what has changed that will allow them to make SAP by the next evaluation point.

Students with mitigating circumstances should submit an appeal letter to describe any circumstances that the student feels deserve further consideration. Any supporting documentation must be attached to the submitted letter. The Campus Director/President, in turn, will investigate the student's concerns and provide a final written determination within 14 calendar days to the student. The Campus Director/President's decision is final.

Students who have lost Title IV, HEA eligibility for financial aid can be reinstated by improving their academic grade point average to the designated standards of satisfactory progress definition, prevailing at an appeal, returning from a leave of absence which commenced while the student was making satisfactory progress, or satisfactorily resolving the warning. Students can reinstate their ability to receive aid through an evaluation process. Once an appeal has been granted students will be eligible to receive Title IV, HEA funds for that term or payment period only. Students placed on suspension due to SAP are considered to be on Academic warning for the term/payment period.

Financial Aid Probation Status and Financial Appeal Granted:

Should the student prevail upon their appeal, they will be placed on a Title IV, HEA Financial Probation for that payment period only. The student will then be eligible for Title IV, HEA funds for that payment period. While on Financial Aid Probation, the student must meet the institution's Satisfactory Academic Progress standards and complete the requirements of the Academic Improvement Plan, which was developed by the institution to assist the student in regaining their Title IV, HEA eligibility. A student on Financial Aid Probation because of a successful appeal is eligible for Title IV, HEA funds for ONE payment period.

The student may also be placed on an individual development plan to assist the student in regaining SAP at the end of this payment period. Those who are not making SAP at the end of the Financial Aid probation period will be ineligible to receive Title IV, HEA funds for the following payment periods. A student must meet SAP prior to having eligibility reinstated. The individual development plan will identify the student's requirements that must be met to regain Title IV HEA financial aid eligibility and will be monitored by the Registrar and Financial Aid Departments at the College.

Probation Not Granted:

If the student is not granted a Probation they will remain on **Academic Warning** with a loss of Title IV, HEA funding for at least one payment period, at which time they must be making SAP in order to regain Title IV, HEA funding for the next payment period.

Reinstatement of Aid:

This process is limited to the period under evaluation. Students making SAP by the conclusion of the probation period will be removed from the probation status and will regain eligibility for Title IV, HEA aid.

Attendance:

Students are expected to attend all regularly scheduled classes, clinical/laboratory sessions and externship/internship. Poor attendance generally results in poor grades. Attendance in class is a requirement and will be considered in the evaluation of student performance. Students having difficulties due to absenteeism must discuss this matter with their instructor. Refer to the course syllabus for individual course attendance requirements. A student is considered to have completed a whole week if they have attendance in that week and attempted a subsequent week.

Students that withdraw from the program before completion may have charges that will not be covered by the Department of Veteran Affairs.

Active Military Duty: Military students or students who are dependents of a military service members who receive active duty orders during their program may apply for a Leave of Absence and must also provide the Financial Aid Office with a copy of the active duty orders. The orders must include the date the student must report for duty and the length of time of service. This official documentation is required in order to apply for an LOA. Upon receipt of the required documentation, the College will determine:

- If a program delivery method change will meet the service requirements. If so, students will be allowed to change program delivery methods and the fees associated with the change will be waived.
- If a Leave of Absence is required to meet the requirements of service duty.
- If withdrawal from the program is required to meet the requirements of service duty. Any Re-Enrollment fee will be waived. If withdrawal is required, special consideration will be given during the re-enrollment process.

The College may grant more than one leave of absence in the event that unforeseen circumstances arise, such as medical reasons affecting the student or a member of student's immediate family, military service requirements, or jury duty, provided that the combined leaves of absence do not exceed 180 days within the 12-month period.

VA education benefits will not pay for drop fees, re-entry fees, re-schedule fees, or program change fees.

Per Title 38, Code of Federal Regulations, Section 21.4253(d)(3) and 21.4254(C)(4) requires the college to review prior credit and grant credit as appropriate to a VA students current program.

The school policy requires that all prior learning be evaluated in a timely manner. Students utilizing veteran education benefits must provide all prior learning transcripts to the school **within 16 weeks of student's program start date**. Failure to do so will result in loss of remaining certification until all transcripts have been received and evaluated by the school. Official transcripts are preferred but unofficial will be accepted. (In order to receive transfer credits, official transcripts are required.)

As a result of this evaluation any courses that you have claimed for benefits toward your current program that are repeats may result in an over payment in which the VA may attempt to collect at a later time.

Students who leave school prior to graduation may have a balance owed to the school VA Education benefits will not cover. You may refer to page 11 for additional information regarding the Cancellation/Refund Policy.

ACCOUNTING ASSISTANT – Diploma ASSOCIATE OF OCCUPATIONAL SCIENCE ACCOUNTING (DE)

Objective

The Accounting Assistant diploma program prepares students for entry-level accounting and bookkeeping positions. The program is also designed to provide graduates with a foundation in accounting principles that will enable them to advance in their bookkeeping roles. Theoretical accounting concepts are balanced with practical applications using in-demand accounting software. The course also covers the required topics for certifications in QuickBooks Online and Microsoft Excel.

The Associate of Occupational Science Accounting Degree is designed to help students develop leadership abilities needed for business success. This program further equips graduates with the skills and knowledge necessary to meet the requirements of entry-level accounting positions. The Associate of Occupational Science Degree (AOS) is designed for students, desiring to develop applicable job-related skills, who plan to go straight into the work force. This degree requires fewer general education credits than an Associate of Science Degree. The transferability of AOS credits is possible, but not guaranteed.

Classroom Procedures

Each course stands alone as a unit of study and is not dependent upon prerequisite training except for the completion of ACC1203 Financial Accounting before ACC2203 Managerial Accounting, ACC1403 Software Applications: Excel I before ACC2403 Software Applications: Excel II, and ACC1303 Accounting Software: QuickBooks I before ACC2303 Accounting Software: QuickBooks II. Career and Life Development (AH101) is required for students and is taken online. A student may enter the program at the beginning of any course and continue through the sequence until completion of all courses.

ACCOUNTING ASSISTANT - DIPLOMA ASSOCIATE OF OCCUPATIONAL SCIENCE ACCOUNTING (DE)

AH101 Career and Life Development

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.

ACC1203 Financial Accounting

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

This course will prepare students to measure and record financial data. Students will also learn to create journal entries, post, and adjust entries in an accounting cycle. Additional topics include the preparation of standard financial statements; income statement, balance sheet, statement of owner's equity, and cash flow statements.

ACC1303 Accounting Software: QuickBooks I

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

This course will prepare students to perform common bookkeeping tasks using QuickBooks. Procedures covered include setting up, interpreting, and entering transactions for the whole accounting cycle using current accounting standards. Using real-world scenarios, students will work through the topics required for the QuickBooks Certification Exam including how to set up customers; vendors; jobs; bank accounts; loans; inventory items; other current assets and liabilities; income; and expenses. Additional topics include the different versions of QuickBooks, QuickBooks Apps, and key reports commonly produced for management and other stakeholders.

ACC2203 Managerial Accounting

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

This course continues to explore the accounting cycle. It is a more in-depth study of accrual and cash basis accounting; procedures for handling cash; receivables; depreciation; cost of goods; merchandise inventory; ending inventory calculations; error correction; internal control; and fraud prevention. Additional topics include the closing process for the accounting cycle using the trial balance and accounting worksheet, year-end entries, and adjusting entries.

Prerequisite: ACC1203

ACC2283 Accounts Receivable and Accounts Payable Management

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

This course covers topics on Accounts Receivable, including sales on account, credit card sales, sales returns, trade and cash discounts, posting to general and subsidiary ledgers, sales taxes, and preparing a schedule. Topics covered on Accounts Payable include credit purchases, net delivered cost of purchases, internal control, periodic and perpetual accounting system. Additional topics include cash, petty cash, and bank reconciliations. All topics in AR and AP will be covered in QuickBooks.

ACC1403 Software Applications: Excel I

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

This course is designed to introduce students to Excel for performing a wide range of accounting tasks in a business environment. The student will work through the topics required for Excel Certification Exam including entering and editing data; modifying worksheets; performing functions; formatting; printing; creating tables, charts, and graphs; and managing large workbooks.

ACC2403 Software Applications: Excel II

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

This course builds on Excel I. Students continue to work through the topics required for certification including financial tools and functions; performing what-if analyses; analyzing data with business intelligence; and collaborating on a shared workbook. The course also covers word processing, database, and presentation graphics skills using the Windows operating system. The student will sit for the certification exam at the end of this course.

Prerequisite: ACC1403

ACC2343 Payroll Administration

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

This course focuses on the management of payroll procedures under the Fair Labor Standards Act and the Internal Revenue Code. Basic concepts and procedures of payroll administration in QuickBooks and an emphasis in the procedural requirements of HRM are covered. Topics include maintaining payroll records and the preparation of federal, state, and local payroll tax reports. Other subjects include payroll and personnel records, computing wages and salary, social security taxes, income tax withholding, unemployment compensation taxes, and analyzing and journalizing payroll transactions.

MGT1463 Office Management

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

The Office Management course prepares students to assume positions as office managers, supervisors, or as assistants to top executives. Topics covered include office operations efficiency, customer service, professional communication and marketing, and event planning and budgeting.

ACC2503 Business Tax Fundamentals

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

This course will provide the student with the fundamentals of small business tax practices. Students will learn the procedures for income tax, estimated tax, self-employment tax, employment taxes, excise tax, and sales tax. Additional topics include procedures for handling I-9's, W-4's, W-2's, W-3, and 1099 Misc. forms.

MKT2423 Introduction to Marketing

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

Introduction to Marketing will provide the student with the knowledge to build customer relationships through effective marketing, to create and price products that will satisfy the customer and to develop integrated marketing communications.

ACC2213 Accounting Principles

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

Accounting Principles is designed to give the student a full understanding of the accounting cycle and how to record financial data.

MGT2123 Leadership Development**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

This course is designed to provide future and existing leaders the opportunity to explore the concept of leadership and to develop and improve their leadership skills. In this course a variety leadership roles expected of team members with practical suggestions for improved leadership skills will be discussed. Additionally, sources of power and influence, delegation, group processes, conflict resolution, and group decision-making techniques will be discussed.

MGT1373 Human Resources**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

The study of Human Resources will familiarize students with the legal and regulatory environment that pertains to the business world. Hiring, training and development, performance appraisals and compensation will all be discussed.

MGT2213 Principles of Management**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

Principles of Management teach the foundations of management: planning organizing, execution of objectives and the dynamics and impact of leadership.

ENG2343 Business Communications**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

Business Communications teaches the principles of professional communications. Students will learn to use communication technologies for personal branding. The course also emphasizes effective speaking and listening skills.

BUS2213 Principles of Business**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

Principles of Business will teach students the basis for business operations and professionalism with an emphasis on entrepreneurship and the risks and rewards of starting their own business or improving business processes in an existing business. Working in groups and making effective presentations will also be explored.

BUS1353 Business Math**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

Business Mathematics students will receive a rapid review of basic mathematics (i.e., addition, subtraction, multiplication, division, fractions, percentages, and algebraic equations) with a view toward improving speed and accuracy. The Business Math course is designed to provide students with practical learning in key areas of business math applications. These skills include figuring percentages, discounts, taxes, payroll, interest, and other math concepts.

GEN1113 Critical Thinking and Problem Solving**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

The Critical Thinking and Problem Solving course teaches basic principles and techniques in these important skills. This course provides instruction in an overview of critical thinking to include argument, rhetoric as a persuasion tool, fallacies, and types of reasoning. This course will specifically focus on using these critical thinking skills in writing, assessing credibility issues, and forming opinions. Additionally, it addresses problem-solving skills based on using critical thinking.

ACC2303 Accounting Software: QuickBooks II**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

This course builds on QuickBooks I. Students continue to work through the topics required for QuickBooks certification including working with settings and navigation, banking, customers, vendors; sales, expenses, inventory, payroll, chart of accounts, transactions, adjustments, and producing financial reports. The student will sit for the certification exam at the end of this course.

Prerequisite: ACC1303

ASSOCIATE OF OCCUPATIONAL SCIENCE BUSINESS AND INDUSTRY MANAGEMENT (Resident)

Objective

The Associate of Occupational Science Degree in Business & Industry Management is designed to provide students with basic business concepts in management, accounting, marketing, human resources, and business law. The curriculum focuses on real-world applications relevant to all industries. Students gain a competitive advantage for career advancement, business ownership, and leadership development. Students who have earned diplomas in accredited programs will be able to combine their technical education with business specialized courses to prepare them for management opportunities afforded to them in their respective industries. The Associate of Occupational Science Degree (AOS) is designed for students, desiring to develop applicable job-related skills, who plan to go straight into the work force. This degree requires fewer general education credits than an Associate of Science Degree. The transferability of AOS credits is possible, but not guaranteed.

Classroom Procedures

Each course stands alone as a unit of study and is not dependent upon prerequisite training. Career and Life Development (AH100) is required for any residential students and is taken Monday through Thursday from 8:00am to 1:00pm or 5:30pm to 10:30pm. A student may enter the program at the beginning of any course and continue through the sequence until completion of all courses.

Course Requirements

Any student not holding a diploma from an accredited institution consisting of at least 30 semester credit hours will be required to take the Business and Industry Management core courses listed below with an ** as well as the courses listed under degree requirements.

ASSOCIATE OF OCCUPATIONAL SCIENCE BUSINESS AND INDUSTRY MANAGEMENT (Resident)

AH100 Career and Life Development

Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 3

Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.

BUS2153 Business Ethics

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

In business ethics, the course will consider business actions and decisions in the light of moral principles and values, ask whether ethical motives in business activity would make business better and more successful, and examine fundamental ethical consequences of business decisions made in today's thriving organizations. Further, this course will examine issues and conflicts that typically arise in business that have moral aspects to them, such as the way employers treat their employees, employees their employers, and the ways businesses treat their competitors, their customers, their society, and even their environment.

BUS2523 Customer Relations Management

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

Students will learn strategies for managing a company's interactions with customers, clients and sales prospects. This course will focus on using technology to organize, automate, and synchronize business processes—principally sales activities, but also those for marketing, tech support, and customer service. The overall goals of this course are to illustrate ways to find, attract, and win new clients, nurture and retain those the company already has, entice former clients back into the fold, and reduce the costs of marketing and client service. Customer satisfaction and value will be at the core of this course.

BUS2543 Information Technology and Trends

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

This is an introductory course to information systems in business. This course explains the difference between computer literacy and information literacy. Students will gain valuable insight on emerging trends, technologies, and applications. Students will look at the risks associated with information technologies, as well as the value of e-commerce.

BUS2553 Project Management

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

This course is designed to provide insight into depth of Project Management. Students will become more aware of the roles of project managers and team members. They will also learn how to define the scope of a project. Students will be challenged in resource planning and project controls.

BUS2563 Operations Management

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

Fundamental concepts of operations including: productivity, quality, logistics, distribution, supply chain technology, inventory management, and project management will be taught in this course. Other concepts include design and scheduling of personnel activities, design of operations and work systems, job simplification, service location problems, vehicle scheduling and routing, utilization of service capacity, and quality control in service operations. Managing operations well requires both strategic and tactical skills. This course is designed to give and improve both skills and combine them with other needed business expertise.

BUS2573 Entrepreneurship

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

Developing a business plan is one of the most important challenges an entrepreneur will face. The process of developing a good business plan requires an understanding and appreciation for the tools required to do it right. This course will explore some of the pitfalls of starting a business, the responsibilities of the owner and the resources available to help make an informed decision and reach the target market.

BUS2583 Professional Sales

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

Students will obtain a broad overview of the basic concepts of sales management. They will gain valuable understanding of the topics of personal selling, understanding buyers and current developments in purchasing, effective sales dialogue, evaluating salesperson performance, and preparations of sales presentations. Students will also explore components of retail management. This course is designed to give the student a strong start in salesmanship.

BUS2593 Professional Development

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

This course is an advanced study of business administration and management, and human resources. Students will be introduced to small business enterprises and management. Emphasis will be placed on personal and professional strategies for growth and development. Management strategies for high-performance skills will also be discussed.

BUS2313 Business Law

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

Business Law teaches students about contracts, criminal law, sales laws, property laws. The legal environment of business will also be discussed.

MKT2423 Introduction to Marketing

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

Introduction to Marketing will provide the student with the knowledge to build customer relationships through effective marketing, to create and price products that will satisfy the customer and to develop integrated marketing communications.

ACC2213 Accounting Principles

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

Accounting Principles is designed to give the student a full understanding of the accounting cycle and how to record financial data.

MGT2123 Leadership Development

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

This course is designed to provide future and existing leaders the opportunity to explore the concept of leadership and to develop and improve their leadership skills. In this course a variety leadership roles expected of team members with practical suggestions for improved leadership skills will be discussed. Additionally, sources of power and influence, delegation, group processes, conflict resolution, and group decision-making techniques will be discussed.

MGT1373 Human Resources**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

The study of Human Resources will familiarize students with the legal and regulatory environment that pertains to the business world. Hiring, training and development, performance appraisals and compensation will all be discussed.

MGT2213 Principles of Management**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

Principles of Management teach the foundations of management: planning organizing, execution of objectives and the dynamics and impact of leadership.

ENG2343 Business Communications**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

Business Communications teaches the principles of professional communications. Students will learn to use communication technologies for personal branding. The course also emphasizes effective speaking and listening skills.

BUS2213 Principles of Business**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

Principles of Business will teach students the basis for business operations and professionalism with an emphasis on entrepreneurship and the risks and rewards of starting their own business or improving business processes in an existing business. Working in groups and making effective presentations will also be explored.

BUS1353 Business Math**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

Business Mathematics students will receive a rapid review of basic mathematics (i.e., addition, subtraction, multiplication, division, fractions, percentages, and algebraic equations) with a view toward improving speed and accuracy. The Business Math course is designed to provide students with practical learning in key areas of business math applications. These skills include figuring percentages, discounts, taxes, payroll, interest, and other math concepts.

GEN1113 Critical Thinking and Problem Solving**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

The Critical Thinking and Problem Solving course teaches basic principles and techniques in these important skills. This course provides instruction in an overview of critical thinking to include argument, rhetoric as a persuasion tool, fallacies, and types of reasoning. This course will specifically focus on using these critical thinking skills in writing, assessing credibility issues, and forming opinions. Additionally, it addresses problem-solving skills based on using critical thinking.

BUS3000 Capstone**Lecture Hrs: 0 Lab Hrs: 90 Credit Hrs: 3**

In this course, students will complete a project that culminates their experience in the Associate of Occupational Science Business and Industry Management program. Students will work in conjunction with their instructor to determine their project topic and requirements.

ASSOCIATE OF OCCUPATIONAL SCIENCE BUSINESS AND INDUSTRY MANAGEMENT (DE)

Objective

The Associate of Occupational Science Degree in Business & Industry Management is designed to provide students with basic business concepts in management, accounting, marketing, human resources, and business law. BUS2553 Project Management

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

This course is designed to provide insight into depth of Project Management. Students will become more aware of the roles of project managers and team members. They will also learn how to define the scope of a project. Students will be challenged in Resource Planning and Project Controls.

BUS2563 Operations Management

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

Fundamental concepts of operations including: productivity, quality, logistics, distribution, supply chain technology, inventory management, and project management will be taught in this course. Other concepts include design and scheduling of personnel activities, design of operations and work systems, job simplification, service location problems, vehicle scheduling and routing, utilization of service capacity, and quality control in service operations. Managing operations well requires both strategic and tactical skills. This course is designed to give and improve both skills and combine them with other needed business expertise.

BUS2573 Entrepreneurship

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

Developing a business plan is one of the most important challenges an entrepreneur will face. The process of developing a good business plan requires an understanding and appreciation for the tools required to do it right. This course will explore some of the pitfalls of starting a business, the responsibilities of the owner and the resources available to help make an informed decision and reach the target market.

BUS2583 Professional Sales

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

Students will obtain a broad overview of the basic concepts of sales management. They will gain valuable understanding of the topics of personal selling, understanding buyers and current developments in purchasing, effective sales dialogue, evaluating salesperson performance, and preparations of sales presentations. Students will also explore components of retail management. This course is designed to give the student a strong start in salesmanship.

BUS2593 Professional Development

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

This course is an advanced study of business administration and management, and human resources. Students will be introduced to small business enterprises and management. Emphasis will be placed on personal and professional strategies for growth and development. Management strategies for high-performance skills will also be discussed

BUS2313 Business Law

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

Business Law teaches students about contracts, criminal law, sales laws, and property laws. The legal environment of business will also be discussed.

MKT2423 Introduction to Marketing

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

Introduction to Marketing will provide the student with the knowledge to build customer relationships through effective marketing, to create and price products that will satisfy the customer and to develop integrated marketing communications.

ACC2213 Accounting Principles

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

Accounting Principles is designed to give the student a full understanding of the accounting cycle and how to record financial data.

MGT2123 Leadership Development

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

This course is designed to provide future and existing leaders the opportunity to explore the concept of leadership and to develop and improve their leadership skills. In this course a variety leadership roles expected of team members with practical suggestions for improved leadership skills will be discussed. Additionally, sources of power and influence, delegation, group processes, conflict resolution, and group decision-making techniques will be discussed.

MGT1373 Human Resources**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

The study of Human Resources will familiarize students with the legal and regulatory environment that pertains to the business world. Hiring, training and development, performance appraisals and compensation will all be discussed.

MGT2213 Principles of Management**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

Principles of Management teach the foundations of management: planning organizing, execution of objectives and the dynamics and impact of leadership.

ENG2343 Business Communications**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

Business Communications teaches the principles of professional communications. Students will learn to use communication technologies for personal branding. The course also emphasizes effective speaking and listening skills.

BUS2213 Principles of Business**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

Principles of Business will teach students the basis for business operations and professionalism with an emphasis on entrepreneurship and the risks and rewards of starting their own business or improving business processes in an existing business. Working in groups and making effective presentations will also be explored.

BUS1353 Business Math**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

Business Mathematics students will receive a rapid review of basic mathematics (i.e., addition, subtraction, multiplication, division, fractions, percentages, and algebraic equations) with a view toward improving speed and accuracy. The Business Math course is designed to provide students with practical learning in key areas of business math applications. These skills include figuring percentages, discounts, taxes, payroll, interest, and other math concepts.

GEN1113 Critical Thinking and Problem Solving**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

The Critical Thinking and Problem Solving course teaches basic principles and techniques in these important skills. This course provides instruction in an overview of critical thinking to include argument, rhetoric as a persuasion tool, fallacies, and types of reasoning. This course will specifically focus on using these critical thinking skills in writing, assessing credibility issues, and forming opinions. Additionally, it addresses problem-solving skills based on using critical thinking.

BUS3000 Capstone**Lecture Hrs: 0 Lab Hrs: 90 Credit Hrs: 3**

In this course, students will complete a project that culminates their experience in the Associate of Occupational Science Business and Industry Management program. Students will work in conjunction with their instructor to determine their project topic and requirements.

ASSOCIATE OF OCCUPATIONAL SCIENCE BUSINESS AND INDUSTRY MANAGEMENT (Hybrid)

Objective

The Associate of Occupational Science Degree in Business & Industry Management is designed to provide students with basic business concepts in management, accounting, marketing, human resources, and business law. The curriculum focuses on real-world applications relevant to all industries. Students gain a competitive advantage for career advancement, business ownership, and leadership development. Students who have earned diplomas in accredited programs will be able to combine their technical education with business specialized courses to prepare them for management opportunities afforded to them in their respective industries. The Associate of Occupational Science Degree (AOS) is designed for students, desiring to develop applicable job-related skills, who plan to go straight into the work force. This degree requires fewer general education credits than an Associate of Science Degree. The transferability of AOS credits is possible, but not guaranteed.

Classroom Procedures

Each course stands alone as a unit of study and is not dependent upon prerequisite training. Career and Life Development (AH106) is required for students and is taken online. A student may enter the program at the beginning of any course and continue through the sequence until completion of all courses. Courses will meet 3 hours per week on campus and the remaining hours will be completed online.

Course Requirements

Any student not holding a diploma from an accredited institution consisting of at least 30 semester credit hours will be required to take the Business and Industry Management core courses listed below with an ** as well as the courses listed under degree requirements.

Online Degree

Total Classroom Hrs:	960

ASSOCIATE OF OCCUPATIONAL SCIENCE BUSINESS AND INDUSTRY MANAGEMENT (Hybrid)

AH101 Career and Life Development

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.

BUS2153 Business Ethics

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

In business ethics, the course will consider business actions and decisions in the light of moral principles and values, ask whether ethical motives in business activity would make business better and more successful, and examine fundamental ethical consequences of business decisions made in today's thriving organizations. Further, this course will examine issues and conflicts that typically arise in business that have moral aspects to them, such as the way employers treat their employees, employees their employers, and the ways businesses treat their competitors, their customers, their society, and even their environment.

BUS2523 Customer Relations Management

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

Students will learn strategies for managing a company's interactions with customers, clients and sales prospects. This course will focus on using technology to organize, automate, and synchronize business processes—principally sales activities, but also those for marketing, tech support, and customer service. The overall goals of this course are to illustrate ways to find, attract, and win new clients, nurture and retain those the company already has, entice former clients back into the fold, and reduce the costs of marketing and client service. Customer satisfaction and value will be at the core of this course.

BUS2543 Information Technology and Trends

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

This is an introductory course to information systems in business. This course explains the difference between computer literacy and information literacy. Students will gain valuable insight on emerging trends, technologies, and applications. Students will look at the risks associated with information technologies, as well as the value of e-commerce.

BUS2553 Project Management

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

This course is designed to provide insight into depth of Project Management. Students will become more aware of the roles of project managers and team members. They will also learn how to define the scope of a project. Students will be challenged in Resource Planning and Project Controls.

BUS2563 Operations Management

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

Fundamental concepts of operations including: productivity, quality, logistics, distribution, supply chain technology, inventory management, and project management will be taught in this course. Other concepts include design and scheduling of personnel activities, design of operations and work systems, job simplification, service location problems, vehicle scheduling and routing, utilization of service capacity, and quality control in service operations. Managing operations well requires both strategic and tactical skills. This course is designed to give and improve both skills and combine them with other needed business expertise.

BUS2573 Entrepreneurship

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

Developing a business plan is one of the most important challenges an entrepreneur will face. The process of developing a good business plan requires an understanding and appreciation for the tools required to do it right. This course will explore some of the pitfalls of starting a business, the responsibilities of the owner and the resources available to help make an informed decision and reach the target market.

BUS2583 Professional Sales

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

Students will obtain a broad overview of the basic concepts of sales management. They will gain valuable understanding of the topics of personal selling, understanding buyers and current developments in purchasing, effective sales dialogue, evaluating salesperson performance, and preparations of sales presentations. Students will also explore components of retail management. This course is designed to give the student a strong start in salesmanship.

This course will specifically focus on using these critical thinking skills in writing, assessing credibility issues, and forming opinions. Additionally, it addresses problem-solving skills based on using critical thinking.

BUS3000 Capstone**Lecture Hrs: 0****Lab Hrs: 90****Credit Hrs: 3**

In this course, students will complete a project that culminates their experience in the Associate of Occupational Science Business and Industry Management program. Students will work in conjunction with their instructor to determine their project topic and requirements.

DENTAL ASSISTANT - DIPLOMA (Resident)

Objective

The Dental Assistant plays a vital role in the organized delivery of dental services. Theory and practical application in the fundamentals of chair side assisting and administrative procedures are taught for use in any size dental practice, specialty practice, or clinic. Students are certified in CPR. In addition, students engage in "hands-on" training with regard to dental equipment, instruments, and tray set-ups. Students are taught proper dental health and laboratory procedures. This program equips the graduate with the skills and knowledge necessary to meet the requirements of an entry-level Dental Assistant and the ability to assume such a position.

Classroom Procedures

Each course stands alone as a unit of study and is not dependent upon prerequisite training. A student may enter the program at the beginning of any course and continue through the sequence until completion of all courses. Career and Life Development (AH100) is required for any residential students and is taken Monday through Thursday from 8:00am to 1:00pm or 5:30pm to 10:30pm. Dental related courses meet 20 hours per week.

Externship

The externship is undertaken following the successful completion of all classroom training and consists of 180 hours. Students may locate their own externship site for consideration or may use sites previously established with the College. This externship is unpaid and the hours of attendance are determined by the externship site. Students are required to attend at least 20 hours per week while fulfilling externship requirements.

DENTAL ASSISTANT - DIPLOMA (Resident)

AH100 Career and Life Development Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.	Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 3
PHI1153 Medical Law and Ethics This course covers legal relationships of physicians and patients, contractual agreements, professional liability, malpractice, medical practice acts, informed consent, and bioethical issues. Emphasis is placed on HIPPA, legal terms, professional attitudes, and the principles and basic concepts of ethics and laws involved in providing medical services.	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
BIO1316 Anatomy & Physiology This course is a study in human anatomy and physiology. This course will focus on an in-depth study of the human muscular system and skeletal system. Particular emphasis will be on the head and neck.	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
BIO1387 Nutrition The student will learn tools for nutritional assessment and will be provided with the skills to educate patients on current trends and diets that work especially those that are endorsed by the medical community.	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
AH225 Sterilization Procedures/OSHA This course introduces the infection and hazard control procedures necessary for the safe practice of healthcare. Topics include microbiology, practical infection control, sterilization and monitoring, chemical disinfectants, aseptic technique, infectious diseases, OSHA standards, and applicable laws. Students are introduced to the autoclave and accessories as well as surgical instrument preparation, processing and wrapping. Upon completion, students should be able to understand infectious diseases, disease transmission, infection control procedures, biohazard management, OSHA standards, and applicable laws.	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
AH115 Medical Emergencies and CPR In this course the student will learn basic first aid and CPR training. The student will be instructed on the skills needed to recognize and respond to various life-threatening situations for victims of all ages. Emergencies such as respiratory arrest, cardiac arrest, and foreign-body airway obstruction will be addressed. With successful completion of this CPR program the student will receive a two-year certification in Basic Life Support (BLS) for the Healthcare Provider. The fundamentals of first aid will also be covered.	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
AH220 Introduction to Pharmacology This course is an introduction to pharmacology which includes terminology, drug category, use, side effects, contraindications, and interactions. Common dosage ranges and routes of administration will also be examined.	Lecture Hrs: 20 Lab Hrs: 0 Credit Hrs: 1
DA1115 Dental Terminology Students will learn the parts and functions of bodies being treated in dentistry. Emphasis is placed on abbreviations, prefixes, root words, suffixes and their meanings.	Lecture Hrs: 20 Lab Hrs: 0 Credit Hrs: 1
DA1111 Practice Management/Patient Relations This course provides an overview of the business aspect of the dental practice and the role of the business office auxiliary. This course focuses on several key behavioral concepts and techniques for effective patient management and interpersonal office skills. Students will learn to function as a successful professional in health care delivery and will develop knowledge of the psychology of individuals and groups.	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
DA1113 Introduction to Dental Assisting This course covers an introduction to the basic knowledge of dentition and the principles of morphology. Student will also place their focus on identifying the landmarks and anatomy of the head and neck.	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
DA1114 Pre-Clinical This course emphasizes the names and uses of a wide range of dental instruments and equipment. The student will be taught the ergonomics of dental assisting and concepts of four-handed dentistry.	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
DA1213 Preventative This course covers the skills and concepts for preventing periodontal disease, oral hygiene instruction, nutritional counseling, and plaque control and fluoride therapy.	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
DA1215 Periodontics This course covers different types of periodontal disease, treatment, prevention and instruments and materials used in this specialty.	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
DA1118 Introduction to Dental Radiography This course covers the basic concepts in radiation and principles of radiography, focusing on patient and operator safety. Students will learn the principles of x-ray production, x-ray film processing techniques, methods of evaluation in identifying exposure errors, and occupational radiation safety.	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
DA1119 Dental Laboratory This course covers the use of dental materials and gypsum products.	Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1

DA1229 Fixed Prosthodontics	Lecture Hrs: 10	Lab Hrs: 10	Credit Hrs: 1
This course includes instruction in assisting with the preparation of fixed crowns and bridges. The student will be taught the fixed prosthodontic procedures, suctioning, tray set-up, retracting, dental charting, impression taking, provisional making, and post-operative instructions specific to fixed prosthodontics.			
DA1225 Operative	Lecture Hrs: 10	Lab Hrs: 10	Credit Hrs: 1
This course includes instruction in assisting with the removal of dental caries, and placement of filling materials. The student will be taught the composite restorations, suctioning, retracting, tray setup, dental charting, and post-operative instructions specific to composite restorations procedures.			
DA1227 Dental Implants	Lecture Hrs: 15	Lab Hrs: 5	Credit Hrs: 1
This course includes instruction in assisting with the placement of dental implants, abutments, and implant supported restorations. The student will be taught implant surgery procedures, post-operative instructions specific to implant procedures and the various supported restorations used by the dental professionals.			
DA1221 Pedodontics	Lecture Hrs: 15	Lab Hrs: 5	Credit Hrs: 1
This course covers the prevention, diagnosis, and treatment of children's dental health problems.			
DA1223 Orthodontics	Lecture Hrs: 15	Lab Hrs: 5	Credit Hrs: 1
This course will focus on the growth and development of the jaws and face, the positioning of teeth, influences on development, and prevention and correction of malocclusions.			
DA1126 Endodontics	Lecture Hrs: 15	Lab Hrs: 5	Credit Hrs: 1
This course will focus on the dental specialty concerned with the treatment of pulpal and periapical diseases of the teeth. The student will learn proper chair side techniques for assisting with pulp capping, pulpotomy, pulpectomy, instrumentation and obturation of infected root canals, and removal of diseased periapical tissues.			
DA1181 Dental Sciences	Lecture Hrs: 15	Lab Hrs: 5	Credit Hrs: 1
This course will focus on Embryology, histology of the life cycle of the tooth, tooth structure and components of the periodontium. Students will also be taught Microbiology, groups of microorganisms, and the disease of major concern to the dental assistant.			
DA1129 Oral Pathology/Oral Surgery	Lecture Hrs: 15	Lab Hrs: 5	Credit Hrs: 1
In the duration of this course, the student will focus on the aseptic techniques, suctioning, retracting, dental charting, proper instrument handling, tray setup and post-operative instructions for procedures involving a variety of oral surgeries.			
DA1131 Essentials of Dental Radiography – Bisecting/Paralleling	Lecture Hrs: 10	Lab Hrs: 10	Credit Hrs: 1
This course will focus on placement exposure and processing of the radiograph using the bisecting and paralleling method. Darkroom procedures and mounting are included.			
DA1133 Essentials of Dental Radiography-Lab	Lecture Hrs: 10	Lab Hrs: 10	Credit Hrs: 0.5
This course is lab intensive; the student will continue to expand practical skill based knowledge and will practice proof of competency on manikins.			
DAEXT311 Externship		Clock Hrs: 180	Credit Hrs: 4
In this course the student will spend 180 hours in a dental facility.			

EARLY CHILDHOOD EDUCATION – Diploma (DE)

Objective

Working with young children is one of the most rewarding, yet challenging, career choices one can make. A significant challenge within the Early Childhood Education profession is the preparation and training of those who care for and teach young children. Young children benefit from having a nurturing caregiver, developmentally appropriate materials and activities, positive peer interactions and a safe learning environment in which they take an active role in the learning process. The Early Childhood Education (ECE) program is committed to preparing students to enter the field of early care and education with the skills needed to help children succeed not only in college, but in life. Graduates of the ECE program will be skilled in historical, philosophical, political and theoretical best practices to ensure they have the tools to support children's emotional, physical, language, and cognitive development in practice. Community Care College has partnered with the CDA Council to help support the professional development of our early care and education professionals toward achieving The Child Development Associate (CDA) Credential™. Our ECE courses will count toward the 120 professional education hours required to apply for the CDA.

Classroom Procedures

Each course stands alone as a unit of study and is not dependent upon prerequisite training. A student may enter the program at the beginning of any course and continue through the sequence until completion of all courses. Career and Life Development (AH101) is required for students and is taken online.

EARLY CHILDHOOD EDUCATION - DIPLOMA (DE)

AH101 Career and Life Development

Lecture Hours: 45 Lab Hours: 0 Credit Hours: 3

Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.

ECE110 ECE Classroom Management

Lecture Hours: 45 Lab Hours: 0 Credit Hours: 3

This course will focus on effective classroom management including organization, efficiency, classroom layout, transitions, schedules and routines.

ECE103 Child Growth and Development

Lecture Hours: 45 Lab Hours: 0 Credit Hours: 3

This course focuses on the study of growth and development beginning with conception and continuing through age eight.

ECE106 Curriculum, Documentation, and Observation

Lecture Hours: 45 Lab Hours: 0 Credit Hours: 3

This course will prepare students to create and lead developmentally appropriate activities for the ECE classroom and also exposes the student's various types of observation and documentation methods typically used in the classroom.

ECE112 Professionalism and ECE Program Management

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

This course will prepare students to conduct themselves as professionals in their personal and work life. Students will learn the importance of continued education, ethics, and training in order to advance as a professional and manage an effective, high-quality child care service.

ECE109 Social Emotional Development and Guidance

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

This course focuses on how to support children in developing a positive sense of self and encourage healthy social and emotional growth and development.

ECE108 Movement, Art, and Literacy

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

This course will focus on the importance of movement, creative art, and literacy in the development of gross and fine motor skills as well as emotional, social, and cognitive development in young children.

ECE104 Planning ECE Learning Environments

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

This course focuses on designing, maintaining, and evaluating safe, healthy, and effective learning environments.

ECE115 Family, Community, and Early Education

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

This course will prepare students to develop positive partnerships among families, early childhood programs, and communities.

ECE200 Capstone

Lecture Hrs: 0 Lab Hrs: 120 Credit Hrs: 4

In this course, students will complete a project that culminates their experience in the Early Childhood Education program. Students will work in conjunction with their instructor to determine their project topic and requirements.

FITNESS AND HEALTH TRAINER - DIPLOMA (Resident)

Objective

This program covers the essential components of fitness and health necessary to produce qualified fitness professionals. The objective of the program is to prepare students academically and professionally for entry-level positions in health promotion and fitness. This career field continues to grow as our nation becomes increasingly concerned with health and wellness. Graduates will be prepared to work in a wide variety of facilities as fitness instructors or personal trainers. Successful program graduates are eligible for the National Academy of Sports Medicine NASM - Certified Personal Trainer and NASM – Fitness Nutrition Specialization (FNS). Additionally, graduates will be academically prepared to start their own fitness businesses using advanced leadership and administrative skills.

Classroom Procedures

Most courses stand alone as a unit of study and are not dependent upon prerequisite training; however, the following courses require prerequisites: Physical Fitness Assessments (FHT115) before Corrective Exercise Program Design (FHT116). A student may enter the program at the beginning of any course and continue through the sequence until completion of all courses. Career and Life Development (AH100) is required for any residential students and is taken Monday through Thursday from 8:00am to 1:00pm. Fitness and Health Trainer related courses meet 20 hours per week.

Externship

The externship is undertaken following the successful completing of all classroom training and consists of 200 hours. Students may locate their own externship site for consideration or may use sites previously established with the College. This externship is unpaid and the hours of attendance are determined by the externship site. Students are required to attend at least 20 hours per week while fulfilling externship requirements. Students can begin accumulating up to 20 hours for the externship after passing the required skill sets as outlined by the course curriculum.

** Course requires a prerequisite prior to taking course.

***Upon successful completion of all three classes, student is eligible to test for the National Academy of Sports Medicine (NASM) Fitness Nutrition Specialization Certificate.

FITNESS AND HEALTH TRAINER - DIPLOMA (Resident)

AH100 Career and Life Development

Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 3

Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.

FHT111 Healthy Lifestyles

Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1

This course is an introduction to health, wellness, and hypokinetic disease as it relates to individual lifestyles. Topics include disease risk reduction, Healthy People 2010 and community health programs. The students will learn self-management skills to adhere to healthy lifestyle behaviors.

FHT117 Anatomy

Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1

This course will provide the student with a basic understanding of functional anatomy as it relates to exercise and personal training. Topics include the musculoskeletal system, anatomical planes, cardiovascular anatomy, anatomical locations, circulatory system, respiratory system, skeletal muscle structure & microanatomy (muscle cell structure & fiber types).

FHT119 Physiology

Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1

This course covers the physiological components of exercise and the impact exercise has on the systems of the body. Topics include exercise metabolism, energy systems, acute & chronic effects of exercise, metabolic response to exercise, Measurement of metabolism and oxygen consumption, Cardiorespiratory response to exercise & neuromuscular response to resistance exercise.

FHT118 Biomechanics & Kinesiology

Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1

This course will include the study of human motion as it relates to exercise and personal training. Topics will include Joint motions, major movements of the upper and lower extremities, forces & torques, laws of motion, kinetics & kinematics.

FHT123 Cardiorespiratory Fitness

Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1

This course will cover all aspects of cardiorespiratory fitness. There will be discussion on the term "threshold" and "target zones" and how to achieve these physical states. The student will also learn about modalities of cardiovascular fitness training, methods of assessment, and the NASM guidelines for improving cardiorespiratory fitness.

FHT125 Muscular Fitness

Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1

This course will cover various aspects of muscular fitness. Topics include modalities of improving muscular fitness, methods of assessment, types of muscular contractions, muscle strength vs. muscle endurance, proper biomechanics and the NASM guidelines for improving muscular strength & endurance.

FHT121 Balance and Flexibility

Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1

This course will cover various aspects of balance and flexibility training. Topics include: NASM guidelines for improving flexibility, methods of assessment, importance of balance and flexibility, current trends, and various modalities for improving balance and flexibility including "functional exercise" and "core stability".

FHT115 Physical Fitness Assessments

Lecture Hrs: 5 Lab Hrs: 15 Credit Hrs: 1

This course will include a comprehensive basis for fitness testing procedures. Topics include purpose, risks, safety, test order, test termination, interpretation of results, assessments for: body composition, cardiorespiratory fitness, muscular fitness, flexibility, postural analysis, and assessing fitness in children and older adults. Students will perform each test on themselves or their peers during lab time.

FHT116 Corrective Exercise Program Design

Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1

This course will introduce corrective exercise strategies based on loss of function. The student will receive detailed insight into the prevention of injuries, assessment of dynamic dysfunctions, and an overview of program design for corrective exercise. The systematic approach of an integrated corrective exercise design uniquely blends the variables of available flexibility, isolated and integrated corrective strengthening, and corrective exercise design to allow the student the necessary foundation in developing safe corrective exercise programs.

Prerequisites: FHT115

FHT135 Special Populations

Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1

This course includes comprehensive study of special populations and the importance of exercise modifications during exercise training. Diabetes, hypertension, heart disease, obesity, children, pregnancy, elderly, osteoporosis and other conditions will be discussed.

FHT145 Weight Management Strategies

Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1

Course will include information on nutrition as it relates to weight management. Topics include energy intake recommendations, weight reduction, weight gain, food guide pyramid, macronutrients and kilocalories. Students will learn what information is appropriate to give a client. Scope of practice for a personal trainer as it relates to nutrition will be discussed. The NASM position stand on Obesity and Weight Management will be covered. Upon successful completion of Weight Management Strategies, Nutrition and Sports Nutrition classes student is eligible to test for the National Academy of Sports Medicine (NASM) Fitness Nutrition Specialization Certificate.

FHT152 Nutrition

Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1

This course will continue with the topic of nutrition and focus more nutritional balance for achieving wellness and preventing disease. Students will learn more about macronutrients, kilocalories, vitamins, and minerals. Functions, RDA, food sources, over-consumption and deficiencies of vitamins will be covered in detail. The NCEP Guidelines will also be discussed. Upon successful completion of Weight Management Strategies, Nutrition and Sports Nutrition classes student is eligible to test for the National Academy of Sports Medicine (NASM) Fitness Nutrition Specialization Certificate.

FHT147 Program Design**Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1**

This program will equip the student with the tools to design individual exercise programs specifically for improvement of health and wellness. Topics include: FITT principle, NASM/CDC recommendations, recommended energy expenditure, dose-response relationship, components of a comprehensive exercise program and exercise prescription. Methods of program design for hypo kinetic disease prevention, cardiovascular endurance, flexibility and muscular fitness will be discussed in detail as it related to health improvement.

FHT140 Exercise Psychology & Counseling**Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1**

This course provides a broad foundation of exercise psychology and how to intertwine in the personal trainer's scope of practice. Psychological theories used in the health/fitness setting and effective counseling methods will be discussed.

FHT153 Marketing and Sales**Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1**

Students will study networking and their effects on successful business management. As students study the importance of identifying a niche market and the positive effects of focusing marketing efforts on that group, student will also identify the most beneficial and cost-efficient methods of marketing. Students will also learn the resources available locally to individuals in business. Students will develop a marketing plan and include the development of a business flyer or business card as a part of successful course completion.

AH115 Medical Emergencies and CPR**Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1**

In this course the student will learn basic first aid and CPR training. The student will be instructed on the skills needed to recognize and respond to various life-threatening situations for victims of all ages. Emergencies such as respiratory arrest, cardiac arrest, and foreign-body airway obstruction will be addressed. With successful completion of this CPR program the student will receive a two-year certification in Basic Life Support (BLS) for the Healthcare Provider. The fundamentals of first aid will also be covered.

FHT143 Sports Training**Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1**

This course will focus primarily on modalities that facilitate sport specific goals. Students will learn how to research, design and implement sport specific training methods. Activities will include a variety of sport specific training techniques used in the athletics and sports.

FHTEXT221 Externship**Clock Hrs: 200 Credit Hrs: 4**

The externship is undertaken as practical experience to follow the skills taught in the classroom and labs and consists of 200 hours. Students can begin accumulating up to 20 hours for the externship after passing the required skill sets as outlined by the course curriculum. Students may locate their own externship site for consideration or may use sites previously established with the College. This externship is unpaid and the hours of attendance are determined by the externship site. Students are required to attend at least 20 hours per week while fulfilling externship requirements.

FITNESS AND HEALTH TRAINER - DIPLOMA (Hybrid)

Objective

This program covers the essential components of fitness and health necessary to produce qualified fitness professionals. The objective of the program is to prepare students academically and professionally for entry-level positions in health promotion and fitness. This career field continues to grow as our nation becomes increasingly concerned with health and wellness. Graduates will be prepared to work in a wide variety of facilities as fitness instructors or personal trainers. Successful program graduates are eligible for the National Academy of Sports Medicine NASM - Certified Personal Trainer and NASM – Fitness Nutrition Specialization (FNS). Additionally, graduates will be academically prepared to start their own fitness businesses using advanced leadership and administrative skills.

Classroom Procedures

Most courses stand alone as a unit of study and are not dependent upon prerequisite training; however, the following courses require prerequisites: Physical Fitness Assessments (FHT115) before Corrective Exercise Program Design (FHT116). A student may enter the program at the beginning of any course and continue through the sequence until completion of all courses. Career and Life Development (AH106) is required for students and is taken online. All other courses will meet 5 hours per week on campus and the remaining hours will be completed online.

Externship

The externship is undertaken following the successful completing of all classroom training and consists of 200 hours. Students may locate their own externship site for consideration or may use sites previously established with the College. This externship is unpaid and the hours of attendance are determined by the externship site. Students are required to attend at least 20 hours per week while fulfilling externship requirements. Students can begin accumulating up to 20 hours for the externship after passing the required skill sets as outlined by the course curriculum.

Students can begin accumulating up to 20 hours for the externship after passing the required skill sets as outlined by the course curriculum.

ASSOCIATE OF OCCUPATIONAL SCIENCE HEALTH CARE ADMINISTRATION (DE)

Objective

The Associate of Occupational Science in Health Care Administration program provides online instruction in basic healthcare administration competencies using a progressive Learning Management System. The objective of the program is to prepare students academically and professionally for entry-level employment positions as medical office managers, assistant managers to physician offices, supervisors in a variety of healthcare settings such as assisted living residences, nursing homes, hospitals, dental facilities, or occupational health practices, to name just a few. Additionally, degree graduates will become knowledgeable in applicable leadership practices.

Students will become proficient in the use of computer software applications necessary to succeed in a management environment including electronic medical records. This program equips the graduate with the skills and knowledge necessary to meet the requirements of an entry-level administration position. The Associate of Occupational Science degree is designed to provide a foundation that will enable degree holders to seek and apply for management roles in their healthcare specialties. The Associate of Occupational Science Degree (AOS) is designed for students, desiring to develop applicable job-related skills, who plan to go straight into the work force. This degree requires fewer general education credits than an Associate of Science Degree. The transferability of AOS credits is possible, but not guaranteed.

Classroom Procedures

Each course stands alone as a unit of study and is not dependent upon prerequisite training. Career and Life Development (AH101) is required for students and is taken online. A student may enter the program at the beginning of any course and continue through the sequence until completion of all courses.

ASSOCIATE OF OCCUPATIONAL SCIENCE HEALTH CARE ADMINISTRATION (DE)

AH101 Career and Life Development Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
AH1323 Medical Terminology This is designed to help the student understand the knowledge of the different terms used in medical facilities as they relate to medical conditions, medical procedures, medical coding and billing.	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
BIO1311 Anatomy & Physiology This course will focus on the various components, structure and molecular form of a normal and abnormal cell. Other topics include male and female reproductive systems, impaired movement that results from nervous, spinal, muscle or neuromuscular disorders, epilepsy, and traumatic injury.	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
MBC1130 Medical Insurance This course will provide the student with knowledge of medical insurance applications. The information provided will help the student understand the essentials of insurance, the role of a medical insurance billing specialist and the laws and ethical guidelines of the field. The course will cover medical documents, coding diagnoses, procedures claim process, charges, methods of payments, billing and reimbursements. Other topics include private payers, Medicaid, Medicare and all other major insurance carriers.	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
HCA1124 Intro to Diagnostic Coding This course is an introduction to ICD-10 coding. Instruction is given to students to clearly illustrate key areas from the basics of coding. Students are taught to understand the basic steps and rules to follow for the coding of diagnoses as well as identify the basic characteristics, conventions, symbols, and principles of diagnostic coding.	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
HCA1126 Intro to Procedure Coding This is a beginning level course in CPT, a clinical coding system used to code and bill procedures and services provided by outpatient facilities, physicians and other health care professionals. The structure, format, and usage of CPT, as well as its guidelines and common problems, are covered.	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
HCA1130 Medical Legal Compliance This course is an introduction to the concepts of medical law and ethics for healthcare administrators. Topics include criminal and civil acts, negligence, and ethical concepts as they relate to the medical profession. Patient education such as living wills, Patient Bill of Rights, and community services are also covered.	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
HCA1132 Medical Records Administration In this course, students will learn how to create and maintain medical records and the importance of preserving patient confidentiality. Topics covered include paper charts, release of information, and electronic medical records (EMR).	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
HCA1119 Medical Office Administration This course prepares students to perform general front office procedures in a medical context. Topics include opening and closing procedures, patient appointment scheduling, telephone etiquette, and performing financial procedures.	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
MBC1242 Medical Front Office and Billing This course will provide the student information on the skills that are used in the medical front office and medical billing. Information about Electronic Health Records and MediSoft software applications will be covered.	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
HCA1134 Health Care Management This course introduces students to the office manager's functions in the medical context. Topics include Human Resources, finding the right employee, training, marketing a practice, and leadership. Students will also cover topics such as career development and resume building.	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
BUS2313 Business Law Business Law teaches students about contracts, criminal law, sales laws, property laws. The legal environment of business will also be discussed.	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
MKT2423 Introduction to Marketing Introduction to Marketing will provide the student with the knowledge to build customer relationships through effective marketing, to create and price products that will satisfy the customer and to develop integrated marketing communications.	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
ACC2213 Accounting Principles Accounting Principles is designed to give the student a full understanding of the accounting cycle and how to record financial data.	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
MGT2123 Leadership Development This course is designed to provide future and existing leaders the opportunity to explore the concept of leadership and to develop and improve their leadership skills. In this course a variety leadership roles expected of team members with practical suggestions for improved leadership skills will be discussed. Additionally, sources of power and influence, delegation, group processes, conflict resolution, and group decision-making techniques will be discussed.	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

MGT1373 Human Resources**Lecture Hrs: 45****Lab Hrs: 0****Credit Hrs: 3**

The study of Human Resources will familiarize students with the legal and regulatory environment that pertains to the business world. Hiring, training and development, performance appraisals and compensation will all be discussed.

MGT2213 Principles of Management**Lecture Hrs: 45****Lab Hrs: 0****Credit Hrs: 3**

Principles of Management teach the foundations of management: planning organizing, execution of objectives and the dynamics and impact of leadership.

ENG2343 Business Communications**Lecture Hrs: 45****Lab Hrs: 0****Credit Hrs: 3**

Business Communications teaches the principles of professional communications. Students will learn to use communication technologies for personal branding. The course also emphasizes effective speaking and listening skills.

BUS2213 Principles of Business**Lecture Hrs: 45****Lab Hrs: 0****Credit Hrs: 3**

Principles of Business will teach students the basis for business operations and professionalism with an emphasis on entrepreneurship and the risks and rewards of starting their own business or improving business processes in an existing business. Working in groups and making effective presentations will also be explored.

BUS1353 Business Math**Lecture Hrs: 45****Lab Hrs: 0****Credit Hrs: 3**

Business Mathematics students will receive a rapid review of basic mathematics (i.e., addition, subtraction, multiplication, division, fractions, percentages, and algebraic equations) with a view toward improving speed and accuracy. The Business Math course is designed to provide students with practical learning in key areas of business math applications. These skills include figuring percentages, discounts, taxes, payroll, interest, and other math concepts.

GEN1113 Critical Thinking and Problem Solving**Lecture Hrs: 45****Lab Hrs: 0****Credit Hrs: 3**

The Critical Thinking and Problem Solving course teaches basic principles and techniques in these important skills. This course provides instruction in an overview of critical thinking to include argument, rhetoric as a persuasion tool, fallacies, and types of reasoning. This course will specifically focus on using these critical thinking skills in writing, assessing credibility issues, and forming opinions. Additionally, it addresses problem-solving skills based on using critical thinking.

MEDICAL ASSISTANT - DIPLOMA (Resident)

Objective

The Medical Assistant is an individual trained to assist physicians in the examination and treatment of patients. They assist doctors by providing routine clinical skills, obtaining patient history, assisting with patient procedures, laboratory tests, and administrative/front office procedures. Students are certified in CPR. The Medical Assistant understands the procedures, techniques, and the underlying principles of the human body, in addition to the functions of other professionals who provide health care. The graduate will be fully prepared to take the CMA and RMA and other various credentials. This program provides the background which enables a student to assume an entry-level position as a Medical Assistant. Required laboratory skills and administrative procedures are taught for use in a physician's office or clinic.

Classroom Procedures

Each course stands alone as a unit of study and is not dependent upon prerequisite training. A student may enter the program at the beginning of any course and continue through the sequence until completion of all courses. Career and Life Development (AH100) is required for any residential students and is taken Monday through Thursday from 8:00am to 1:00pm or 5:30pm to 10:30pm. Medical related courses meet 20 hours per week.

Externship

The externship is undertaken following the successful completion of all classroom training and consists of 180 hours. Students may locate their own externship site for consideration or may use sites previously established with the College. This externship is unpaid and the hours of attendance are determined by the externship site. Students are required to attend at least 20 hours per week while fulfilling externship requirements.

MEDICAL ASSISTANT - DIPLOMA (Resident)

AH100 Career and Life Development Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.	Lecture Hrs: 50	Lab Hrs: 10	Credit Hrs: 3
MA1253 Health Careers This course will introduce the professional standards that are required in medical assisting and the different specialties and allied health professionals integral to the health-care delivery team, as well as Complementary and Alternative Medicine modalities (CAM). Emphasis is placed on the success strategies of critical thinking, problem solving and self-evaluation. The use of effective verbal, nonverbal and written communication techniques and the effect of anxiety and stress on communication in patients, families and co-workers will be explored.	Lecture Hrs: 20	Lab Hrs: 0	Credit Hrs: 1
MA1255 Law and Ethics This course covers the principles and basic concepts of ethics and laws involved in providing medical services.	Lecture Hrs: 20	Lab Hrs: 0	Credit Hrs: 1
MA1251 Infection Control / Laboratory Equipment and Safety This course introduces the cycle of infection with emphasis on understanding infection and hazard control procedures necessary for the safe practice of healthcare. Blood borne Pathogens, Universal and Standard Precautions, OSHA and CDC reporting requirements will be emphasized. Laboratory equipment, correct laboratory techniques, laws regulating physician laboratories and quality assurance programs will be covered. An overview of the organization of the body, including systems, tissues and cells will be covered.	Lecture Hrs: 15	Lab Hrs: 5	Credit Hrs: 1
MA1113 Office Management This course will give the student knowledge and understanding of administrative procedures and systems.	Lecture Hrs: 15	Lab Hrs: 5	Credit Hrs: 1
MA1118 Medical History and Vital Signs This course will give the student knowledge on how to properly interview a patient, take a patient history, and properly document patient information, including EMRs/EHRs. This course will also give the student the knowledge of how to accurately perform vital signs and measurements.	Lecture Hrs: 15	Lab Hrs: 5	Credit Hrs: 1
MA1115 Medical Emergencies and CPR This course will give the student knowledge and understanding of basic first aid and CPR training. The student will be instructed on the skills needed to recognize and respond to various life-threatening situations for victims of all ages. With successful completion of the CPR program, the student will receive a two year certification in Basic Life Support (BLS) for the healthcare provider.	Lecture Hrs: 15	Lab Hrs: 5	Credit Hrs: 1
MA1240 The Nervous System This course will give the student knowledge and understanding of the discipline of neurology.	Lecture Hrs: 20	Lab Hrs: 0	Credit Hrs: 1
MA1242 The Endocrine System This course will give the student knowledge and understanding of the discipline of endocrinology.	Lecture Hrs: 20	Lab Hrs: 0	Credit Hrs: 1
MA1244 The Digestive System and Nutrition This course will give the student the knowledge and understanding of the discipline of gastroenterology. Focus will include planning and eating a health promoting diet based on the science of nutrition. Also included will be identification of patients at risk of poor nutritional status and special diet modifications.	Lecture Hrs: 20	Lab Hrs: 0	Credit Hrs: 1
MA1117 Interactions This course will give the student knowledge and understanding of administrative procedures and systems.	Lecture Hrs: 20	Lab Hrs: 0	Credit Hrs: 1
MA1248 Physical Exam Preparation This course will give the student knowledge of the management of the clinical area of a medical office. The principles of asepsis and infection control in managing inventory and supplies will be emphasized. Assisting the physician and attending to patient needs during the exam will be covered.	Lecture Hrs: 15	Lab Hrs: 5	Credit Hrs: 1
AH220 Introduction to Pharmacology This course is an introduction to pharmacology which includes terminology, drug classifications, dosages, routes, uses, side effects, contraindications, and interactions. Utilization of the PDR, drug handbooks and other drug references, including internet sites, will be emphasized. Compliance with federal, state, and local health laws and regulations will be covered.	Lecture Hrs: 20	Lab Hrs: 0	Credit Hrs: 1
MA1246 Dosage Calculations This course will introduce students to the calculations used in the medical office for dosages. This course will give the students a knowledge and understanding of the different methods of administering medications and safety precautions.	Lecture Hrs: 15	Lab Hrs: 5	Credit Hrs: 1
MA1250 The Circulatory System This course will give the student knowledge and understanding of the discipline of cardiology.	Lecture Hrs: 20	Lab Hrs: 0	Credit Hrs: 1
MA1233 Diagnostic Imaging This course is designed to familiarize the student with the many types of diagnostic tests, including patient preparation and education. Obtaining an electrocardiogram will be covered.	Lecture Hrs: 15	Lab Hrs: 5	Credit Hrs: 1

MA1252 The Respiratory System	Lecture Hrs: 15	Lab Hrs: 5	Credit Hrs: 1
This course will give the student knowledge and understanding of the discipline of pulmonology. Pulmonary function testing will be covered.			
MA1222 Medication Administration	Lecture Hrs: 10	Lab Hrs: 10	Credit Hrs: 1
This course will give the students a knowledge and understanding of the different methods of administering medications. The various injection sites and techniques will be taught.			
MA1254 Phlebotomy – Collecting	Lecture Hrs: 10	Lab Hrs: 10	Credit Hrs: 1
This course is designed to assist the student in learning the many types of phlebotomy procedures involved in collecting blood specimens.			
MA1122 Special Senses and The Integumentary System	Lecture Hrs: 20	Lab Hrs: 0	Credit Hrs: 1
This course will give the student knowledge and understanding of the disciplines of ophthalmology, otolaryngology, and dermatology.			
MA1124 The Immune System	Lecture Hrs: 20	Lab Hrs: 0	Credit Hrs: 1
This course will give the student knowledge and understanding of the disciplines of oncology and immunology.			
MA1256 Microbiology	Lecture Hrs: 10	Lab Hrs: 10	Credit Hrs: 1
This course will give the student knowledge and understanding of the role of microbiology in the clinical laboratory.			
MA1257 The Urinary System	Lecture Hrs: 15	Lab Hrs: 5	Credit Hrs: 1
This course will give the student the knowledge and understanding of the discipline of urology, with emphasis on collecting, processing and testing urine specimens			
MA1260 Phlebotomy – Processing	Lecture Hrs: 10	Lab Hrs: 10	Credit Hrs: 1
This course is designed to assist the student in learning how to process and test blood specimens.			
MA1262 The Musculoskeletal System	Lecture Hrs: 15	Lab Hrs: 5	Credit Hrs: 1
This course will give the student the knowledge and understanding of the discipline of orthopedics. Casting and cast removal will be covered.			
MA1220 Assisting with Minor Surgery	Lecture Hrs: 10	Lab Hrs: 10	Credit Hrs: 1
This course will give the student knowledge and understanding of the role of the medical assistant in minor office surgery. Learning to recognize instruments, supplies and potential complications will be emphasized.			
MA1225 Insurance	Lecture Hrs: 20	Lab Hrs: 0	Credit Hrs: 1
This course is designed to help the medical assistant learn how to perform basic administrative medical assisting functions in the area of insurance processing to include health care claims and medical coding. Patient-Centered Medical Home (PCMH) tenets will be covered.			
MA1227 Finance	Lecture Hrs: 20	Lab Hrs: 0	Credit Hrs: 1
This course is designed to help the medical assistant learn how to perform basic administrative medical assisting functions in the area of finances to include billing, collections, accounting and taxes. Basic organizational designs of the medical office will be covered.			
MA1236 The Reproductive System	Lecture Hrs: 20	Lab Hrs: 0	Credit Hrs: 1
This course will give the students an introduction into the disciplines of gynecology and obstetrics, and the male reproductive system. Sexually transmitted diseases, infertility and contraception will be covered.			
MA1259 Specialties	Lecture Hrs: 20	Lab Hrs: 0	Credit Hrs: 1
This course will give the student a better understanding of the medical assistant's role in the specialties of Geriatrics and Pediatrics, emphasizing psychological development and behavioral responses of patients across the lifespan. Common abnormal psychiatric conditions will be covered and emphasis will be given to developing an understanding of cultural competency related to health care issues.			
MA1300 Certification Review	Lecture Hrs: 20	Lab Hrs: 0	Credit Hrs: 1
This course will provide the student with an extensive review in preparation for the CMA certification exam.			
MAEXT411 Externship		Clock Hrs: 180	Credit Hrs: 4
The externship is undertaken following the successful completion of all classroom training, and consists 180 clock hours. Students will practice the skills necessary to perform the duties of a medical assistant in the administrative and clinical role. Students will also develop professional behaviors while delivering patient care. Externship sites may be chosen by the student with prior approval from the department of career services or may be performed with an established site of the College.			

MEDICAL ASSISTANT - DIPLOMA (Hybrid)

Objective

The Medical Assistant is an individual trained to assist physicians in the examination and treatment of patients. They assist doctors by providing routine clinical skills, obtaining patient history, assisting with patient procedures, laboratory tests, and administrative/front office procedures. Students are certified in CPR. The Medical Assistant understands the procedures, techniques, and the underlying principles of the human body, in addition to the functions of other professionals who provide health care. The graduate will be fully prepared to take the RMA and other various credentials. This program provides the background which enables a student to assume an entry-level position as a Medical Assistant. Required laboratory skills and administrative procedures are taught for use in a physician's office or clinic.

Classroom Procedures

Each course stands alone as a unit of study and is not dependent upon prerequisite training. Career and Life Development (AH106) is required for students and is taken online. A student may enter the program at the beginning of any course and continue through the sequence until completion of all courses. Medical related courses will meet 5 hours per week on campus and the remaining hours will be completed online.

Externship

The externship is undertaken following the successful completion of all classroom training and consists of 180 hours. Students may locate their own externship site for consideration or may use sites previously established with the College. This externship is unpaid and the hours of attendance are determined by the externship site. Students are required to attend at least 20 hours per week while fulfilling externship requirements.

The externship is undertaken following the successful completion of all classroom training, and consists 180 clock hours. Students will practice the skills necessary to perform the duties of a medical assistant in the administrative and clinical role. Students will also develop professional behaviors while delivering patient care. Externship sites may be chosen by the student with prior approval from the department of career services or may be performed with an established site of the College.			

MEDICAL BILLING AND CODING - DIPLOMA ASSOCIATE OF OCCUPATIONAL SCIENCE MEDICAL BILLING AND CODING (DE)

Objective

The purpose of the Medical Billing and Coding program is to put graduates to work in entry-level positions in healthcare administration. Medical billers submit claims to insurance companies and agencies like Medicare for reimbursement. Medical coders accurately categorize the products and services provided to patients in order to collect data and apply for reimbursement. The program prepares students to sit for certification through AAPC as Certified Professional Coders. Students also become proficient in the use of electronic medical records software. The Associate of Occupational Science degree option is designed for students who seek management roles in their healthcare specialties. The Associate of Occupational Science Degree (AOS) is designed for students, desiring to develop applicable job-related skills, who plan to go straight into the work force. This degree requires fewer general education credits than an Associate of Science Degree. The transferability of AOS credits is possible, but not guaranteed.

Classroom Procedures

Each course stands alone as a unit of study and is not dependent upon prerequisite training with the exception of MBC1233 Diagnostic Coding I must be completed before MBC1235 Diagnostic Coding II and MBC1137 CPT-Ancillary Guidelines and Application must be completed before MBC1139 CPT-Surgery Guidelines and Application. A student may enter the program at the beginning of any course and continue through the sequence until completion of all courses. Career and Life Development (AH101) is required for students and is taken online.

Other topics include male and female reproductive systems, impaired movement that results from nervous, spinal, muscle or neuromuscular disorders, epilepsy, and traumatic injury.	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
MBC1130 Medical Insurance This course will provide the student with knowledge of medical insurance applications. The information provided will help the student understand the essentials of insurance, the role of a medical insurance billing specialist and the laws and ethical guidelines of the field. The course will cover medical documents, coding diagnoses, procedures claim process, charges, methods of payments, billing and reimbursements. Other topics include private payers, Medicaid, Medicare and all other major insurance carriers.	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
MBC1233 Diagnostic Coding I Students in this course will train to translate the diagnostic statement from medical practitioners into a numeric format for accurate and consistent reporting. Students will focus on the basic coding guidelines and conventions to assure complete and accurate coding.	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
MBC1235 Diagnostic Coding II This course will provide the student with a focus on the diagnostic coding for each of the body systems through applications while adhering to the basic coding guidelines. <i>Prerequisite: MBC1233</i>	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
MBC1137 CPT – Ancillary Guidelines and Application This course is designed to give students exposure to procedural coding by translating the procedures rendered by the medical practitioner into a numeric code (CPT) to report to third-party payers. The focus of this course will be evaluation and management, radiology, pathology, medicine, and the appendices in the CPT book.	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
MBC1139 CPT – Surgery Guidelines and Application This course is designed to give students exposure to procedural coding by translating the procedures rendered by the medical practitioner into a numeric code (CPT) to report to third-party payers. The focus of this course will be the surgical section of the CPT book. <i>Prerequisite: MBC1137</i>	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
MBC1231 CPT – E/M Guidelines and Applications This course focuses on the foundations of evaluation and management documentation guidelines for physicians. Students will have the opportunity to understand the complexities of documenting any evaluation and management service correctly. Clinical examples are also provided to round out coding skills, as students learn to dissect the evaluation and management visit and all its elements.	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
MBC1242 Medical Front Office and Billing This course will provide the student information on the skills that are used in the medical front office and medical billing. Information about Electronic Health Records and MediSoft software applications will be covered.	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
MBC1144 Professional Practical Experiences This course will provide the student with knowledge on the process of adjudication, balancing medical office accounts, the importance of collection in the medical office, major types of health plans and types of information collected from patients.	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
BUS2313 Business Law Business Law teaches students about contracts, criminal law, sales laws, property laws. The legal environment of business will also be discussed.	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
MKT2423 Introduction to Marketing Introduction to Marketing will provide the student with the knowledge to build customer relationships through effective marketing, to create and price products that will satisfy the customer and to develop integrated marketing communications.	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
ACC2213 Accounting Principles Accounting Principles is designed to give the student a full understanding of the accounting cycle and how to record financial data.	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
MGT2123 Leadership Development This course is designed to provide future and existing leaders the opportunity to explore the concept of leadership and to develop and improve their leadership skills. In this course a variety leadership roles expected of team members with practical suggestions for improved leadership skills will be discussed. Additionally, sources of power and influence, delegation, group processes, conflict resolution, and group decision-making techniques will be discussed.	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

MGT1373 Human Resources**Lecture Hrs: 45****Lab Hrs: 0****Credit Hrs: 3**

The study of Human Resources will familiarize students with the legal and regulatory environment that pertains to the business world. Hiring, training and development, performance appraisals and compensation will all be discussed.

MGT2213 Principles of Management**Lecture Hrs: 45****Lab Hrs: 0****Credit Hrs: 3**

Principles of Management teach the foundations of management: planning organizing, execution of objectives and the dynamics and impact of leadership.

ENG2343 Business Communications**Lecture Hrs: 45****Lab Hrs: 0****Credit Hrs: 3**

Business Communications teaches the principles of professional communications. Students will learn to use communication technologies for personal branding. The course also emphasizes effective speaking and listening skills.

BUS2213 Principles of Business**Lecture Hrs: 45****Lab Hrs: 0****Credit Hrs: 3**

Principles of Business will teach students the basis for business operations and professionalism with an emphasis on entrepreneurship and the risks and rewards of starting their own business or improving business processes in an existing business. Working in groups and making effective presentations will also be explored.

BUS1353 Business Math**Lecture Hrs: 45****Lab Hrs: 0****Credit Hrs: 3**

Business Mathematics students will receive a rapid review of basic mathematics (i.e., addition, subtraction, multiplication, division, fractions, percentages, and algebraic equations) with a view toward improving speed and accuracy. The Business Math course is designed to provide students with practical learning in key areas of business math applications. These skills include figuring percentages, discounts, taxes, payroll, interest, and other math concepts.

GEN1113 Critical Thinking and Problem Solving**Lecture Hrs: 45****Lab Hrs: 0****Credit Hrs: 3**

The Critical Thinking and Problem Solving course teaches basic principles and techniques in these important skills. This course provides instruction in an overview of critical thinking to include argument, rhetoric as a persuasion tool, fallacies, and types of reasoning. This course will specifically focus on using these critical thinking skills in writing, assessing credibility issues, and forming opinions. Additionally, it addresses problem-solving skills based on using critical thinking.

PARALEGAL STUDIES - DIPLOMA (DE)

Objective

The online program exposes the student to the theoretical, procedural and practical aspects of the paralegal profession. The diploma is designed to provide practical and intense instruction in a variety of legal areas to develop the intellectual and occupational competencies necessary to work as an entry-level paralegal in a legal firm.

Classroom Procedures

Each course stands alone as a unit of study and is not dependent upon prerequisite training. A student may enter the program at the beginning of any course and continue through the sequence until completion of all courses. Career and Life Development (AH101) is required for students and is taken online.

Online Diploma

Total Classroom Hrs:	540
Total Program Hrs:	540
Total Weeks:	48 weeks
Total Semester Hours of Credit:	36
Clock Hrs:	Lecture/Lab
Credential Earned:	Diploma
Academic Year:	24 credits/32 weeks (Term Type B)

Course No.	Course Title	Clock Hours	Credit Hours
AH101	Career and Life Development	45/0	3
PS101	Introduction to Paralegal Studies	45/0	3
PS106	Microsoft Word 2016	45/0	3
PS108	Legal Research	45/0	3
PS110	Legal Writing	45/0	3
PS111	Criminal Law	45/0	3
PS114	Family Law	45/0	3
PS115	Contracts	45/0	3
PS119	Wills, Trusts and Estates	45/0	3
PS124	Civil Litigation: Intake and Filing	45/0	3
PS126	Civil Litigation: Discovery to Post-Trial	45/0	3
PS128	Law Office Management	45/0	3

PARALEGAL STUDIES - DIPLOMA (DE)

AH101 Career and Life Development	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.	
PS101 Introduction to Paralegal Studies	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
This course provides students with an overview of the paralegal profession including the basic skills necessary to be successful as a paralegal. It introduces the student to both employment and regulatory issues and also covers ethics in the legal profession.	
PS106 Microsoft Word 2016	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
This course introduces students to Windows 10 and Microsoft Word 2016. Students learn through project assignments. Topics include creating, formatting, and editing Word documents; creating citations; creating and formatting tables; and creating and using document templates.	
PS108 Legal Research	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
This course introduces the structure of U.S. legal systems including both federal and state governments as well as the role of administrative agencies. Students will learn to research sources of written law including statutes, cases, and agency regulations. They will report their findings in basic memorandum format.	
PS110 Legal Writing	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
This course covers common grammatical errors as well as principles of effective written communication specific to the legal field. Both objective and persuasive writing is covered. Students will learn to prepare letters, interoffice memoranda, memoranda of law, and other legal documents.	
PS111 Criminal Law	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
This course introduces the student to the foundations of criminal law and explores the criminal justice system. Constitutional framework, law enforcement practices, and the process of criminal cases are discussed.	
PS114 Family Law	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
Practical aspects such as investigation, preparation of legal documents, and court procedures are emphasized. Students will be introduced to topics such as divorce, separation, pre-nuptial agreements, alimony, adoption, child custody and support, and property settlement.	
PS115 Contracts	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
This course provides an overview of contract law, including fundamental theoretical concepts, contractual elements, standard provisions, and drafting of simple contracts.	
PS119 Wills, Trusts, and Estates	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
This course introduces the student to the fundamental principles of handling wills, trusts, and estate planning including healthcare documents. It covers the duties of administration that can be handled by a paralegal with an emphasis on document preparation and proceedings.	
PS124 Civil Litigation Intake and Filing	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
This course introduces common causes of action in civil litigation. The paralegal's role in client intake is also covered. Students will learn to create the documents necessary to file and answer civil lawsuits.	
PS126 Civil Litigation Discovery to Post-Trial	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
This course covers the preparation of legal documents relating to civil litigation including discovery, judgments, and appeals. Students are also introduced to trial preparation and procedure.	
PS128 Law Office Management	Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3
This course covers legal practice management procedures including billing, client trust accounts, and financial administration. Students will also be introduced to common litigation management and law office management software.	

SURGICAL TECHNOLOGIST - DIPLOMA (Resident)

Objective

The Surgical Technologist plays a vital role as a member of the healthcare team in the operating room. Theory and practical application in the fundamentals of anatomy and physiology of the body systems are taught. Students are introduced to the operating room environment and are CPR certified. Students engage in "hands-on" training with regard to sterile technique, surgical equipment, supplies, instruments, and case preparation. Proper surgical aseptic techniques are covered. This program equips the graduate with the skills and knowledge necessary to meet the requirements of an entry-level Surgical Technologist and the ability to assume such a position. Surgical skills as well as laboratory procedures are taught to meet the requirements of the operating room. Graduates are required to sit for the NBSTSA certification. Diploma and transcripts will be held until verification of first attempt is received.

Classroom Procedures

A student may enter the program only at scheduled start dates. Career and Life Development (AH100) is required for any residential students and is taken Monday through Thursday from 8:00am to 1:00pm or 5:30pm to 10:30pm. Courses must be taken in sequential order beginning with ST1211. Surgical related courses meet 20 hours per week. Students must earn a minimum of 70% in each individual course (the only exception to the 70% or greater rule is AH100 Career and Life Development). In addition, an overall average GPA of 2.0 or higher is required to successfully complete this program.

Externship

The externship is undertaken following the successful completion of all classroom training, and consists of 120 surgical cases and 405 clock hours. Students are required to complete 30 cases in General Surgery with 20 of those cases filled while in the First Scrub Role. Students are required to complete 90 cases in various surgical specialties with 60 of those cases filled while in the First Scrub Role and evenly distributed between a minimum of four surgical specialties. Students will practice the skills necessary to perform the duties of a surgical technologist in the scrub role, develop professional behaviors while in the operating room environment, and learn to adequately document their experiences in their clinical rotation. The externship is unpaid and the clinical training sites will be determined by the surgical technology department. Students are required to attend at least 20 hours per week while fulfilling externship requirements.

Diploma

Total Classroom Hrs:	760
Total Externship Hrs:	405
Total Program Hrs:	1165
Total Weeks:	50 Including Externship
Total Semester Hours of Credit:	46.5
Clock Hrs:	Lecture/Lab
Credential Earned:	Diploma
Academic Year:	24 credits/32 weeks (Term Type B)

SURGICAL TECHNOLOGIST - DIPLOMA (Resident)

AH100 Career and Life Development Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.	Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 3
AH1320 Medical Terminology – Etymology This course introduces elements of medical terminology, such as the etymology of words used to describe the human body. Students learn to apply proper terminology and spelling for major pathological conditions. Study of the formation of medical terms from their Greek and Latin roots is designed both to build vocabulary and to teach the use of medical dictionary is also studied.	Lecture Hrs: 20 Lab Hrs: 0 Credit Hrs: 1
AH1325 Medical Terminology – Vocabulary This course identifies and explains the medical vocabulary and the terms that relate to the anatomy physiology, pathological conditions, and treatment of selected systems. It compares and contrasts the different body systems. Students define and describe the function of each system of the body. Upon completion of this course, students should be able to pronounce, spell, and define medical terms as related to selected body systems and their pathological disorders.	Lecture Hrs: 20 Lab Hrs: 0 Credit Hrs: 1
BIO1389 Nutrition The student will learn the structures and functions of the digestive system as well as tools for nutritional health. Related pathologies and tests are also discussed.	Lecture Hrs: 20 Lab Hrs: 0 Credit Hrs: 1
BIO1310 Anatomy & Physiology – Organization This course will give students knowledge of the nervous system, the senses and the endocrine system. Related pathologies and tests are also discussed.	Lecture Hrs: 20 Lab Hrs: 0 Credit Hrs: 1
BIO1312 Anatomy & Physiology – Transport This course will give students knowledge of the cardiovascular system, lymphatic and immune system as well as the respiratory system. Related pathologies and tests are also discussed.	Lecture Hrs: 20 Lab Hrs: 0 Credit Hrs: 1
BIO1314 Anatomy & Physiology - Life Cycle This course will give students knowledge of the urinary system and the male and female reproductive systems. Related pathologies and tests are also discussed.	Lecture Hrs: 20 Lab Hrs: 0 Credit Hrs: 1
BIO1316 Anatomy & Physiology This course is a study in human anatomy and physiology. This course will focus on an in-depth study of the human muscular system and skeletal system as well as the integumentary system.	Lecture Hrs: 20 Lab Hrs: 0 Credit Hrs: 1
AH115 Medical Emergencies and CPR In this course the student will learn basic first aid and CPR training. The student will be instructed on the skills needed to recognize and respond to various life-threatening situations for victims of all ages. Emergencies such as respiratory arrest, cardiac arrest, and foreign-body airway obstruction will be addressed. With successful completion of this CPR program the student will receive a two-year certification in Basic Life Support (BLS) for the Healthcare Provider. Disaster preparedness and environmental hazards will also be covered.	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
AH226 Introduction to Pharmacology This course will give the students a basic understanding of pharmacology, including routes of administration, terminology and abbreviations. Laboratory tests and imaging techniques are also discussed.	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
ST1211 Introduction to Surgical Technology This course will provide the student with an understanding of the background of surgical technology and personal attributes necessary to performing the role of the surgical technologist. An introduction to the hospital environment, communication, teamwork and associated professional organizations are also discussed. Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
ST1213 Law and Ethics This course will provide the student with the concept of death and dying as related to the surgical patient. Professional liability, medical practice acts, informed consent, HIPAA and negligence are also discussed. Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226, ST1211	Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1
ST1215 Microbiology and Sterilization This course will provide the student with the process of infection and microbes as it relates to the surgical patient. This course also covers the sterilization process necessary for proper patient care. Classification of patient care items, sterilization principles and processes. Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226, ST1211, ST1213	Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1
ST1217 Aseptic Technique This course will introduce the student to preoperative case management. This includes patient transportation, skin preparation, the surgical scrub and sterile setup. Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226, ST1211, ST1213, ST1215	Lecture Hrs: 10 Lab Hrs: 10 Credit Hours: 1

- ST 1218 Care of the Surgical Patient** **Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1**
 This course will introduce the student to intraoperative case management. This includes passing instruments, handling of medication and specimens and the process of removing gown and gloves and the breakdown of the sterile field after the conclusion of the procedure.
Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226, ST1211, ST1213, ST1215, ST1217
- ST1220 Surgical Pharmacology** **Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1**
 This course familiarizes the student with the various drugs used in surgery and the mode of administration. The student should also attain an understanding of basic anesthesia equipment, drugs, and methods. Units of measurement, dosage calculations, drug labels and parts of the syringe are also covered.
Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226, ST1211, ST1213, ST1215, ST1217, ST1218
- ST1222 Surgical Case Management** **Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1**
 This course provides the student an understanding of the risks associated with surgery for both the surgical patient as well as the health care provider and the precautions that must be used in providing care. Students will learn surgical case planning and intraoperative routines.
Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226, ST1211, ST1213, ST1215, ST1217, ST1218, ST1220
- ST1224 The Surgical Wound** **Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1**
 This course will provide the student with the knowledge to identify surgical methods of hemostasis, structure and properties of suture, closure types, safety precautions, and various types of wound drainage systems, application of the surgical dressing, the healing process and possible wound complications.
Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226, ST1211, ST1213, ST1215, ST1217, ST1218, ST1220, ST1222
- ST1226 Instrumentation** **Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1**
 This course will provide the student with the knowledge to identify the parts of a surgical instrument, classification of basic surgical instruments, care and handling, and passing techniques necessary to function in the surgical technologist role. Students will also develop a basic understanding of surgical equipment and supplies.
Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226, ST1211, ST1213, ST1215, ST1217, ST1218, ST1220, ST1222, ST1224
- ST1228 Diagnostic & Minimally Invasive Procedures** **Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1**
 In this course students will learn energy sources used in the operating room including how they assist in the diagnosis and assessment procedures performed, providing clues and information about the nature of the patient's illness and possible causes of disease. This course will focus on the advantages and constraints of endoscopic and minimally invasive surgery and includes an overview of robotic system's role in the surgical environment.
Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226, ST1211, ST1213, ST1215, ST1217, ST1218, ST1220, ST1222, ST1224, ST1226
- ST1230 General Surgery** **Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1**
 Introduction to operative routine for general surgical procedures includes the study of special instruments and equipment necessary to provide optimum intraoperative care. Also provided is a basic understanding of the diagnosis, surgical intervention, postoperative patient care considerations, prognosis, common complications, operative pathology and relevant anatomy.
Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226, ST1211, ST1213, ST1215, ST1217, ST1218, ST1220, ST1222, ST1224, ST1226, ST1228, ST1230
- ST1232 OB/GYN Surgery** **Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1**
 Introduction to operative routine for OB/GYN surgical procedures includes the study of special instruments and equipment necessary to provide optimum intraoperative care. Also provided is a basic understanding of the diagnosis, surgical intervention, postoperative patient care considerations, prognosis, common complications, operative pathology and relevant anatomy.
Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226, ST1211, ST1213, ST1215, ST1217, ST1218, ST1220, ST1222, ST1224, ST1226, ST1228, ST1230
- ST1234 Genitourinary Surgery** **Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1**
 Introduction to operative routine for genitourinary surgical procedures includes the study of special instruments and equipment necessary to provide optimum intraoperative care. Also provided is a basic understanding of the diagnosis, surgical intervention, postoperative patient care considerations, prognosis, common complications, operative pathology and relevant anatomy.
Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226, ST1211, ST1213, ST1215, ST1217, ST1218, ST1220, ST1222, ST1224, ST1226, ST1228, ST1230, ST1232
- ST1236 Ophthalmic Surgery** **Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1**
 Introduction to operative routine for ophthalmic surgical procedures includes the study of special instruments and equipment necessary to provide optimum intraoperative care. Also provided is a basic understanding of the diagnosis, surgical intervention, postoperative patient care considerations, prognosis, common complications, operative pathology and relevant anatomy.
Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226, ST1211, ST1213, ST1215, ST1217, ST1218, ST1220, ST1222, ST1224, ST1226, ST1228, ST1230, ST1232, ST1234
- ST1238 ENT Surgery** **Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1**
 Introduction to operative routine for ENT surgical procedures includes the study of special instruments and equipment necessary to provide optimum intraoperative care. Also provided is a basic understanding of the diagnosis, surgical intervention, postoperative patient care considerations, prognosis, common complications, operative pathology and relevant anatomy.
Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226, ST1211, ST1213, ST1215, ST1217, ST1218, ST1220, ST1222, ST1224, ST1226, ST1228, ST1230, ST1232, ST1234, ST1236

- ST1240 Oral & Maxillofacial Surgery** **Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1**
 Introduction to operative routine for oral and maxillofacial surgical procedures includes the study of special instruments and equipment necessary to provide optimum intraoperative care. Also provided is a basic understanding of the diagnosis, surgical intervention, postoperative patient care considerations, prognosis, common complications, operative pathology and relevant anatomy.
Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226, ST1211, ST1213, ST1215, ST1217, ST1218, ST1220, ST1222, ST1224, ST1226, ST1228, ST1230, ST1232, ST1234, ST1236, ST1238
- ST1242 Plastic & Reconstructive Surgery** **Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1**
 Introduction to operative routine for plastic surgical procedures includes the study of special instruments and equipment necessary to provide optimum intraoperative care. Also provided is a basic understanding of the diagnosis, surgical intervention, postoperative patient care considerations, prognosis, common complications, operative pathology and relevant anatomy.
Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226, ST1211, ST1213, ST1215, ST1217, ST1218, ST1220, ST1222, ST1224, ST1226, ST1228, ST1230, ST1232, ST1234, ST1236, ST1238, ST1240
- ST1244 Orthopedic Surgery** **Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1**
 Introduction to operative routine for orthopedic surgical procedures includes the study of special instruments and equipment necessary to provide optimum intraoperative care. Also provided is a basic understanding of the diagnosis, surgical intervention, postoperative patient care considerations, prognosis, common complications, operative pathology and relevant anatomy.
Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226, ST1211, ST1213, ST1215, ST1217, ST1218, ST1220, ST1222, ST1224, ST1226, ST1228, ST1230, ST1232, ST1234, ST1236, ST1238, ST1240, ST1242
- ST1246 Peripheral Vascular Surgery** **Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1**
 Introduction to operative routine for peripheral vascular surgical procedures includes the study of special instruments and equipment necessary to provide optimum intraoperative care. Also provided is a basic understanding of the diagnosis, surgical intervention, postoperative patient care considerations, prognosis, common complications, operative pathology and relevant anatomy.
Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226, ST1211, ST1213, ST1215, ST1217, ST1218, ST1220, ST1222, ST1224, ST1226, ST1228, ST1230, ST1232, ST1234, ST1236, ST1238, ST1240, ST1242, ST1244
- ST1248 Thoracic & Pulmonary Surgery** **Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1**
 Introduction to operative routine for thoracic surgical procedures includes the study of special instruments and equipment necessary to provide optimum intraoperative care. Also provided is a basic understanding of the diagnosis, surgical intervention, postoperative patient care considerations, prognosis, common complications, operative pathology and relevant anatomy.
Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226, ST1211, ST1213, ST1215, ST1217, ST1218, ST1220, ST1222, ST1224, ST1226, ST1228, ST1230, ST1232, ST1234, ST1236, ST1238, ST1240, ST1242, ST1244, ST1246
- ST1250 Cardiac Surgery** **Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1**
 Introduction to operative routine for cardiovascular surgical procedures includes the study of special instruments and equipment necessary to provide optimum intraoperative care. Also provided is a basic understanding of the diagnosis, surgical intervention, postoperative patient care considerations, prognosis, common complications, operative pathology and relevant anatomy.
Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226, ST1211, ST1213, ST1215, ST1217, ST1218, ST1220, ST1222, ST1224, ST1226, ST1228, ST1230, ST1232, ST1234, ST1236, ST1238, ST1240, ST1242, ST1244, ST1246, ST1248
- ST1253 Special Populations** **Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1**
 This course provides an introduction to operative routine for special population procedures including the study of special instruments and equipment necessary to provide optimum intraoperative care. Also provided is a basic understanding of the diagnosis, surgical intervention, postoperative patient care considerations, prognosis, common complications, operative pathology and relevant anatomy.
Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226, ST1211, ST1213, ST1215, ST1217, ST1218, ST1220, ST1222, ST1224, ST1226, ST1228, ST1230, ST1232, ST1234, ST1236, ST1238, ST1240, ST1242, ST1244, ST1246, ST1248, ST1250
- ST1254 Neurosurgery** **Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1**
 Introduction to operative routine for neuro surgical procedures includes the study of special instruments and equipment necessary to provide optimum intraoperative care. Also provided is a basic understanding of the diagnosis, surgical intervention, postoperative patient care considerations, prognosis, common complications, operative pathology and relevant anatomy.
Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226, ST1211, ST1213, ST1215, ST1217, ST1218, ST1220, ST1222, ST1224, ST1226, ST1228, ST1230, ST1232, ST1234, ST1236, ST1238, ST1240, ST1242, ST1244, ST1246, ST1248, ST1250, ST1253
- ST1257 Mock Certification 1** **Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1**
 In this course the student will be assessed by taking various mock competency assessments. Areas of weakness will be identified, addressed and preparation for externship will occur.
Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226, ST1211, ST1213, ST1215, ST1217, ST1218, ST1220, ST1222, ST1224, ST1226, ST1228, ST1230, ST1232, ST1234, ST1236, ST1238, ST1240, ST1242, ST1244, ST1246, ST1248, ST1250, ST1253, ST1254
- ST1259 Mock Certification 2** **Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1**
 In this course the student will be assessed by taking various mock competency assessments. Areas of weakness will be identified, addressed and preparation for externship will occur.
Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226, ST1211, ST1213, ST1215, ST1217, ST1218, ST1220, ST1222, ST1224, ST1226, ST1228, ST1230, ST1232, ST1234, ST1236, ST1238, ST1240, ST1242, ST1244, ST1246, ST1248, ST1250, ST1253, ST1254, ST1257

ST1261 Competency Assessment**Lecture Hrs: 0****Lab Hrs: 20****Credit Hrs: 0.5**

This course will provide the student with an extensive review in preparation for the surgical technologist program final exam.

Prerequisites: AH100, AH1320, AH1325, BIO1389, BIO1310, BIO1312, BIO1314, BIO1316, AH115, AH226, ST1211, ST1213, ST1215, ST1217, ST1218, ST1220, ST1222, ST1224, ST1226, ST1228, ST1230, ST1232, ST1234, ST1236, ST1238, ST1240, ST1242, ST1244, ST1246, ST1248, ST1250, ST1253, ST1254, ST1257, ST1259

STEXT515 Externship**Clock Hrs: 135****Credit Hrs: 3**

The externship is undertaken following the successful completion of all classroom training. Students will practice the skills necessary to perform the duties of a surgical technologist is the scrub role, develop professional behaviors while in the operating room environment, and learn to adequately document their experiences in their clinical rotation.

STEXT517 Externship**Clock Hrs: 135****Credit Hrs: 3**

The externship is undertaken following the successful completion of all classroom training. Students will practice the skills necessary to perform the duties of a surgical technologist is the scrub role, develop professional behaviors while in the operating room environment, and learn to adequately document their experiences in their clinical rotation.

STEXT519 Externship**Clock Hrs: 135****Credit Hrs: 3**

The externship is undertaken following the successful completion of all classroom training. Students will practice the skills necessary to perform the duties of a surgical technologist is the scrub role, develop professional behaviors while in the operating room environment, and learn to adequately document their experiences in their clinical rotation.

VETERINARY ASSISTANT - DIPLOMA (Resident)

Objective

The Veterinary Assistant program is designed to prepare the student with the basic knowledge and training necessary to function as an entry-level employee in a veterinary setting. The program is carefully balanced between theory and practical instruction, including clinical and administrative training. Veterinary Assistants work in all phases of animal care, including surgical nursing, laboratory procedures, and office administration. Employment opportunities include positions in veterinary offices or hospitals, zoological facilities, retail pet supply companies and the pet care industries.

Classroom Procedures

Each course stands alone as a unit of study and is not dependent upon prerequisite training except for Anatomy & Physiology I (VA 1121) before Anatomy & Physiology II (VA 1122) and Client and Patient Relations (VA 1124) before Grief Counseling/Euthanasia (VA 1127). Career and Life Development (AH100) is required for any residential students and is taken Monday through Thursday from 8:00am to 1:00pm or 5:30pm to 10:30pm. A student may enter the program at the beginning of any course and continue through the sequence until completion of all courses, but must begin with VA 1112. Veterinary related courses meet 20 hours per week.

Externship

The externship is undertaken following the successful completion of all classroom training and consists of 180 hours. Students may locate their own externship site for consideration or may use sites previously established with the College. This externship is unpaid and the hours of attendance are determined by the externship site. Students are required to attend at least 20 hours per week while fulfilling externship requirements.

Diploma

Total Classroom Hrs:	540
Total Externship Hrs:	180
Total Program Hrs:	720
Total Weeks:	32 Including Externship
Total Semester Hours of Credit:	31
Clock Hrs:	Lecture/Lab
Credential Earned:	Diploma
Academic Year:	24 credits/32 weeks (Term Type B)

* Course requires a prerequisite prior to taking course.

VETERINARY ASSISTANT - DIPLOMA (Resident)

AH100 Career and Life Development	Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 3
Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.	
VA1112 Veterinary Terminology	Lecture Hrs: 20 Lab Hrs: 0 Credit Hrs: 1
This course will provide the student with the knowledge base of how medical words are formed. The student will learn how to use medical terminology appropriately for effective communication in the veterinary hospital.	
VA1114 Behavior, Restraint, and Handling	Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1
This course will provide the student with an understanding of behaviors of multiple animal species as they relate to veterinary medicine. The student will learn how to field the common client questions about problem behaviors. The student will learn how to use behavior patterns to handle and restrain the animal patient. Emphasis of restraint will be on the safety and injury prevention of the patient, client, and veterinary staff. Both large and small animal restraint and handling will be discussed.	
VA1116 Dentistry	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
This course will introduce the student to the field of veterinary dentistry. The student will learn about dental health assessment, dental prophylaxis, equipment care, and use of dental instruments. There will also be discussion related to species specific dentition and its relationship to the patient's diet and dental health care concerns.	
VA1118 Animal Nutrition	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
This course will provide the student an understanding of the diverse nutritional demands of the animal patient. Various species of animals will be discussed and the differences in their nutritional requirements will be identified. The student will also learn about the feeding methods, how to interpret label claims, and prescription diets available when medically indicated for ill animal patients.	
VA1121 Anatomy & Physiology I	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
This course will introduce the student to directional terminology, basic structure of cells, tissues, and organ systems found in the animal patient. The skeletal and muscular structures of various animal species will also be introduced. Basic necropsy techniques will be discussed.	
VA1122 Anatomy & Physiology II	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
This course will cover internal organs systems found in the various animal species. The student will gain an understanding as to how the organ systems function within the animal patient. Abnormalities within organ systems will be addressed as they relate to common disease processes seen in the animal patient. Prerequisite: VA1121	
VA1124 Client Relations and Patient Assessment	Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1
This course will provide the student with an understanding of medical record keeping, hospital software systems, and client /patient healthcare. This course will also emphasize the importance of obtaining an accurate history through physical exam and client interview. The student will learn how to communicate effectively with client in order to obtain the necessary medical history for proper treatment of the animal patient.	
VA1127 Grief Counseling/Euthanasia	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
This course will provide the student with the skills needed to assist clients with geriatric care, grief counseling, and pet loss. The student will receive instruction on how to support the client, patient and Veterinarian during this procedure. Students will be introduced to techniques to help manage stressors in the profession. The students will be introduced to the various methods of euthanasia and remains handling available in our community. Prerequisite: VA1124	
VA1128 Emergency Care/Management of Injuries	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
This course will introduce the student to emergency animal medicine. The student will learn the process of wound healing and wound management along with appropriate bandaging techniques. Emergency triage skills, patient assessments, interventions, and treatments will be addressed with an emphasis on first aid and CPR.	
VA1131 Veterinary Dosages and Calculations	Lecture Hrs: 5 Lab Hrs: 15 Credit Hrs: 1
This course will provide an introduction to fluid rate calculations and weight based dosages. Students will be introduced to the different dosages required based upon medication formulation.	
VA1132 Parasitology	Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1
This course will provide the student with an introduction to various endoparasites and ectoparasites found within the animal patient. The common signs of infestation and indications for testing will also be discussed. The student will learn various collection techniques and testing methods used in the identification of these parasites.	
VA1133 Veterinary Pharmacology	Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1
This course will introduce the student to the pharmacological aspects of veterinary medicine. Students will be introduced to medical abbreviations. Students will be instructed on how to translate these abbreviations for client understanding of prescription labels. Classification and record keeping of controlled drugs will be discussed. Routes of administration, labeling of dispensed drugs, client education and inventory control will also be discussed and demonstrated.	

VA1134 Urinalysis and Hematology	Lecture Hrs: 10	Lab Hrs: 10	Credit Hrs: 1
This course will provide the student with the knowledge and skills necessary for assisting with urine and blood collection on the various species of animals. Testing methods used in an animal hospital for both urine and blood will also be demonstrated.			
VA1137 Cytology and Virology	Lecture Hrs: 15	Lab Hrs: 5	Credit Hrs: 1
This course will teach the student how cells are collected and studied for the purpose of clinical diagnosis. The student will also gain an understanding of viruses and the various vaccinations available in veterinary medicine to protect against these viruses.			
VA1139 Clinical Microbiology	Lecture Hrs: 10	Lab Hrs: 10	Credit Hrs: 1
This course will teach the student general principles of microbiology. The student will learn how microbiology is used daily in veterinary medicine and techniques in handling samples properly. There will also be discussion as to how microbiology applies to the animal patient and animal clinic. Students will be introduced to methods of slide preparation by way of heat fixation and staining techniques. The microscopic identification of microbial populations will also be introduced.			
VA1140 Zoonoses	Lecture Hrs: 15	Lab Hrs: 5	Credit Hrs: 1
This course will teach the student about common zoonotic diseases and their effects on public health. The student will learn the signs and symptoms as well as the treatment and prevention of zoonotic disease. The focus will be on occupational exposure potentials for the veterinary hospital staff.			
VA1141 Occupational Hazards	Lecture Hrs: 15	Lab Hrs: 5	Credit Hrs: 1
This course will provide the student with an understanding of occupational health and safety issues as they relate to the veterinary field. The student will be introduced to reading and using SDS sheets as well as various regulating bodies that set and enforce standards to ensure safe practice within veterinary medicine. The student will be introduced to work place hazards and their effect on cellular DNA and the mechanisms that promote the development of cancer.			
VA1145 Radiography and Ultrasonography	Lecture Hrs: 15	Lab Hrs: 5	Credit Hrs: 1
This course will teach the student the basic principles of radiography and ultrasonography and the indications for using these diagnostic tools. Patient positioning and radiographic techniques for the production of quality diagnostic images will be taught. Radiation safety techniques and protective equipment for the assistant will be discussed. Student will learn the basic understanding of how to interpret radiographs to be able to modify technique.			
VA1146 Principles of Anesthesia and Analgesia	Lecture Hrs: 15	Lab Hrs: 5	Credit Hrs: 1
This course will introduce the different types of medications used to induce and maintain anesthesia. The parts and functions of the anesthetic machine will be introduced and discussed. Anesthetic monitoring and emergencies as it relates to the patient will be discussed. Pain management for the post-operative, injured, or sick animal patient will also be addressed.			
VA1149 Surgical Preparation/Instrument Care	Lecture Hrs: 10	Lab Hrs: 10	Credit Hrs: 1
This course will introduce the student to surgical preparation of the animal patient and the steps taken to prepare for a surgical procedure. The student will be introduced to the most frequently used instruments used in surgical procedures. The student will learn the skills necessary to demonstrate aseptic technique and maintaining sterile field. The preparation of surgical packs with autoclaving techniques will be demonstrated.			
VA1151 Ruminant and Pig Nursing	Lecture Hrs: 15	Lab Hrs: 5	Credit Hrs: 1
This course will provide the student with an introduction to the medical and nutritional requirements of ruminants. The student will learn the skills needed to work in the food animal industry as they relate to patient wellness, nursing and medication administration. Basic porcine husbandry will be introduced. Handling and restraint techniques for both species will be discussed.			
VA1153 Equine Nursing	Lecture Hrs: 15	Lab Hrs: 5	Credit Hrs: 1
This course will introduce the student to equine medicine. The student will learn about the equine patient and various nursing skills needed to assist with medical treatments and patient monitoring. Restraint and handling will be discussed as well as preventative health care of the equine patient.			
VA1155 Canine and Feline Nursing	Lecture Hrs: 10	Lab Hrs: 10	Credit Hrs: 1
This course introduces the student to medical and surgical nursing of dogs and cats. Common surgical and medical procedures will be discussed. Client education related to post-operative care and home management of the patient will also be introduced. Emphasis will be placed on preventative healthcare for both species.			
VA1156 Exotic Animal Medicine	Lecture Hrs: 15	Lab Hrs: 5	Credit Hrs: 1
In this course the student will learn about exotic animals and the special care requirements of each species. The student will learn about the restraint, medical needs, husbandry, common diseases, and nutrition of birds, reptiles, and pocket pets. Client education will also be addressed as it relates to the ownership of exotic pets.			
VAEXT211 Externship		Clock Hrs: 180	Credit Hrs: 4
In this course the student will spend 180 hours in a veterinary office.			

BARBER - DIPLOMA (Resident)

Program Description

The Barber program is designed to teach students how to serve clients at a barber facility and will include hands on experience as well as scientific professional knowledge. Information regarding safe work practices and infection control, licensing laws, salesmanship, shop management, barbering history, haircutting and styling, shaving facial hair, chemical processes, hair and scalp treatments, hair coloring, sterilization, sanitation and hygiene will be discussed. Diploma programs are designed to prepare skilled graduates to work in the Barber industry. The program prepares the student for the Oklahoma State Board of Cosmetology and Barbering Exam which consists of 100 multiple choice questions and a practical exam on a live model and on a manikin. Students will not work on clients until they have completed 150 hours.

Program Outcomes

1. Conduct barbering services with a focus upon customer satisfaction.
2. Develop a level of professional image, attitude, and appearance that will help the student attain his/her goals.
3. Provide superior customer service.
4. Develop a knowledgebase of state rules and regulations, history or the profession, and management skills.
5. Apply the learning skills required to continue career development.
6. Adapt to, and cope with, the elements of change in the barber service industry.
7. Demonstrate sanitary service practices.
8. Demonstrate proper haircutting, styling, and chemical processes of the barbering profession.
9. Demonstrate and use terminology related to the trade.

Program Goals: A graduate of this program should be able to:

- Possess an applied skill level sufficient for entry-level employment and advancement in the field of Barbering.
- Demonstrate appropriate workplace behaviors and pursue ongoing technical skill development sufficient for employment in the field of Barbering.
- Be successfully employed in the Barbering industry or maintain independence through self-employment.

Diploma

Total Hrs:	1500
Total Semester Hours of Credit:	50
Total Weeks:	51 (Full Time) or 75 (Part Time)
Clock Hrs:	Lecture/Lab
Credential Earned:	Diploma
Academic Year:	Day - 24 credits/32 weeks (Term Type B) or Evening 24 credits/36 weeks (Term Type C)

BARBER - DIPLOMA (Resident)

AH105 Career and Life Development Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.	Lecture Hrs: 50	Lab Hrs: 10	Credit Hrs: 2
BR102 History of Barbering This course will provide an overview of the history of barbering. Functions and importance of state barber boards will also be studied. This course will also, include the understanding of all the instruments used in the practice of barbering.	Lecture Hrs: 15	Lab Hrs: 15	Credit Hrs: 1
BR104 Bacteriology Elementary chemistry relating to sanitation, sterilization and bacteriology will be discussed.	Lecture Hrs: 15	Lab Hrs: 15	Credit Hrs: 1
BR106 Chemistry This course discusses the different forms of matter: elements, compounds, and mixtures. Attention will be given to the differences between organic and inorganic chemistry.	Lecture Hrs: 15	Lab Hrs: 15	Credit Hrs: 1
BR108 Safe Work Practices and Infection Control This course provides an overview of bacteria and proper sanitation and disinfection techniques used in the barbershop. Infection control responsibilities of barber professionals will be discussed. This course also provides the student with the understanding of all the instruments used in the practice of barbering.	Lecture Hrs: 15	Lab Hrs: 15	Credit Hrs: 1
BR110 Anatomy and Physiology This course provides the student with the knowledge of the anatomy and physiology as it pertains to barbers. Students will have a thorough understanding of the anatomy of the face, scalp, neck as well as the muscular system. There will be discussion over the arteries of the head, face, and neck.	Lecture Hrs: 15	Lab Hrs: 15	Credit Hrs: 1
BR112 Electricity and Facials Student will be introduced to the basics of electricity and its applications in barbering including equipment safety, and types and benefits of light therapy. In this course students will be provided instruction on procedures for performing facials and facial waxing procedures. The student will explore various massage movements and their effects on the client.	Lecture Hrs: 15	Lab Hrs: 15	Credit Hrs: 1
BR120 Properties and Disorders of the Skin This course will study aging and factors influencing the aging process, identification of disorders and contagious diseases, and assessing clients to make appropriate referrals.	Lecture Hrs: 15	Lab Hrs: 15	Credit Hrs: 1
BR122 Properties and Disorders of the Hair and Scalp This course will study the identification of disorders and contagious diseases of the scalp and hair.	Lecture Hrs: 15	Lab Hrs: 15	Credit Hrs: 1
BR116 Facial Hair Design and Licensing Laws This course will provide the fundamentals of straight razor shaving and an introduction to facial hair design. This course will provide the student with a review of the Rules and Regulations as they apply to the barber, as well as prepare the student for their practical and written exams to become a licensed professional.	Lecture Hrs: 15	Lab Hrs: 15	Credit Hrs: 1
BR118 Intro to Cutting and Color This course will provide the student with thorough instruction in the proper way to cut, blend, and taper the hair using clippers. This course also provides an introduction to color theory and its relationship to hair color. Students will also be introduced to the basic categories of color, and discuss what motivates people to color their hair.	Lecture Hrs: 15	Lab Hrs: 15	Credit Hrs: 1
BR124 Barbershop and Retail Management In this course students will study the foundations of management: planning organizing, execution of objectives and the dynamics and impact of leadership. Also addressed are factors one must consider when opening a barbershop and the types of ownerships available. Excellence in barber service as well as effective forms of marketing and retail will be addressed.	Lecture Hrs: 15	Lab Hrs: 15	Credit Hrs: 1
BR204 Professional Image and the Barber This course will assist the student in identifying the qualities needed to be successful in a service profession. Focus will be on the importance of offering excellent client services utilizing benchmark standards of professionalism and exemplary customer service.	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
BR206 Instruments for Straight Razor Shaving This course will provide theory and practice for straight razor shaving. Safety and sanitation measures will be discussed and practiced. This course will also, provide the understanding of all the instruments use in the practice of barbering.	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
BR208 Uniform Cutting and a Long Layered Cut In this course students will gain proficiency in uniform and long layered cutting. This course will also provide the understanding of all the instruments used in the practice of barbering.	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1

BR217 Scalp and Hair Treatments	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
This course will provide students with an understanding of proper shampooing procedures. In this course, students will also learn how to identify and treat common scalp conditions. Scalp massage techniques and hair loss treatments will also be discussed.			
BR214 Facial Massage	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
This course will provide the student with an understanding and the benefits of men's facial massage.			
BR216 Facial Treatments	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
This course will provide the student with an understanding of and how to perform men's facial treatments.			
BR219 Straight Razor Shaving and Facial Design	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
This course will provide an introduction to facial hair design. In this course, students will practice straight razor shaving and various razor techniques. Safety and sanitation will also be covered.			
BR222 Principles of Men's Haircutting and Styling	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
This course will provide the student with an understanding the art of haircutting and how it involves individualized and precise designing, cutting, and shaping of the hair.			
BR224 Fundamentals of Men's Haircutting	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
This course will provide the student with thorough instruction in the proper way to cut, blend, and taper the hair using clippers.			
BR226 Safety Precautions for Haircutting and Styling	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
This course will provide the student with thorough instruction about using safety precautions while cutting and styling hair.			
BR228 Men's Hairstyling	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
Students will have an understanding of how different products work in the hair and how to use a style hair by using a blow dryer properly.			
BR230 Men's Hairpieces	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
There will be discussion on men's hairpieces such as demonstration how to measure a client for a hairpiece. Student will have an understanding the marketing techniques to increase hairpiece sales.			
BR232 Hair Replacement Systems and Procedures	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
There will be discussion about different alternative hair replacement methods students will also learn how to do a template of a men's hairpiece.			
BR234 Basic Women's Haircutting	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
This course will assist you in transferring the knowledge and application of what you have learned about men's haircutting into women's haircutting.			
BR236 Graduated Cutting and Blunt Cutting	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
In this course students will gain proficiency in blunt and graduated hair cutting.			
BR276 Basic Women's Haircutting Review	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
In this course students will review and be proficient in blunt, graduated, uniform and long layered haircutting techniques.			
BR240 Women's Hair Styling	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
This course will provide the student with an understanding of different types of hairstyles and an understanding how important client consultation is prior to styling the hair.			
BR242 Chemical Texture Services	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
This course provides a review of chemical and smoothing services, the chemical used in these relaxing processes, and analysis of the hair for proper product selection. In this course students will also study the foundations of management: planning organizing, execution of objectives and the dynamics and impact of leadership.			
BR244 Permanent Waving	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
This course will provide the student with more knowledge of permanent waving, and how it creates chemical changes that permanently alter the natural pattern of the existing hair growth. Also, we will address the factors one must consider when opening a barbershop and the types of ownerships available. Excellence in barbershop service as well as effective forms of marketing will be addressed.			
BR246 Chemical Hair Relaxing	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
This course will provide the student with more knowledge of relaxers and how it creates a chemical change that permanently alters the natural pattern of the existing hair growth.			
BR248 Hair Color Application	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
In this course students will study and demonstrate basic application techniques for temporary colors, semi-permanent colors, permanent colors, and lighteners.			
BR250 Special Effect Hair coloring	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
In this course students will study and demonstrate pattern application techniques for temporary colors, semi-permanent colors, permanent colors, and lighteners.			
BR252 Facial Hair Coloring	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
This course will provide the student with the knowledge of knowing how to identify products used to color facial hair and discuss safety precautions to use when coloring facial hair.			
BR254 Corrective Color	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
In this course students will learn how to successfully carry out a client consultation for color correction and apply the principles of color Lecture when performing a corrective color service.			

BR256 Self Employment and Business Ownership	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
Students will have an understanding of the types of business ownership. Students will be able to identify the types of records that barbershop owner must maintain.			
BR258 Microbiology Review	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
Elementary chemistry relating to sanitation, sterilization and bacteriology will be discussed.			
BR260 Infection Control Review	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
In this course there will be a review over bacteria and proper sanitation and disinfection techniques used in the barbershop. Infection control responsibilities of barber professionals will be discussed.			
BR262 Anatomy Review	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
The student will be reviewing the anatomy as it pertains to barbers. Students will have a thorough understanding of the anatomy of the face, scalp, neck as well as the muscular system. There will be discussion over the arteries of the head, face, and neck. Safety will be reviewed and addressed and practiced.			
BR264 Physiology Review	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
The student will be reviewing the physiology as it pertains to barbers. Students will have a thorough understanding of the physiology of the face, scalp, neck as well as the muscular system. There will be discussion over the arteries of the head, face, and neck. Students will review the aging and factors influencing the aging process, identification of disorders and contagious diseases on the scalp, and assessing clients to make appropriate referrals.			
BR266 Chemistry Review	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
This course will review and discusses the different forms of matter: elements, compounds, and mixtures. Attention will be given to the differences between organic and inorganic chemistry. Safety will be reviewed and addressed and practiced.			
BR268 Electricity and Light Therapy Review	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
Student will also be introduced to the basics of electricity and its applications in barbering including equipment safety, and types and benefits of light therapy.			
BR270 Properties and Disorders of the Skin and Scalp Review	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
This course provides a review of disorders and properties of the skin and scalp.			
BR272 Properties and Disorders of the Hair Review	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
This course provides a review of how scalp massages can benefit the client and their hair in the barbering profession.			
BR274 Treatment of the Hair Skin and Scalp Review	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
In this course students will review treatments for the hair, skin, and scalp.			
BR300 Barbering Job Search	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
This course will provide the student with a review of implementation basics for success both professionally and personally with a focus on attitude, responsibility, communication, decision making and problem solving, and preparing for the workforce.			
BR302 State Board Review	Lecture Hrs: 10	Lab Hrs: 50	Credit Hrs: 2
This course will provide the student with knowledge that is needed to prepare for state board examinations. The student will know how to write a resume, and have the knowledge to search for employment in the barbering field.			

BARBERING TO COSMETOLOGY CROSSOVER - DIPLOMA (Resident)

Description

The Barber to Cosmetology Crossover Program combines theory & laboratory experiences needed to provide the student with skills necessary to acquire a license through examination by the Oklahoma State Board of Cosmetology and Barbering. Skills will be developed utilizing modern beauty salon equipment, contemporary curriculum & textbooks. Extensive instruction is provided to prepare the student for serving the public in the following areas: hair design, permanent waving, hair shaping, hair care, hair coloring and lightening, chemical relaxing, thermal styling, manicuring and pedicuring, as well as skin care and makeup. Added instruction is given to the student in rendering service to the public by hands-on experience in making appointments, keeping an appointment book, making charges for services rendered and general recordkeeping, in addition to salon planning and management. Emphasis is on mastering skills through theory and concentration on clinical experiences by working on clients. Students currently holding their Cosmetology license, as well as students who are registered for their exam with the Oklahoma State Board of Cosmetology and Barbering may enroll in this program.

Classroom Procedures

Each course stands alone as a unit of study and is not dependent upon prerequisite training. A student may enter the program at the beginning of any course and continue through the sequence until completion of all courses. Cosmetology related courses meet full time (30 hours per week) and part time (20 hours per week).

Career Path

After completion of the Cosmetology Program and passing the Oklahoma State Board of Cosmetology and Barbering exam, the student may enter the workforce as a licensed cosmetologist. While some cosmetologists choose to work in the traditional salon setting, others choose to work as hair and makeup artists on production sets, while other opt to work in spas, hotels, or healthcare facilities.

Diploma

Total Hrs:	300
Total Semester Hours of Credit:	10
Total Weeks:	10(full time) or 15(part-time)
Clock Hrs:	Lecture/Lab
Credential Earned:	Diploma and qualifies student to take the Oklahoma State Board written and practical examinations
Academic Year:	Academic Year: Full-time – 300 hours/21 weeks (Non term) OR Part-time 300 hours/30 weeks (Non term)

Course No.	Course Title	Clock Hours	Credit Hours
BCO106	Structure of Hair, Skin and Nails	30/0	1
BCO144	Diseases, Disorders, and Infection Control	30/0	1
BCO262	Wet Hair Styling	10/20	1
BCO122	Manicures/Pedicures	20/10	1
BCO150	Braiding and Styling	10/20	1
BCO152	Wigs and Hair Extensions	10/20	1
BCO154	Day, Evening and Stage Makeup	10/20	1
BCO276	Artificial Nail Enhancements	10/20	1
BCO278	Facials Spa Services	10/20	1
BCO272	State Board Review I	0/30	1

The Barbering to Cosmetology Crossover program is approved by the Oklahoma Board of Private Vocational Schools and the Oklahoma State Board of Cosmetology and Barbering only.

BARBERING TO COSMETOLOGY CROSSOVER - DIPLOMA (Resident)

BCO106 Structure of Hair, Skin and Nails	Lecture Hrs: 30	Lab Hrs: 0	Credit Hrs: 1
This course provides instruction on the structure of the hair root and hair shaft, and the structure and composition of skin and nails. Students will gain an understanding of the function and growth of hair, skin and nails. The student will learn how to analyze a client's scalp and hair texture. How various hair textures and growth patterns affect chemical processing techniques will be discussed as well as hair loss treatments.			
BCO144 Diseases, Disorders, and Infection Control	Lecture Hrs: 30	Lab Hrs: 0	Credit Hrs: 1
This course provides an overview of bacteria and proper sanitation and disinfection techniques used in the salon and of diseases and disorders affecting skin and nails as pertinent to cosmetology. Topics include aging and factors influencing the aging process, identification of disorders and contagious diseases, and assessing clients to make appropriate referrals. Infection control responsibilities of salon professionals will be discussed.			
BCO262 Wet Hair Styling	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
This course introduces students to hair design utilizing proper roller placement, pin curl techniques, and finger wave designs.			
BCO122 Manicures/Pedicures	Lecture Hrs: 20	Lab Hrs: 10	Credit Hrs: 1
In this course the student will be introduced to the skills necessary to perform manicures and pedicures. Proper sanitation and disinfection techniques used in the salon will also be discussed and demonstrated.			
BCO150 Braiding and Styling	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
In this course students will discuss and demonstrate various braiding techniques including visible, invisible, rope and single braids. Styling options and tools used for braiding and natural hair service will also be discussed.			
BCO152 Wigs and Hair Extensions	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
This course will introduce students to artificial hair enhancements. Topics for this course will include wig measurement, types of hair pieces, human and synthetic hair, care for artificial hair and styling will all be discussed and demonstrated.			
BCO154 Day, Evening and Stage Makeup	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
This course provides an introduction to the basics of facial makeup and the laws and theory of color. Students will learn about various types of cosmetics and their uses. Makeup application will be discussed and demonstrated for day and evening wear along with accentuated makeup for the stage.			
BCO276 Artificial Nail Enhancements	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
This course covers the theory and application of acrylic and gel nail enhancements. Students will be able to perform various types of artificial nail applications.			
BCO278 Facials and Spa Services	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
This course covers the theory and application of spa services including facials, waxing, lash application, and body treatments.			
BCO272 State Board Review I	Lecture Hrs: 0	Lab Hrs: 30	Credit Hrs: 1
This course will provide the student with a review of the Rules and Regulations as they apply to the salon, as well as prepare the student for their practical and written exams to become a licensed professional. Prerequisite: Completion of Phase I			

COSMETOLOGY - DIPLOMA (Resident)

Description

The Cosmetology Program combines theory & laboratory experiences needed to provide the student with skills necessary to acquire a license through examination by the Oklahoma State Board of Cosmetology and Barbering. Skills will be developed utilizing modern beauty salon equipment, contemporary curriculum & textbooks. Extensive instruction is provided to prepare the student for serving the public in the following areas: hair design, permanent waving, hair shaping, hair care, hair coloring and lightening, chemical relaxing, thermal pressing, manicuring and pedicuring, as well as skin care and makeup. Added instruction is given to the student in rendering service to the public by hands-on experience in making appointments, keeping an appointment book, making charges for services rendered and general recordkeeping, in addition to salon planning and management. Emphasis is on mastering skills through theory and concentration on clinical experiences by working on clients.

Classroom Procedures

Each course stands alone as a unit of study and is not dependent upon prerequisite training except for the completion of BCO 252, BCO 254, BCO 256, BCO 258 before BCO 260, completion of Phase I and Phase II before BCO 272, completion of BCO 106, BCO 122, and BCO 264 before Phase III, completion of BCO 320, BCO 322, BCO 324, BCO 326, BCO 328, BCO 330, BCO 332, BCO 334, BCO 336, BCO 338, BCO 342, and BCO 346. Exceptions can be made to the prerequisite system only with written permission of the Department Head.

A student may enter the program at the beginning of any course and continue through the sequence until completion of all courses. Cosmetology related courses meet full time (30 hours per week) and part time (20 hours per week). Career and Life Development is held at Community Care College.

Career Path

After completion of the Cosmetology Program and passing the Oklahoma State Board of Cosmetology and Barbering exam, the student may enter the workforce as a licensed cosmetologist. While some cosmetologists choose to work in the traditional salon setting, others choose to work as hair and makeup artists on production sets, while other opt to work in spas, hotels, or healthcare facilities.

COSMETOLOGY - DIPLOMA (Resident)

AH105 Career and Life Development Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.	Lecture Hrs: 50	Lab Hrs: 10	Credit Hrs: 2
BCO143 Guest Service and Product Knowledge This course will assist the student in identifying services offered in modern salons and spas and the product and ingredients used to perform these services. Organic and inorganic ingredients and their uses will be discussed.	Lecture Hrs: 15	Lab Hrs: 15	Credit Hrs: 1
BCO140 Chemistry This course discusses the different forms of matter: elements, compounds and mixtures. Attention will be given to the differences between organic and inorganic chemistry.	Lecture Hrs: 30	Lab Hrs: 0	Credit Hrs: 1
BCO106 Structure of Hair, Skin and Nails This course provides instruction on the structure of the hair root and hair shaft, and the structure and composition of skin and nails. Students will gain an understanding of the function and growth of hair, skin and nails. The student will learn how to analyze a client's scalp and hair texture. How various hair textures and growth patterns affect chemical processing techniques will be discussed as well as hair loss treatments.	Lecture Hrs: 30	Lab Hrs: 0	Credit Hrs: 1
BCO145 Shampooing and Blow Outs In this course students are introduced to the art of scalp massage, relaxing shampoo services and proper blow out styling techniques to provide future salon guests with their desired styled and extraordinary salon experience. Scalp care, shampoo selection and hair treatments will be discussed.	Lecture Hrs: 15	Lab Hrs: 15	Credit Hrs: 1
BCO144 Diseases, Disorders, and Infection Control This course provides an overview of bacteria and proper sanitation and disinfection techniques used in the salon and of diseases and disorders affecting skin and nails as pertinent to cosmetology. Topics include aging and factors influencing the aging process, identification of disorders and contagious diseases, and assessing clients to make appropriate referrals. Infection control responsibilities of salon professionals will be discussed.	Lecture Hrs: 30	Lab Hrs: 0	Credit Hrs: 1
BCO262 Wet Hair Styling This course introduces students to hair design utilizing proper roller placement, pin curl techniques, and finger wave designs.	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
BCO264 Thermal Styling This course will provide the student with the techniques used for thermal hairstyling. The various types of thermal irons and other thermal styling tools will be discussed. Students will demonstrate the techniques used for thermal irons, blow dry styling, and marcel ironing and pressing.	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
BCO122 Manicures/Pedicures In this course the student will be introduced to the skills necessary to perform manicures and pedicures. Proper sanitation and disinfection techniques used in the salon will also be discussed and demonstrated.	Lecture Hrs: 20	Lab Hrs: 10	Credit Hrs: 1
BCO266 Permanent Waving This course introduces the student to the basic techniques used for the permanent waving. The tools used for the permanent waving of hair will be identified and discussed. Students will demonstrate the techniques of sectioning, base control, and base direction when wrapping hair for chemical processing.	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
BCO268 Chemical Texturing This course provides an overview of chemical and smoothing services. The chemical used in these relaxing processes will be discussed and demonstrated. Focus will be on analysis of the hair for proper product selection and procedures when providing chemical texturing services.	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
BC240 Formulation This course focuses on theory and practical application of color products. Students will be able to perform a successful consultation and formulate accordingly to ensure proper color mixtures.	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
BCO162 Haircutting Concepts and Application In this course, students will learn the basic concepts and applications of haircutting including guidelines, angles, and elevations of cutting.	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
BCO164 Color Concepts and Application In this course, students will learn the basic concepts of color. Various color application patterns will be taught for applying temporary, semi, demi and permanent color and lightener.	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
BCO246 Special FX Application This course introduces students to proper creation and application of various color formulas, as well as advanced special effects coloring applications.	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
BCO250 Color Correction In this course students will learn how to successfully carry out a client consultation for color correction and apply the principles of color theory when performing a corrective color service.	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
BCO280 Oklahoma Rules and Statutes In this course, students will review the Oklahoma State Board of Cosmetology and Barbering Rules and Statutes that govern our industry.	Lecture Hrs: 0	Lab Hrs: 30	Credit Hrs: 1

BCO337 Men's Haircutting Review In this course, students will review the concepts of men's haircutting and styling.	Lecture Hrs: 0	Lab Hrs: 30	Credit Hrs: 1
BCO256 Uniform Cutting This course focuses on techniques used for layered haircutting.	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
BCO258 Razor and Clipper Cutting This course will provide information related to the five characteristics that determine the behavior of hair and the functions and characteristics of haircutting tools. Instruction will focus on the theory and techniques used for in razor and clipper cuts.	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
BCO260 Cutting Integration This is an advanced haircutting course in which students will learn how to integrate previously acquired skills and techniques.	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
BCO274 Salon Success Strategies This course will introduce students to the salon environment. During these courses, students will learn how to build a clientele as well as learn the functions of a working salon. Students will begin their portfolio as well as discuss personal branding.	Lecture Hrs: 0	Lab Hrs: 30	Credit Hrs: 1
BCO142 Electricity This course will introduce students to the basics of electricity and its applications in cosmetology including equipment safety, and types and benefits of light therapy.	Lecture Hrs: 30	Lab Hrs: 0	Credit Hrs: 1
BCO102 Anatomy Students will be introduced to the importance of anatomy and physiology in the cosmetology profession. This course provides an integrated study of the human structure and functions. Topics include cellular structure and reproduction, various tissues found in the body, and the different systems of the body.	Lecture Hrs: 30	Lab Hrs: 0	Credit Hrs: 1
BCO150 Braiding and Styling In this course students will discuss and demonstrate various braiding techniques including visible, invisible, rope and single braids. Styling options and tools used for braiding and natural hair service will also be discussed.	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
BCO152 Wigs and Hair Extensions This course will introduce students to artificial hair enhancements. Topics for this course will include wig measurement, types of hair pieces, human and synthetic hair, care for artificial hair and styling will all be discussed and demonstrated.	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
BCO154 Day, Evening and Stage Makeup This course provides an introduction to the basics of facial makeup and the laws and theory of color. Students will learn about various types of cosmetics and their uses. Makeup application will be discussed and demonstrated for day and evening wear along with accentuated makeup for the stage.	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
BCO156 Fantasy and Gore Makeup In this course students will use their creativity to explore fantasy and gore makeup. Topics include creation of fantasy characters, bruises, cuts, scars and bloody wounds. Demonstrations and application of makeup bruise wheel, latex and scar wax will be included.	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
BCO276 Artificial Nail Enhancements This course covers the theory and application of acrylic and gel nail enhancements. Students will be able to perform various types of artificial nail applications.	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
BCO278 Facials and Spa Services This course covers the theory and application of spa services including facials, waxing, and body treatments.	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
BCO118 Salon Management In this course students will study the foundations of management: planning organizing, execution of objectives and the dynamics and impact of leadership. Also addressed are factors one must consider when opening a salon and the types of ownerships available. Excellence in salon service as well as effective forms of marketing will be addressed.	Lecture Hrs: 30	Lab Hrs: 0	Credit Hrs: 1
BCO272 State Board Review I This course will provide the student with a review of the Rules and Regulations as they apply to the salon, as well as prepare the student for their practical and written exams to become a licensed professional. <i>Prerequisites: Completion of Phase I</i>	Lecture Hrs: 0	Lab Hrs: 30	Credit Hrs: 1
BCO320 Anatomy and Physiology Review In this course students will review Anatomy and Physiology. Students will know the importance of anatomy and physiology in the cosmetology profession, review the 10 main body systems, and identify the types of tissues found in the body.	Lecture Hrs: 0	Lab Hrs: 30	Credit Hrs: 1
BCO322 Chemistry Review This course provides a review of Chemistry. Students will know the different forms of matter and the differences between organic and inorganic chemistry.	Lecture Hrs: 0	Lab Hrs: 30	Credit Hrs: 1
BCO324 Electricity Review This course provides a review of the nature of electricity, electrical equipment safety, and electrotherapy in cosmetology.	Lecture Hrs: 0	Lab Hrs: 30	Credit Hrs: 1
BCO326 Infection Control and Diseases This course will provide the student with a review of Infection control and diseases. Students will review the state laws and regulations, the classifications of bacteria, and the proper cleaning of salon tools and equipment.	Lecture Hrs: 0	Lab Hrs: 30	Credit Hrs: 1

BCO328 Properties of the Hair, Skin, and Scalp Review	Lecture Hrs: 0	Lab Hrs: 30	Credit Hrs: 1
This course provides a review of the properties of the hair, skin, and scalp.			
BCO330 Chemical Texturing Review	Lecture Hrs: 0	Lab Hrs: 30	Credit Hrs: 1
This course provides a review of chemical and smoothing services, the chemical used in these relaxing processes, and analysis of the hair for proper product selection.			
BCO332 Facials, Hair Removal, Makeup Review	Lecture Hrs: 0	Lab Hrs: 30	Credit Hrs: 1
This course provides a review of procedures for performing facials, waxing procedures and makeup application theories.			
BCO334 Hair Design Review	Lecture Hrs: 0	Lab Hrs: 30	Credit Hrs: 1
This course provides a review of the elements and principles of hair design. Students will know safe and proper techniques for using the various tools of hair design.			
BCO336 Haircutting Review	Lecture Hrs: 0	Lab Hrs: 30	Credit Hrs: 1
This course provides the student with a review to cutting theory with intense instruction on the angles and elevations used to perform graduated and layered haircuts, proper body mechanics, hand position and safety when cutting hair, as well as the guidelines for sanitation and disinfection.			
BCO338 Hair Coloring Review	Lecture Hrs: 0	Lab Hrs: 30	Credit Hrs: 1
This course provides a review of color theory and its relationship to hair color. Students will know the basic categories of color, and theory of hair color.			
BCO342 Natural Nail Care Review	Lecture Hrs: 0	Lab Hrs: 30	Credit Hrs: 1
This review course covers the safety and sanitation procedures to properly perform manicures and pedicures.			
BCO346 Salon Business Review	Lecture Hrs: 0	Lab Hrs: 30	Credit Hrs: 1
This course will provide the student with a review of management principles, marketing strategies, customer service and types of salon ownership.			
BCO352 Job Success Strategies	Lecture Hrs: 0	Lab Hrs: 30	Credit Hrs: 1
This course will prepare students for their career in cosmetology. Job search strategies, interviewing skills, and continuing education will all be discussed. In this course students will complete their cosmetology portfolio as well as review state board test skills.			
BCO354 Preparing for Licensure	Lecture Hrs: 0	Lab Hrs: 30	Credit Hrs: 1
This course reviews the written and practical aspects of the Oklahoma State Board of Cosmetology and Barbering Examinations. Students will review OSBCB Rules and Statutes as they pertain to the requirements of the cosmetology industry in Oklahoma.			
BCO401 Salon Floor experience I	Lecture Hrs: 0	Lab Hrs: 30	Credit Hrs: 1
In this course students will explore specialty areas of the cosmetology and spa industry. Students will select specialty areas based on interest and specialty area requirements. Areas of specialty include makeup, esthetics, nails, and advanced hair skills.			
BCO402 Salon Floor experience II	Lecture Hrs: 0	Lab Hrs: 30	Credit Hrs: 1
In this course students will continue to explore specialty areas of the cosmetology and spa industry. Students will select specialty areas based on interest and specialty area requirements. Areas of specialty include makeup, esthetics, nails, and advanced hair skills.			
BCO403 Salon Floor experience III	Lecture Hrs: 0	Lab Hrs: 30	Credit Hrs: 1
In this course students will continue to explore specialty areas of the cosmetology and spa industry. Students will select specialty areas based on interest and specialty area requirements. Areas of specialty include makeup, esthetics, nails, and advanced hair skills.			

COSMETOLOGY TO BARBERING CROSSOVER – DIPLOMA (Resident)

Program Description

The Cosmetology to Barbering Crossover program is designed to teach students how to serve clients at a barber facility and will include hands on experience as well as scientific professional knowledge. Information regarding safe work practices and infection control, licensing laws, salesmanship, shop management, barbering history, haircutting and styling, shaving facial hair, chemical processes, hair and scalp treatments, hair coloring, sterilization, sanitation and hygiene will be discussed. Diploma programs are designed to prepare skilled graduates to work in the Barber industry. The program prepares the student for the Oklahoma State Board of Cosmetology and Barbering Exam which consists of 100 multiple choice questions and a practical exam on a live model and on a manikin. Students currently holding their Cosmetology license, as well as students who are registered for their exam with the Oklahoma State Board of Cosmetology and Barbering may enroll in this program.

Program Outcomes

1. Conduct barbering services with a focus upon customer satisfaction.
2. Develop a level of professional image, attitude, and appearance that will help the student attain his/her goals.
3. Provide superior customer service.
4. Develop a knowledgebase of state rules and regulations, history or the profession, and management skills.
5. Apply the learning skills required to continue career development.
6. Adapt to, and cope with, the elements of change in the barber service industry.
7. Demonstrate sanitary service practices.
8. Demonstrate proper haircutting, styling, and chemical processes of the barbering profession.
9. Demonstrate and use terminology related to the trade.

Program Goals: A graduate of this program should be able to:

- Possess an applied skill level sufficient for entry-level employment and advancement in the field of Barbering.
- Precision in clipper over comb technique
- Perform a straight razor shave
- Demonstrate appropriate workplace behaviors and pursue ongoing technical skill development sufficient for employment in the field of Barbering.
- Be successfully employed in the Barbering industry or maintain independence through self-employment.

Diploma

Total Hrs:	300
Total Semester Hours of Credit:	10
Total Weeks:	10 (Full Time) or 15 (Part Time)
Clock Hrs:	Lecture/Lab
Credential Earned:	Diploma
Academic Year:	Academic Year: Day – 300 hours/10 weeks (Non term) or Evening 300 hours/15 weeks (Non term)

Course No.	Course Title	Clock Hours	Credit Hours
BR102	History of Barbering	15/15	1
BR116	Facial Hair Design and Licensing Laws	15/15	1
BR206	Instruments for Straight Razor Shaving	5/25	1
BR219	Straight Razor Shaving and Facial Designs	5/25	1
BR222	Principles of Men's Haircutting and Styling	5/25	1
BR224	Fundamentals of Men's Haircutting	5/25	1
BR230	Men's Hairpieces	5/25	1
BR228	Men's Hairstyling	5/25	1
BR302	State Board Review	10/50	2

The Cosmetology to Barbering Crossover program is approved by the Oklahoma Board of Private Vocational Schools and the Oklahoma State Board of Cosmetology and Barbering only.

COSMETOLOGY TO BARBERING CROSSOVER – DIPLOMA (Resident)

BR102 History of Barbering**Lecture Hrs: 15 Lab Hrs: 15 Credit Hrs: 1**

This course will provide an overview of the history of barbering. Functions and importance of state barber boards will also be studied. This course will also, include the understanding of all the instruments used in the practice of barbering.

BR116 Facial Hair Design and Licensing Laws**Lecture Hrs: 15 Lab Hrs: 15 Credit Hrs: 1**

This course will provide the fundamentals of straight razor shaving and an introduction to facial hair design. This course will provide the student with a review of the Rules and Regulations as they apply to the barber, as well as prepare the student for their practical and written exams to become a licensed professional.

BR206 Instruments for Straight Razor Shaving**Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1**

This course will provide theory and practice for straight razor shaving. Safety and sanitation measures will be discussed and practiced. This course will also, provide the understanding of all the instruments use in the practice of barbering.

BR219 Straight Razor Shaving and Facial Design**Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1**

This course will provide an introduction to facial hair design. In this course, students will practice straight razor shaving and various razor techniques. Safety and sanitation will also be covered.

BR222 Principles of Men's Haircutting and Styling**Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1**

This course will provide the student with an understanding the art of haircutting and how it involves individualized and precise designing, cutting, and shaping of the hair.

BR224 Fundamentals of Men's Haircutting**Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1**

This course will provide the student with thorough instruction in the proper way to cut, blend, and taper the hair using clippers.

BR228 Men's Hairstyling**Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1**

Students will have an understanding of how different products work in the hair and how to use a style hair by using a blow dryer properly.

BR230 Men's Hairpieces**Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1**

There will be discussion on men's hairpieces such as demonstration how to measure a client for a hairpiece. Student will have an understanding the marketing techniques to increase hairpiece sales.

BR302 State Board Review**Lecture Hrs: 10 Lab Hrs: 50 Credit Hrs: 2**

This course will provide the student with knowledge that is needed to prepare for state board examinations. The student will know how to write a resume, and have the knowledge to search for employment in the barbering field.

ESTHETICIAN - DIPLOMA (Resident)

Description

In the Esthetician Program, students learn the basics of skin care. Students become proficient in facials, full body waxing, chemical peels, microdermabrasion and facial makeup. An emphasis is placed on the understanding of cosmetic chemistry, anatomy and physiology. Students also learn spa etiquette, professionalism, and the basics of spa business and retailing.

Classroom Procedures

Each course stands alone as a unit of study. A student may enter the program at the beginning of any 100 level courses and continue through the sequence until completion of all 100 level courses. All 100 level courses must be completed before moving on to 200 level courses. The 200 level classes consist of almost completely clinic floor experience. Classes meet full time (30 hours per week) and part time (20 hours per week). Career and Life Development is held at Community Care College.

Career Path

After completion of the Esthetician Program and passing the Oklahoma State Board of Cosmetology and Barbering Esthetician exam the student may enter the workforce as a licensed esthetician. There are many exciting career paths as a licensed esthetician, including working in a salon or spa setting, medical office, or focus on specific specialties such as makeup or hair removal.

Diploma

Total Hrs:	600
Total Semester Hours of Credit:	20
Total Weeks:	21(full time) or 30(part-time)
Clock Hrs:	Lecture/Lab
Credential Earned:	Diploma and qualifies student to take the Oklahoma State Board written and practical examinations
Academic Year:	Academic Year: Full-time – 600 hours/21 weeks (Non term) or Part-time 600 hours/30 weeks (Non term)

Course No.	Course Title	Clock Hours	Credit Hours
AH105	Career and Life Development	50/10	2
EST102	Biology for Estheticians	5/25	1
EST104	Skin Analysis and Facials	15/15	1
EST106	Advanced Facials	5/25	1
EST122	Skin Physiology	5/25	1
EST110	Hair Removal	15/15	1
EST112	Chemistry and Ingredients	5/25	1
EST114	Makeup and Eyelash Extensions	5/25	1
EST116	Electrical Esthetics and Nutrition	5/25	1
EST118	Body Treatments	5/25	1
EST120	Advanced Makeup	5/25	1
EST201	Infection Control and Biology Review	5/25	1
EST203	Skin Physiology Review	5/25	1
EST206	Skin Analysis and Facial Procedures Review	5/25	1
EST205	Hair Removal and Makeup Review	5/25	1
EST210	Ingredients and Skin Care Review	5/25	1
EST212	Electrical and Advanced Esthetics Review	5/25	1
EST214	Esthetic Opportunities Review	5/25	1
EST216	State Board Rules and Regulations	5/25	1

These clock hours encompass all requirements of the following Oklahoma State Board of Cosmetology and Barbering requirements: Bacteriology, Sterilization, Sanitation and Safety – 80, Sciences – 180, Facials – 200, Non-Permanent Hair Removal – 40, Salon Development – 60, Cosmetology Law – 40

ESTHETICIAN - DIPLOMA (Resident)

AH105 Career and Life Development

Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 2

Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.

EST102 Biology for Estheticians

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

This course provides an in depth curriculum covering anatomy, physiology, and histology as it applies to an esthetician. The student will be introduced to the functions of the cells, tissue, organs, bones, muscular and neural systems of the body. Students should be able to name the major bones, muscles, blood systems and nerves. The study of tissue, specifically epithelial tissue, or the skin, will also be discussed. Student should be able to name all layers of the skin and know what is housed in each layer.

EST104 Skin Analysis and Facials

Lecture Hrs: 15 Lab Hrs: 15 Credit Hrs: 1

In this course students will learn the proper way to analyze the face, as well as recognize contraindications. Analysis methods including Fitzpatrick and Glogau will be taught to students. The students will discuss and practice the major types of facials. An emphasis is placed on detailed knowledge of the products used in the treatment room. Students will also be familiar with all major types of equipment and implements used to analyze the face as well.

EST106 Advanced Facials

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

This course will focus on results-oriented exfoliation procedures such as microdermabrasion and chemical peels. Students will understand the difference in chemical and mechanical exfoliation as well as the difference in enzyme, alpha hydroxy acid, and beta hydroxy acid chemical peels. Student will learn to manipulate and manage the microdermabrasion machine, as well as all contraindications for these services.

EST122 Skin Physiology

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

In this course students learn the layers of the skin and what is housed in each layer of the skin. Students will also understand the common skin diseases and disorders found in an esthetic practice. Instruction will be given on the different grades of acne and the various forms of skin cancers and identification of primary and secondary lesions of the skin. Students will be introduced to contagious diseases and the identification measured used by the esthetician. Contraindications as they relate to contagious disease will also be addressed. The esthetician's scope of practice will clearly be defined as it related to skin disorders with extensive discussion related to the differences between esthetician and dermatologist.

EST110 Hair Removal

Lecture Hrs: 15 Lab Hrs: 15 Credit Hrs: 1

This course will provide instruction on the hair growth cycle, methods of hair removal, and sanitation procedures for hair removal. Advanced techniques like photo-epilation, threading, and sugaring will also be discussed. The student will demonstrate waxing over most of the body.

EST112 Chemistry and Ingredients

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

This course will provide the student with an understanding of basic skin care products and their ingredients as they apply to professional and home use. Common cosmetic ingredients and their functions will be discussed along with the FDA's role in regulation of cosmetic ingredients for consumer safety. The student will be introduced to the chemistry involved in creating skin care products which will teach the student how to choose a product line for a wide range of skin types and conditions. Students will also learn the proper techniques for upselling and retailing products to their clients. At the end of this course the student should be knowledgeable in basic cosmetic ingredients, reactions, and be able to comfortably and knowledgeably retail to their client.

EST114 Makeup and Eyelash Extensions

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

In this course the student will learn the psychological and procedural aspects of makeup application. The overall services including the different tools and implements necessary for performing a professional makeup application will be addressed. The students will identify the proper function of the various tools and demonstrate the techniques used for basic makeup application. Students will also learn classic eyelash extension materials and various application techniques.

EST116 Electrical Esthetics and Nutrition

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

This course will provide the student with a basic understanding of electricity and how it relates to the esthetic profession. The four types of electrotherapy and the types of light therapy as they apply to esthetics are discussed. The student will learn and demonstrate electrical equipment safety for themselves and the clients while in the salon setting. Students will be proficient in the use of the galvanic and high frequency machines. In addition this course will cover nutrition and how it relates to healthy skin. Students will learn the importance of macronutrients, micronutrients, minerals, and vitamins to the skin along with which vitamins can be applied directly to the skin. In this course students will also cover basic business and marketing skills as they apply to an Esthetician.

EST118 Body Treatments

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

In this course students will learn the full body application of products. Once completing the course students should be proficient in body scrubs, body wraps and body masks. Students will learn Brazilian waxing. They will also be taught all the parts of the treatment room and the proper techniques in arranging the room.

EST120 Advanced Makeup

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

This course is designed to further the students understanding of makeup applications. Special effects, camouflage, contouring and special occasion makeup is all covered and practiced. Students will also learn airbrush makeup in this course.

EST201 Infection Control and Biology Review**Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1**

This course provides a review of anatomy and physiology as it pertains to esthetics. Students will have a thorough understanding of the anatomy of the face, scalp, neck, and arms. As well as cellular functions, organs, bones and muscles. Students will also review infection control and sanitary procedures.

EST203 Skin Physiology Review**Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1**

Students will review the skin layers, functions and necessary disorders and diseases. Proper treatment and contraindications will also be covered in this course.

EST206 Skin Analysis and Facial Procedures Review**Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1**

This course provides a review of skills necessary to identify skin types, common conditions of the skin, how to perform the Fitzpatrick evaluation and what to recommend for certain types of skin. Students will know the difference between a skin type and a skin condition and the causes for each.

EST205 Hair Removal and Makeup Review**Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1**

This course provides a review of basic hair removal concepts and procedures. Basic makeup application and the color wheel will also be covered.

EST210 Ingredients and Skin Care**Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1**

In this course students will review basic skin care products and their ingredients as they apply to professional and home use. Students will know common cosmetic ingredients and their functions, as well as the FDA's role in regulation of cosmetic ingredients for consumer safety. The student will be able to choose a product line for a wide range of skin types and conditions.

EST212 Electrical and Advanced Esthetics Review**Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1**

This course provides a review of the four types of electrotherapy, the five types of light therapy, and electrical equipment safety. Students will also review ingredients and procedures used in advanced esthetics, be able to recognize advanced ingredients such as Retin-A and AHAs, and know the skills necessary to provide advanced services such as peels and deep pore cleansing.

EST214 Esthetic Opportunities Review**Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1**

This course provides the student with a review of the esthetics profession, qualities needed to be successful in a service profession, and various types of ownership, record keeping, and the importance of proper advertising and marketing.

EST216 State Board Rules and Regulations**Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1**

This course provides an exhaustive review of the rules and regulations of the Oklahoma State Board of Cosmetology and Barbering as they apply to estheticians. The student will be familiarized with the Oklahoma State Board of Cosmetology and Barbering Unofficial Rule Book. Students will also be given instructions on how and where to find additional information related to rules and regulations.

FASHION DESIGN - DIPLOMA (Resident)

Objective

The demand for talented and ambitious fashion designers is greater now more than any time in the history of fashion. It is the goal of this program to deliver a quality education in fashion design reflective of industry standards. To that end, the program is designed to provide students with the knowledge, skills and experience necessary for entry-level positions in the fashion industry. Utilization of a high-tech/high-touch approach to fashion design education combined with first rate curriculum, and excellent instruction is intended to provide our graduates with the necessary competencies to successfully meet the rigors and demands of the highly complex and competitive industry.

Classroom Procedures

A student may enter the program at the scheduled start dates and continue through the sequence until completion of all courses. Students will complete all courses in Phase I prior to moving on to Phase II. Fashion Design courses meet 30 hours per week or 20 hours per week. Career and Life Development are held at Community Care College.

Career Path

After completion of the Fashion Design program, the student will have developed the skills and knowledge necessary to enter a variety of positions in the fashion industry. Career opportunities are available in many areas such as design, patternmaking, quality assurance, merchandising, sales, product development, management, and international sourcing.

FASHION DESIGN - DIPLOMA (Resident)

AH105 Career and Life Development

Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 2

Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.

FD101 Design Foundations

Lecture Hrs: 60 Lab Hrs: 0 Credit Hrs: 2

This course provides a thorough look at the fundamentals and principles of design with an emphasis on artistic expression through a complete understanding of the design process. Design as it relates to all arts is discussed. Emphasis is placed on utilization of good design principles in creative expression.

FD103 Beginning Clothing Construction

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

This course introduces the student to basic principles and techniques of apparel assembly. Theoretical concepts will be applied practically in progressively advancing sewing projects. The student will be provided with the knowledge and skills necessary to create basic and simple designs.

FD105 Textiles

Lecture Hrs: 60 Lab Hrs: 0 Credit Hrs: 2

This course provides an expansive look at the design, structure and application of textiles. Students are introduced to a broad scope of topics such as fiber structure and innovation, construction of fabrics, quality issues and regulation of textiles.

FD107 Patternmaking

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

This course provides Lecture and practice in developing flat pattern design for custom garment construction. Major components of the garment are addressed: bodice, collar, skirt and sleeve. Multi-level manipulations and design variations are addressed to show the integration of basic skills in limitless design possibilities.

FD109 History of Fashion

Lecture Hrs: 60 Lab Hrs: 0 Credit Hrs: 2

This course provides a historical overview of dress from the ancient world to the trends of today. It takes into account the social, geographical, environmental, cultural and artistic perspectives that influence the design and production of clothing.

FD111 Fashion Sketching

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

This course introduces the student to fashion sketching with a focus on drawing the fashion figure, fabric shapes, and garment details. Sketching accessories and descriptive rendering techniques will be presented to further advance the skills of the student.

FD113 Apparel Production

Lecture Hrs: 60 Lab Hrs: 0 Credit Hrs: 2

This course provides a thorough overview of the pre-production processes of apparel product development: planning, forecasting, fabricating, developing silhouettes and specifications, pricing, and sourcing. It establishes the necessary coordination of these processes to result in successful production of a line of clothing. Students will learn the concept of technical packages.

FD200 Intermediate Clothing Construction

Lecture Hrs: 10 Lab Hrs: 50 Credit Hrs: 2

A continuation of Beginning Clothing Construction (FD 103), this course provides the student with advanced knowledge and skills for increased levels of proficiency in clothing construction, including, handling specialty fabrics, creation of complex designs, and an introduction of knit qualities and construction techniques.

Prerequisites: FD101, FD103, FD105, FD107

FD202 Introduction to Fashion Business

Lecture Hrs: 60 Lab Hrs: 0 Credit Hrs: 2

This course is designed to provide students with the skills and knowledge needed to develop research and analyze how the fashion business works. Includes on-campus and industry field trips to a variety of fashion related business sources.

FD205 Computer-Aided Patternmaking

Lecture Hrs: 10 Lab Hrs: 50 Credit Hrs: 2

A continuation of Patternmaking (FD 107), this course introduces advanced theory and practice in developing flat pattern designs. The student will be introduced to computer-aided design software for Patternmaking.

Prerequisites: FD101, FD103, FD107, FD209

FD207 Fashion Industry Overview

Lecture Hrs: 60 Lab Hrs: 0 Credit Hrs: 2

This course offers a comprehensive overview of the fashion industry. Special attention is given to research, production, and marketing. The student will be introduced to the skills necessary to effectively function in the fashion industry.

FD209 Computer-Aided Fashion Design

Lecture Hrs: 10 Lab Hrs: 50 Credit Hrs: 2

This course provides an introduction to computer-aided fashion design software programs. Areas of instruction include creation of flat sketches, colorizing designs, story board assembly, textile design, and creation of cost and specification sheets.

FD210 Patternmaking II

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

This course is a continuation of Patternmaking I with an emphasis on drafting advanced patterns and garment construction. The student will be provided with the skills necessary to create full scale patterns by using the flat pattern technique.

Prerequisites: FD101, FD103, FD107

FD212 Advanced Clothing Construction**Lecture Hrs: 0****Lab Hrs: 60****Credit Hrs: 2**

Students are introduced to advanced sewing skills and required to use those along with the techniques and sewing skills they acquired in beginning construction and intermediate construction to design and create projects to be shown in the final fashion show.

Prerequisites: *FD101, FD103, FD107, FD200*

FD301 Design Collection**Lecture Hrs: 0****Lab Hrs: 90****Credit Hrs: 3**

In this student directed course the student will prepare a collection of garments for use in a runway show. Students will apply knowledge and skills acquired throughout the program to sketch, design, draft patterns, select fabrics, and construct garments in the collection.

Prerequisites: *FD101, FD103, FD105, FD107, FD109, FD111, FD200, FD202, FD205, FD207, FD209, FD212*

FDEXT311 Externship**Clock Hrs: 90****Credit Hrs: 2**

In this course the student will spend 90 hours in the field of fashion design. Students can begin accumulating hours for externship after passing the required skills sets as outlined by the course curriculum.

Prerequisites: *FD101, FD103, FD105, FD107, FD109, FD111*

FASHION DESIGN- DIPLOMA (DE)

Objective

The demand for talented and ambitious fashion designers is greater now more than any time in the history of fashion. It is the goal of this program to deliver a quality education in fashion design reflective of industry standards. To that end, the program is designed to provide students with the knowledge, skills and experience necessary for entry-level positions in the fashion industry. Utilization of a high-tech/high-touch approach to Fashion Design education combined with first rate curriculum, and excellent instruction is intended to provide our graduates with the necessary competencies to successfully meet the rigors and demands of the highly complex and competitive industry.

Classroom Procedures

A student may enter the program at the scheduled start dates and continue through the sequence until completion of all courses. Students will complete all courses in Phase I prior to moving on to Phase II.

Career Path

After completion of the Fashion Design program, the student will have developed the skills and knowledge necessary to enter a variety of positions in the fashion industry. Career opportunities are available in many areas such as design, patternmaking, quality assurance, merchandising, sales, product development, management, and international sourcing.

FASHION DESIGN- DIPLOMA (DE)

AH104 Career and Life Development	Lecture Hrs: 50	Lab Hrs: 10	Credit Hrs: 2
Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.			
FD101 Design Foundations	Lecture Hrs: 60	Lab Hrs: 0	Credit Hrs: 2
This course provides a thorough look at the fundamentals and principles of design with an emphasis on artistic expression through a complete understanding of the design process. Design as it relates to all arts is discussed. Emphasis is placed on utilization of good design principles in creative expression.			
FD103 Beginning Clothing Construction	Lecture Hrs: 30	Lab Hrs: 30	Credit Hrs: 2
This course introduces the student to basic principles and techniques of apparel assembly. Theoretical concepts will be applied practically in progressively advancing sewing projects. The student will be provided with the knowledge and skills necessary to create basic and simple designs.			
FD105 Textiles	Lecture Hrs: 60	Lab Hrs: 0	Credit Hrs: 2
This course provides an expansive look at the design, structure and application of textiles. Students are introduced to a broad scope of topics such as fiber structure and innovation, construction of fabrics, quality issues and regulation of textiles.			
FD107 Patternmaking	Lecture Hrs: 30	Lab Hrs: 30	Credit Hrs: 2
This course provides theory and practice in developing flat pattern design for custom garment construction. Major components of the garment are addressed: bodice, collar, skirt and sleeve. Multi-level manipulations and design variations are addressed to show the integration of basic skills in limitless design possibilities.			
FD109 History of Fashion	Lecture Hrs: 60	Lab Hrs: 0	Credit Hrs: 2
This course provides a historical overview of dress from the ancient world to the trends of today. It takes into account the social, geographical, environmental, cultural and artistic perspectives that influence the design and production of clothing.			
FD111 Fashion Sketching	Lecture Hrs: 30	Lab Hrs: 30	Credit Hrs: 2
This course introduces the student to fashion sketching with a focus on drawing the fashion figure, fabric shapes, and garment details. Sketching accessories and descriptive rendering techniques will be presented to further advance the skills of the student.			
FD113 Apparel Production	Lecture Hrs: 60	Lab Hrs: 0	Credit Hrs: 2
This course provides a thorough overview of the pre-production processes of apparel product development: planning, forecasting, fabricating, developing silhouettes and specifications, pricing, and sourcing. It establishes the necessary coordination of these processes to result in successful production of a line of clothing. Students will learn the concept of technical packages.			
FD200 Intermediate Clothing Construction	Lecture Hrs: 10	Lab Hrs: 50	Credit Hrs: 2
A continuation of Beginning Clothing Construction (FD 103), this course provides the student with advanced knowledge and skills for increased levels of proficiency in clothing construction, including, handling specialty fabrics, creation of complex designs, and an introduction of knit qualities and construction techniques. Prerequisites: FD101, FD103, FD105, FD107			
FD202 Introduction to Fashion Business	Lecture Hrs: 60	Lab Hrs: 0	Credit Hrs: 2
This course is designed to provide students with the skills and knowledge needed to develop research and analyze how the fashion business works. This course includes on-campus and industry field trips to a variety of fashion related business sources.			
FD205 Computer-Aided Patternmaking	Lecture Hrs: 10	Lab Hrs: 50	Credit Hrs: 2
A continuation of Patternmaking (FD 107), this course introduces advanced theory and practice in developing flat pattern designs. The student will be introduced to computer-aided design software for Patternmaking. Prerequisites: FD101, FD103, FD107, FD209			
FD207 Fashion Industry Overview	Lecture Hrs: 60	Lab Hrs: 0	Credit Hrs: 2
This course offers a comprehensive overview of the fashion industry. Special attention is given to research, production, and marketing. The student will be introduced to the skills necessary to effectively function in the fashion industry.			
FD209 Computer-Aided Fashion Design	Lecture Hrs: 10	Lab Hrs: 50	Credit Hrs: 2
This course provides an introduction to computer-aided fashion design software programs. Areas of instruction include creation of flat sketches, colorizing designs, story board assembly, textile design, and creation of cost and specification sheets.			
FD210 Patternmaking II	Lecture Hrs: 30	Lab Hrs: 30	Credit Hrs: 2
This course is a continuation of Patternmaking I with an emphasis on drafting advanced patterns and garment construction. The student will be provided with the skills necessary to create full scale patterns by using the flat pattern technique. Prerequisites: FD101, FD103, FD107			

FD212 Advanced Clothing Construction**Lecture Hrs: 0****Lab Hrs: 60****Credit Hrs: 2**

Students are introduced to advanced sewing skills and required to use those along with the techniques and sewing skills they acquired in beginning construction and intermediate construction to design and create projects to be shown in the final fashion show.

Prerequisites: *FD101, FD103, FD107, FD200*

FD301 Design Collection**Lecture Hrs: 0****Lab Hrs: 90****Credit Hrs: 3**

In this student directed course the student will prepare a collection of garments for use in a runway show. Students will apply knowledge and skills acquired throughout the program to sketch, design, draft patterns, select fabrics, and construct garments in the collection.

Prerequisites: *FD101, FD103, FD105, FD107, FD109, FD111, FD200, FD202, FD205, FD207, FD209, FD212*

FD300 Capstone**Lab Hrs: 60****Credit Hrs: 2**

In this course, students will complete a project that culminates their experience in the Fashion Design program. Students will work in conjunction with their instructor to determine their project topic and requirements.

Prerequisites: *FD101, FD103, FD105, FD107, FD109, FD111*

FASHION DESIGN - DIPLOMA (Hybrid)

Objective

The demand for talented and ambitious fashion designers is greater now more than any time in the history of fashion. It is the goal of this program to deliver a quality education in fashion design reflective of industry standards. To that end, the program is designed to provide students with the knowledge, skills and experience necessary for entry-level positions in the fashion industry. Utilization of a high-tech/high-touch approach to fashion design education combined with first rate curriculum, and excellent instruction is intended to provide our graduates with the necessary competencies to successfully meet the rigors and demands of the highly complex and competitive industry.

Classroom Procedures

Career and Life Development (AH104) is required for students and is taken online. A student may enter the program at the scheduled start dates and continue through the sequence until completion of all courses. Students will complete all courses in Phase I prior to moving on to Phase II. Fashion Design related courses will meet 3 hours per week on campus and the remaining hours will be completed online.

Career Path

After completion of the Fashion Design program, the student will have developed the skills and knowledge necessary to enter a variety of positions in the fashion industry. Career opportunities are available in many areas such as design, patternmaking, quality assurance, merchandising, sales, product development, management, and international sourcing.

FASHION DESIGN - DIPLOMA (Hybrid)

AH104 Career and Life Development

Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 2

Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.

FD101 Design Foundations

Lecture Hrs: 60 Lab Hrs: 0 Credit Hrs: 2

This course provides a thorough look at the fundamentals and principles of design with an emphasis on artistic expression through a complete understanding of the design process. Design as it relates to all arts is discussed. Emphasis is placed on utilization of good design principles in creative expression.

FD103 Beginning Clothing Construction

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

This course introduces the student to basic principles and techniques of apparel assembly. Theoretical concepts will be applied practically in progressively advancing sewing projects. The student will be provided with the knowledge and skills necessary to create basic and simple designs.

FD105 Textiles

Lecture Hrs: 60 Lab Hrs: 0 Credit Hrs: 2

This course provides an expansive look at the design, structure and application of textiles. Students are introduced to a broad scope of topics such as fiber structure and innovation, construction of fabrics, quality issues and regulation of textiles.

FD107 Patternmaking

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

This course provides Lecture and practice in developing flat pattern design for custom garment construction. Major components of the garment are addressed: bodice, collar, skirt and sleeve. Multi-level manipulations and design variations are addressed to show the integration of basic skills in limitless design possibilities.

FD109 History of Fashion

Lecture Hrs: 60 Lab Hrs: 0 Credit Hrs: 2

This course provides a historical overview of dress from the ancient world to the trends of today. It takes into account the social, geographical, environmental, cultural and artistic perspectives that influence the design and production of clothing.

FD111 Fashion Sketching

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

This course introduces the student to fashion sketching with a focus on drawing the fashion figure, fabric shapes, and garment details. Sketching accessories and descriptive rendering techniques will be presented to further advance the skills of the student.

FD113 Apparel Production

Lecture Hrs: 60 Lab Hrs: 0 Credit Hrs: 2

This course provides a thorough overview of the pre-production processes of apparel product development: planning, forecasting, fabricating, developing silhouettes and specifications, pricing, and sourcing. It establishes the necessary coordination of these processes to result in successful production of a line of clothing. Students will learn the concept of technical packages.

FD200 Intermediate Clothing Construction

Lecture Hrs: 10 Lab Hrs: 50 Credit Hrs: 2

A continuation of Beginning Clothing Construction (FD 103), this course provides the student with advanced knowledge and skills for increased levels of proficiency in clothing construction, including, handling specialty fabrics, creation of complex designs, and an introduction of knit qualities and construction techniques.

Prerequisites: FD101, FD103, FD105, FD107

FD202 Introduction to Fashion Business

Lecture Hrs: 60 Lab Hrs: 0 Credit Hrs: 2

This course is designed to provide students with the skills and knowledge needed to develop research and analyze how the fashion business works. Includes on-campus and industry field trips to a variety of fashion related business sources.

FD205 Computer-Aided Patternmaking

Lecture Hrs: 10 Lab Hrs: 50 Credit Hrs: 2

A continuation of Patternmaking (FD 107), this course introduces advanced theory and practice in developing flat pattern designs. The student will be introduced to computer-aided design software for Patternmaking.

Prerequisites: FD101, FD103, FD107, FD209

FD207 Fashion Industry Overview

Lecture Hrs: 60 Lab Hrs: 0 Credit Hrs: 2

This course offers a comprehensive overview of the fashion industry. Special attention is given to research, production, and marketing. The student will be introduced to the skills necessary to effectively function in the fashion industry.

FD209 Computer-Aided Fashion Design

Lecture Hrs: 10 Lab Hrs: 50 Credit Hrs: 2

This course provides an introduction to computer-aided fashion design software programs. Areas of instruction include creation of flat sketches, colorizing designs, story board assembly, textile design, and creation of cost and specification sheets.

FD210 Patternmaking II

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

This course is a continuation of Patternmaking I with an emphasis on drafting advanced patterns and garment construction. The student will be provided with the skills necessary to create full scale patterns by using the flat pattern technique.

Prerequisites: FD101, FD103, FD107

FD212 Advanced Clothing Construction**Lecture Hrs: 0****Lab Hrs: 60****Credit Hrs: 2**

Students are introduced to advanced sewing skills and required to use those along with the techniques and sewing skills they acquired in beginning construction and intermediate construction to design and create projects to be shown in the final fashion show.

Prerequisites: *FD101, FD103, FD107, FD200*

FD301 Design Collection**Lecture Hrs: 0****Lab Hrs: 90****Credit Hrs: 3**

In this student directed course the student will prepare a collection of garments for use in a runway show. Students will apply knowledge and skills acquired throughout the program to sketch, design, draft patterns, select fabrics, and construct garments in the collection.

Prerequisites: *FD101, FD103, FD105, FD107, FD109, FD111, FD200, FD202, FD205, FD207, FD209, FD212*

FDEXT311 Externship**Clock Hrs: 90****Credit Hrs: 2**

In this course the student will spend 90 hours in the field of fashion design. Students can begin accumulating hours for externship after passing the required skills sets as outlined by the course curriculum.

Prerequisites: *FD101, FD103, FD105, FD107, FD109, FD111*

INTERIOR DESIGN - DIPLOMA (Resident)

Objective

Interior Designers possess the knowledge to address the functionality, safety, and quality of interior spaces through research and aesthetic vision. It is the goal of this program to deliver a quality education in interior design reflective of industry standards. To that end, the program is designed to provide students with the knowledge, skills and experience necessary for entry-level positions in the interior design industry. Utilization of a high-tech/high-touch approach to interior design education combined with first rate curriculum, an excellent instruction is intended to provide our graduates with the necessary competencies to successfully meet the rigors and demands of the industry.

Classroom Procedures

A student may enter the program at the scheduled start dates and continue through the sequence until completion of all courses. Students will complete all courses in Phase I prior to moving on to Phase II. Interior Design courses meet 20 hours per week. Career and Life Development are held at Community Care College. The externship is undertaken following the successful completion of all classroom training and consists of 180 hours. Students may locate their own externship site for consideration or may use sites previously established with the College. This externship is unpaid and the hours of attendance are determined by the externship site. Students are required to attend at least 20 hours per week while fulfilling externship requirements.

Career Path

After completion of the Interior Design program, the student will have developed the skills and knowledge necessary to obtain an entry-level position in the Interior Design industry. Career opportunities are available in residential and niche markets, as well as commercial markets such as healthcare, hospitality, and other businesses where good design can attract more business.

INTERIOR DESIGN - DIPLOMA (Resident)

AH105 Career and Life Development

Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 2

Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.

ID101 Introduction to Interior Design

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

This course provides a comprehensive overview of the field of interior design. Students will be introduced to the foundational elements of interior design and their application in creating safe, functional, comfortable, and aesthetically pleasing spaces.

ID103 Drafting for Interior Designers

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

This course is intended to provide students with the skills necessary to draft in a beautiful manner using the right tools. Instruction will focus on creating beautifully rendered designs as a means to effectively communicate design ideas, enhance CAD drawings by adding personal and artistic touches, and bolster design sales.

ID105 Color Theory and Use

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

This course presents traditional color theory and practical applications in residential and commercial spaces in conjunction with fundamental design principles. Students will engage in an exploration of the human response to color, including personal and cultural perceptions.

ID107 Computer-Aided Design I

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

This course provides a thorough introduction to AutoCAD and its application for interior designers. Students will learn operational skills to effectively create basic CAD drawings. This course allows progression through more advanced skills to graphically produce designs effectively.

ID111 Lighting for Interior Design

Lecture Hrs: 40 Lab Hrs: 20 Credit Hrs: 2

This course examines the fundamentals of quality lighting design within the context of the design process and applications in interior design. Students will learn the principles of lighting, electrical sources, effects on color, and different types of luminaires. Additionally, students will be introduced to human factors and environmental considerations pertaining to lighting design.

ID113 Materials and Specifications

Lecture Hrs: 40 Lab Hrs: 20 Credit Hrs: 2

Elemental in good design is the selection, care, and code compliance associated with materials for interiors. This course provides the student with a comprehensive overview of interior materials including characteristics, specifications, and installation processes in project management.

ID203 History of Interior Design

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

This course provides a comprehensive global survey of design in architecture, interiors, furniture, and accessories from the ancient times to the present. Although this course will focus primarily on Western civilizations, Eastern design history will be explored as well.

Prerequisites: ID101, ID103, ID105, ID107, ID109, ID111, ID113, ID115, ID117

ID115 Space Planning

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

Students explore the technical and aesthetic aspects of textiles and their use in interior design. The nature of man-made and natural fibers and their production, application, and performance will be studied. Emphasis is placed on product knowledge, specifications, technology, safety, and terminology.

ID117 Textiles

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

Students will learn to efficiently and effectively block out interior spatial areas for both public and private spaces, define circulation patterns, and develop plans for furniture, partitions, and equipment within an existing building shell. Students will also gain knowledge of ergonomics, and familiarity with building codes.

ID109 Computer-Aided Design II

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

A continuation of Communicating Design, this course introduces the student to more advanced CAD skills. Upon completion of this course, students will have been exposed to the necessary skills and techniques for effectively producing designs reflective of their design ideas and concepts.

ID201 Design Studio I: Residential

Lecture Hrs: 60 Lab Hrs: 0 Credit Hrs: 2

This studio course utilizes the design process in the analysis and planning of residential environments with special consideration given to the interaction of the individual in the space using computer-aided and hand drafting techniques and rendering for visualization of design solutions. Special consideration is given to sustainable design with emphasis on green materials and practices.

Prerequisites: ID101, ID103, ID105, ID107, ID109, ID111, ID113, ID115, ID117

ID205 Design Studio II: Special Populations

Lecture Hrs: 60 Lab Hrs: 0 Credit Hrs: 2

This studio course continues the study of interior design through research and analysis of problems and solutions for interior environments with emphasis on special groups such as children, the elderly, the disabled, and special markets. Students will use computer-aided and hand drafting techniques and rendering for visualization of design solutions.

Prerequisites: ID101, ID103, ID105, ID107, ID109, ID111, ID113, ID115, ID117

ID207 Sketching

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

When working face-to-face with clients, impromptu sketching skills are imperative to effectively communicate design ideas in response to client needs. This course facilitates the development of impromptu sketching skills of design students.

Prerequisites: ID101, ID103, ID105, ID107, ID109, ID111, ID113, ID115, ID117

ID209 Design Studio III: Small Spaces**Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2**

This studio course involves analysis and planning of small spaces such as office, hospitality and retail environments with emphasis on materials, lighting, codes and accessibility using computer-aided and hand drafting techniques and rendering for visualization of design solutions.

Prerequisites: *ID101, ID103, ID105, ID107, ID109, ID111, ID113, ID115, ID117*

ID211 Professional Practices**Lecture Hrs: 60 Lab Hrs: 0 Credit Hrs: 2**

This course provides an overview of the interior design profession. Attention will be given to careers in the profession, business practices, education, and skills necessary for success in the interior design industry.

Prerequisites: *ID101, ID103, ID105, ID107, ID109, ID111, ID113, ID115, ID117*

ID213 Design Studio IV: Commercial**Lecture Hrs: 60 Lab Hrs: 0 Credit Hrs: 2**

This studio course explores the utilization of construction documents to convey design intent for small scale commercial projects using computer-aided and hand drafting techniques and rendering for visualization of design solutions.

Prerequisites: *ID101, ID103, ID105, ID107, ID109, ID111, ID113, ID115, ID117*

ID215 Furniture Design**Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 2**

This course focuses on the process of designing furniture prototypes from the initial articulation of design objectives to the technical exploration of their manufacture. Topics such as construction, upholstery and manufacturing through discussions and assignments lead to the design of two original furniture prototypes.

Prerequisites: *ID101, ID103, ID105, ID107, ID109, ID111, ID113, ID115, ID117*

IDEXT411 Externship**Clock Hrs: 180 Lab Hrs: 0 Credit Hrs: 4**

In this course the student will spend 180 hours in the field of interior design. Students can begin accumulating hours for externship after passing the required skills sets as outlined by the course curriculum.

Prerequisites: *ID101, ID103, ID105, ID107, ID111, ID113, ID115, ID117, ID203, ID207, ID211, ID215, ID217*

INTERIOR DESIGN - DIPLOMA (DE)

AH104 Career and Life Development

Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 2

Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.

ID101 Introduction to Interior Design

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

This course provides a comprehensive overview of the field of interior design. Students will be introduced to the foundational elements of interior design and their application in creating safe, functional, comfortable, and aesthetically pleasing spaces.

ID103 Drafting for Interior Designers

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

This course is intended to provide students with the skills necessary to draft in a beautiful manner using the right tools. Instruction will focus on creating beautifully rendered designs as a means to effectively communicate design ideas, enhance CAD drawings by adding personal and artistic touches, and bolster design sales.

ID105 Color Theory and Use

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

This course presents traditional color theory and practical applications in residential and commercial spaces in conjunction with fundamental design principles. Students will engage in an exploration of the human response to color, including personal and cultural perceptions.

ID107 Computer-Aided Design I

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

This course provides a thorough introduction to AutoCAD and its application for interior designers. Students will learn operational skills to effectively create basic CAD drawings. This course allows progression through more advanced skills to graphically produce designs effectively.

ID111 Lighting for Interior Design

Lecture Hrs: 40 Lab Hrs: 20 Credit Hrs: 2

This course examines the fundamentals of quality lighting design within the context of the design process and applications in interior design. Students will learn the principles of lighting, electrical sources, effects on color, and different types of luminaires. Additionally, students will be introduced to human factors and environmental considerations pertaining to lighting design.

ID113 Materials and Specifications

Lecture Hrs: 40 Lab Hrs: 20 Credit Hrs: 2

Elemental in good design is the selection, care, and code compliance associated with materials for interiors. This course provides the student with a comprehensive overview of interior materials including characteristics, specifications, and installation processes in project management.

ID203 History of Interior Design

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

This course provides a comprehensive global survey of design in architecture, interiors, furniture, and accessories from the ancient times to the present. Although this course will focus primarily on Western civilizations, Eastern design history will be explored as well.

Prerequisites: ID101, ID103, ID105, ID107, ID109, ID111, ID113, ID115, ID117

ID115 Space Planning

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

Students explore the technical and aesthetic aspects of textiles and their use in interior design. The nature of man-made and natural fibers and their production, application, and performance will be studied. Emphasis is placed on product knowledge, specifications, technology, safety, and terminology.

ID117 Textiles

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

Students will learn to efficiently and effectively block out interior spatial areas for both public and private spaces, define circulation patterns, and develop plans for furniture, partitions, and equipment within an existing building shell. Students will also gain knowledge of ergonomics, and familiarity with building codes.

ID109 Computer-Aided Design II

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

A continuation of Communicating Design, this course introduces the student to more advanced CAD skills. Upon completion of this course, students will have been exposed to the necessary skills and techniques for effectively producing designs reflective of their design ideas and concepts.

Prerequisites: ID107

ID201 Design Studio I: Residential

Lecture Hrs: 60 Lab Hrs: 0 Credit Hrs: 2

This studio course utilizes the design process in the analysis and planning of residential environments with special consideration given to the interaction of the individual in the space using computer-aided and hand drafting techniques and rendering for visualization of design solutions. Special consideration is given to sustainable design with emphasis on green materials and practices.

Prerequisites: ID101, ID103, ID105, ID107, ID109, ID111, ID113, ID115, ID117

ID205 Design Studio II: Special Populations

Lecture Hrs: 60 Lab Hrs: 0 Credit Hrs: 2

This studio course continues the study of interior design through research and analysis of problems and solutions for interior environments with emphasis on special groups such as children, the elderly, the disabled, and special markets. Students will use computer-aided and hand drafting techniques and rendering for visualization of design solutions.

Prerequisites: ID101, ID103, ID105, ID107, ID109, ID111, ID113, ID115, ID117

ID207 Sketching

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

When working face-to-face with clients, impromptu sketching skills are imperative to effectively communicate design ideas in response to client needs. This course facilitates the development of impromptu sketching skills of design students.

Prerequisites: ID101, ID103, ID105, ID107, ID109, ID111, ID113, ID115, ID117

ID209 Design Studio III: Small Spaces**Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2**

This studio course involves analysis and planning of small spaces such as office, hospitality and retail environments with emphasis on materials, lighting, codes and accessibility using computer-aided and hand drafting techniques and rendering for visualization of design solutions.

Prerequisites: ID101, ID103, ID105, ID107, ID109, ID111, ID113, ID115, ID117

ID211 Professional Practices**Lecture Hrs: 60 Lab Hrs: 0 Credit Hrs: 2**

This course provides an overview of the interior design profession. Attention will be given to careers in the profession, business practices, education, and skills necessary for success in the interior design industry.

Prerequisites: ID101, ID103, ID105, ID107, ID109, ID111, ID113, ID115, ID117

ID213 Design Studio IV: Commercial**Lecture Hrs: 60 Lab Hrs: 0 Credit Hrs: 2**

This studio course explores the utilization of construction documents to convey design intent for small scale commercial projects using computer-aided and hand drafting techniques and rendering for visualization of design solutions.

Prerequisites: ID101, ID103, ID105, ID107, ID109, ID111, ID113, ID115, ID117

ID215 Furniture Design**Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 2**

This course focuses on the process of designing furniture prototypes from the initial articulation of design objectives to the technical exploration of their manufacture. Topics such as construction, upholstery and manufacturing through discussions and assignments lead to the design of two original furniture prototypes.

Prerequisites: ID101, ID103, ID105, ID107, ID109, ID111, ID113, ID115, ID117

ID300 Capstone**Lecture Hrs: 0 Lab Hrs: 120 Credit Hrs: 4**

In this course, students will complete a project that culminates their experience in the Interior Design program. Students will work in conjunction with their instructor to determine their project topic and requirements.

Prerequisites: ID101, ID103, ID105, ID107, ID111, ID113, ID115, ID117, ID203, ID207, ID211, ID215, ID217

INTERIOR DESIGN - DIPLOMA (Hybrid)

Objective

Interior Designers possess the knowledge to address the functionality, safety, and quality of interior spaces through research and aesthetic vision. It is the goal of this program to deliver a quality education in interior design reflective of industry standards. To that end, the program is designed to provide students with the knowledge, skills and experience necessary for entry-level positions in the interior design industry. Utilization of a high-tech/high-touch approach to interior design education combined with first rate curriculum, an excellent instruction is intended to provide our graduates with the necessary competencies to successfully meet the rigors and demands of the industry.

Classroom Procedures

Career and Life Development (AH104) is required for students and is taken online. A student may enter the program at the scheduled start dates and continue through the sequence until completion of all courses. Students will complete all courses in Phase I prior to moving on to Phase II. Interior Design related courses will meet 3 hours per week on campus and the remaining hours will be completed online.

Career Path

After completion of the Interior Design program, the student will have developed the skills and knowledge necessary to obtain an entry-level position in the Interior Design industry. Career opportunities are available in residential and niche markets, as well as commercial markets such as healthcare, hospitality, and other businesses where good design can attract more business.

INTERIOR DESIGN - DIPLOMA (Hybrid)

AH104 Career and Life Development

Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 2

Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.

ID101 Introduction to Interior Design

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

This course provides a comprehensive overview of the field of interior design. Students will be introduced to the foundational elements of interior design and their application in creating safe, functional, comfortable, and aesthetically pleasing spaces.

ID103 Drafting for Interior Designers

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

This course is intended to provide students with the skills necessary to draft in a beautiful manner using the right tools. Instruction will focus on creating beautifully rendered designs as a means to effectively communicate design ideas, enhance CAD drawings by adding personal and artistic touches, and bolster design sales.

ID105 Color Theory and Use

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

This course presents traditional color theory and practical applications in residential and commercial spaces in conjunction with fundamental design principles. Students will engage in an exploration of the human response to color, including personal and cultural perceptions.

ID107 Computer-Aided Design I

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

This course provides a thorough introduction to AutoCAD and its application for interior designers. Students will learn operational skills to effectively create basic CAD drawings. This course allows progression through more advanced skills to graphically produce designs effectively.

ID109 Computer-Aided Design II

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

A continuation of Communicating Design, this course introduces the student to more advanced CAD skills. Upon completion of this course, students will have been exposed to the necessary skills and techniques for effectively producing designs reflective of their design ideas and concepts.

ID111 Lighting for Interior Design

Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 2

This course examines the fundamentals of quality lighting design within the context of the design process and applications in interior design. Students will learn the principles of lighting, electrical sources, effects on color, and different types of luminaires. Additionally, students will be introduced to human factors and environmental considerations pertaining to lighting design.

ID113 Materials and Specifications

Lecture Hrs: 60 Lab Hrs: 0 Credit Hrs: 2

Elemental in good design is the selection, care, and code compliance associated with materials for interiors. This course provides the student with a comprehensive overview of interior materials including characteristics, specifications, and installation processes in project management.

ID115 Textiles

Lecture Hrs: 60 Lab Hrs: 0 Credit Hrs: 2

Students explore the technical and aesthetic aspects of textiles and their use in interior design. The nature of man-made and natural fibers and their production, application, and performance will be studied. Emphasis is placed on product knowledge, specifications, technology, safety, and terminology.

ID117 Space Planning

Lecture Hrs: 60 Lab Hrs: 0 Credit Hrs: 2

Students will learn to efficiently and effectively block out interior spatial areas for both public and private spaces, define circulation patterns, and develop plans for furniture, partitions, and equipment within an existing building shell. Students will also gain knowledge of ergonomics, and familiarity with building codes.

ID201 Design Studio I: Residential

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

This studio course utilizes the design process in the analysis and planning of residential environments with special consideration given to the interaction of the individual in the space using computer-aided and hand drafting techniques and rendering for visualization of design solutions. Special consideration is given to sustainable design with emphasis on green materials and practices.

Prerequisites: ID101, ID103, ID105, ID107, ID109, ID111, ID113, ID115, ID117

ID203 History of Interior Design

Lecture Hrs: 60 Lab Hrs: 0 Credit Hrs: 2

This course provides a comprehensive global survey of design in architecture, interiors, furniture, and accessories from the ancient times to the present. Although this course will focus primarily on Western civilizations, Eastern design history will be explored as well.

Prerequisites: ID101, ID103, ID105, ID107, ID109, ID111, ID113, ID115, ID117

ID205 Design Studio II: Special Populations

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

This studio course continues the study of interior design through research and analysis of problems and solutions for interior environments with emphasis on special groups such as children, the elderly, the disabled, and special markets. Students will use computer-aided and hand drafting techniques and rendering for visualization of design solutions.

Prerequisites: ID101, ID103, ID105, ID107, ID109, ID111, ID113, ID115, ID117

ID207 Sketching

Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2

When working face-to-face with clients, impromptu sketching skills are imperative to effectively communicate design ideas in response to client needs. This course facilitates the development of impromptu sketching skills of design students.

Prerequisites: ID101, ID103, ID105, ID107, ID109, ID111, ID113, ID115, ID117

ID209 Design Studio III: Small Spaces**Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2**

This studio course involves analysis and planning of small spaces such as office, hospitality and retail environments with emphasis on materials, lighting, codes and accessibility using computer-aided and hand drafting techniques and rendering for visualization of design solutions.

Prerequisites: ID101, ID103, ID105, ID107, ID109, ID111, ID113, ID115, ID117

ID211 Professional Practices**Lecture Hrs: 60 Lab Hrs: 0 Credit Hrs: 2**

This course provides an overview of the interior design profession. Attention will be given to careers in the profession, business practices, education, and skills necessary for success in the interior design industry.

Prerequisites: ID101, ID103, ID105, ID107, ID109, ID111, ID113, ID115, ID117

ID213 Design Studio IV: Commercial**Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2**

This studio course explores the utilization of construction documents to convey design intent for small scale commercial projects using computer-aided and hand drafting techniques and rendering for visualization of design solutions.

Prerequisites: ID101, ID103, ID105, ID107, ID109, ID111, ID113, ID115, ID117

ID215 Furniture Design**Lecture Hrs: 30 Lab Hrs: 30 Credit Hrs: 2**

This course focuses on the process of designing furniture prototypes from the initial articulation of design objectives to the technical exploration of their manufacture. Topics such as construction, upholstery and manufacturing through discussions and assignments lead to the design of two original furniture prototypes.

Prerequisites: ID101, ID103, ID105, ID107, ID109, ID111, ID113, ID115, ID117

IDEXT311 Externship**Clock Hrs: 180 Lab Hrs: 0 Credit Hrs: 4**

In this course the student will spend 180 hours in the field of interior design. Students can begin accumulating hours for externship after passing the required skills sets as outlined by the course curriculum.

Prerequisites: ID101, ID103, ID105, ID107, ID111, ID113, ID115, ID117, ID203, ID207, ID211, ID215, ID217

MAKEUP ARTISTRY/COSMETICIAN - DIPLOMA (Resident)

Description

The Makeup Artistry/Cosmetician diploma program is designed to prepare students for entry-level positions in the industry. In the Makeup Artistry program, students learn full makeup application procedures including daytime and evening makeup application, wedding and prom makeup, latex, rubber, prosthetics, character makeup, as well as movie and TV applications. Students also learn basic hairstyling, artistic as it would apply to a makeup artist and will be knowledgeable in makeup ingredients. An emphasis is also placed on professionalism, resume writing, and building a portfolio.

Classroom Procedures

Each course stands alone as a unit of study. A student may enter the program at the beginning of a course and continue through the sequence until completion of all courses with the exception of MAK107 must be completed before MAK215 and MAK106. For all course groupings, "I" courses should be taken before the "II" courses. Classes meet full time (30 hours per week) and part time (20 hours per week). Career and Life Development is held at Community Care College.

Career Path

Once finished with the Makeup Artistry program and passing the Oklahoma State Board of Cosmetology and Barbering Cosmetician exam students can work in a salon or spa as a makeup artist, become a freelance makeup artist, work with modeling or runway companies, or work with movie and/or theatrical companies.

Diploma

Total Hrs:	900
Total Semester Hours of Credit:	30
Total Weeks:	31(full time) or 45(part-time)
Clock Hrs:	Lecture/Lab
Credential Earned:	Diploma and qualifies student to take the Oklahoma State Board written and practical examinations
Academic Year:	Full-time - 24 credits/32 weeks (Term Type B) or Part-time 24 credits/36 weeks (Term Type C)

Course No.	Course Title	Clock Hours	Credit Hours
AH105	Career and Life Development	50/10	2
MAK107	Basics of Hairstyling	10/20	1
MAK215	Thermal Styling *	5/25	1
MAK106	Long Hair Styles *	5/25	1
MAK105	Business and Marketing for a Makeup Artist	25/5	1
MAK110	Infection Control for the Makeup Artist	20/10	1
MAK112	Fundamentals of Makeup	15/15	1
MAK201	Spa Makeup Applications	5/25	1
MAK203	Camouflage and Corrective Makeup	10/20	1
MAK114	Special Event Makeup	10/20	1
MAK116	Makeup for Television	10/20	1
MAK118	Avant-Garde and High Fashion Makeup	5/25	1
MAK120	Photography for a Makeup Artist	10/20	1
MAK124	Airbrushing	10/20	1
MAK208	Body Art and Advanced Airbrushing Techniques *	5/25	1
MAK126	Prosthetics	10/20	1
MAK212	Prosthetics-Fitting and Application *	5/25	1
MAK128	Special FX	5/25	1
MAK210	Advanced Special FX *	5/25	1
MAK211	Character Makeup I	5/25	1
MAK213	Character Makeup II *	5/25	1
MAK231	Advanced Beauty Techniques	5/25	1
MAK122	Wigs 101	10/20	1
MAK130	History of Hair and Makeup	5/25	1
MAK214	Hair and Makeup Through the Ages *	5/25	1
MAK235	Makeup Illusions	5/25	1
MAK216	Extreme Transformation Makeup	5/25	1
MAK227	State Board Rules and Regulations	25/5	1
MAK300	State Board Review	5/25	1

These clock hours encompass all requirements of the following Oklahoma State Board of Cosmetology and Barbering requirements: Bacteriology, sterilization and sanitation – 60, Make-up application – 200, Hair arranging – 200, Salon Development – 90, Cosmetology rules, regulations, and law - 50

* Course requires a prerequisite prior to taking course.

MAKEUP ARTISTRY/COSMETICIAN - DIPLOMA (Resident)

AH105 Career and Life Development

Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 2

Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.

MAK107 Basics of Hairstyling

Lecture Hrs: 10 Lab Hrs: 20 Credit Hrs: 1

This course covers basic hair structure, growth and properties of the scalp, including disease and disorders. Students will understand base controls, hair design considerations and composition, as well as products used in hair styling. Students will learn the steps and procedures for client consultations.

MAK215 Thermal Styling

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

To achieve the Cosmetician license, students must be able to perform the Cosmetician roller set and comb out, performed with hot rollers. Thermal Styling teaches students how to work with curling irons, flat irons, and various other iron styles. Students will learn the proper positioning and maintenance for these tools and at the end of the course should be proficient in their use as well as safety protocols.

Prerequisite: MAK107

MAK106 Long Hair Styles

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

In this course students will learn various techniques for styling long hair including up-dos, braiding, pinning, bridal, and period styles. Students will learn techniques suitable for editorial work, special events, photo shoots, and runway.

Prerequisite: MAK107

MAK105 Business and Marketing for a Makeup Artist

Lecture Hrs: 25 Lab Hrs: 5 Credit Hrs: 1

In this course, students will learn how to shape and enhance their professional image. Students will also learn the importance of their portfolio, personal image, online presence with social media, and marketing for a makeup artist. Using networking techniques to build your business, identifying career options and employment opportunities will be discussed.

MAK110 Infection Control for the Makeup Artist

Lecture Hrs: 20 Lab Hrs: 10 Credit Hrs: 1

The study of infection control principles and practices as it applies to a makeup artist, including all levels of decontamination will be discussed. This course also includes contraindication for hair and makeup services.

MAK112 Fundamentals of Makeup

Lecture Hrs: 15 Lab Hrs: 15 Credit Hrs: 1

This course is an introductory course designed to give the student an overview of basic facial anatomy and physiology of the skin. Students will learn the tools used in makeup application and color theory for appropriate makeup selection and application.

MAK201 Spa Makeup Applications

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

In Spa Makeup Applications, students review basic makeup applications and concepts as well as learn basic corrective and contouring techniques. Appropriate face shape and facial feature applications will be discussed. Students will perform typical spa/salon makeup looks including the state board regulated makeup application.

MAK203 Camouflage and Corrective Makeup

Lecture Hrs: 10 Lab Hrs: 20 Credit Hrs: 1

In this course, students will build off of their basic contouring knowledge and perform detailed contouring. Students will also learn how to apply makeup to correct disfigurement and scarring along with tattoo cover up. Procedures and practice of applying makeup for mature, acnaic, and male skin will also be covered.

MAK114 Special Event Makeup

Lecture Hrs: 10 Lab Hrs: 20 Credit Hrs: 1

In this course, students will learn all the do's and don'ts for every occasion. Day, afternoon, and evening bride, and all makeup looks for prom and formal occasions.

MAK116 Makeup for Television

Lecture Hrs: 10 Lab Hrs: 20 Credit Hrs: 1

Makeup can look altered under the bright lights of TV and photo shoots. In this course, students learn correct procedures to apply makeup for photo shoots and for TV appearance. High definition TV makeup will also be covered.

MAK118 Avant-Garde and High Fashion Makeup

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

Students get to think completely out of the box and create Avant-Garde and runway looks. This course will also include strip lash and lash tabbing application.

MAK120 Photography for a Makeup Artist

Lecture Hrs: 10 Lab Hrs: 20 Credit Hrs: 1

In this course, students will learn how to take portfolio quality pictures to build their business visually. The basics of back grounds, lighting, and angles will be covered. Students will also learn how to properly edit still pictures, and videos.

MAK124 Airbrushing

Lecture Hrs: 10 Lab Hrs: 20 Credit Hrs: 1

The Airbrushing course includes basic knowledge of an airbrush machine and maintenance. After completing the course, students will be able to airbrush foundation, bronzer, blush, and eye shadow.

MAK208 Body Art and Advanced Airbrushing Techniques	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
The Airbrushing II course continues basic knowledge of an airbrush machine and maintenance. Students will learn airbrushing with advanced techniques for film and television. Students will also learn body airbrushing and temporary tattoo application.			
Prerequisite: MAK124			
MAK126 Prosthetics	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
This course gives the student an introduction to enhancement materials added to the face for movie, theatrical and character makeup. Students will learn about the composition of the products in making prosthetics. Students will make a life cast of the face, mold with clay to form the prosthetic they create, and work with latex, rubber, and silicone to create each piece.			
MAK212 Prosthetics-Fitting and Application	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
This course will teach the students how to properly fit and apply all prosthetics made in Prosthetics.			
Prerequisite: MAK126			
MAK128 Special FX	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
In this course students will learn how to apply advanced special effect techniques. Students will create various bruises, cuts, scrapes and wounds using a bruise wheel, gelatin, latex, and other materials.			
MAK210 Advanced Special FX	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
In this course students will continue to learn how to apply advanced special effect techniques. Students will create various bruises, cuts, scrapes and wounds using a bruise wheel, gelatin, latex and other materials. Students will make a blood bladder to make wounds bleed on camera, and distort features on the models.			
Prerequisite: MAK128			
MAK211 Character Makeup I	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
Character makeup focuses on finding or creating a character and producing a replica on their model's face. Students will perform old age makeup, period makeup, and learn basic theater techniques.			
MAK213 Character Makeup II	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
Students will design their own fantasy, horror or Sci-Fi characters, and then watch them come alive as they work to create the look they have designed. Students will have the opportunity to work in conjunction with fashion design students to understand how costumes play a role in designing characters and makeup.			
Prerequisite: MAK211			
MAK231 Advanced Beauty Techniques	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
Students will be introduced to new fashion makeup trends and advanced detailing with makeup.			
MAK122 Wigs 101	Lecture Hrs: 10	Lab Hrs: 20	Credit Hrs: 1
Students will learn how to create and style a wig. Students will also learn how to create a front lace beard and eyebrows.			
MAK130 History of Hair and Makeup	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
Students will learn about different hairstyles and makeup techniques dating back to 4000 BC. Students will perform Egyptian, Edwardian, Tribal, and many more hair and makeup looks.			
MAK214 Hair and Makeup Through the Ages	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
Different hairstyles and makeup techniques from the roaring 20's to the future we can only imagine will be studied.			
Prerequisite: MAK130			
MAK235 Makeup Illusions	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
In this course, students will learn the theory of sculptural light and shading along with various brush techniques as it applies to shading and highlighting. Students will also learn to create illusions making their models blend into their background. 3-D makeup applications will be discussed and practiced.			
MAK216 Extreme Transformation Makeup	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
This course continues the study of the theory of sculptural light and shading. After completing this course, students will have the knowledge and skill to create a blank canvas on anyone and to transform them into looking like a celebrity using only contour and highlighting.			
MAK227 State Board Rules and Regulations	Lecture Hrs: 25	Lab Hrs: 5	Credit Hrs: 1
The Oklahoma State Board Rules and Regulations will be covered in this course, teaching students how to obtain their license and ensure they are practicing makeup artistry safely and within the regulations of the state board. This course also serves as the student's final prep and final test week.			
MAK300 State Board Review	Lecture Hrs: 5	Lab Hrs: 25	Credit Hrs: 1
In this course students will review written, practical and the rules and statutes requirements for licensure.			

MASSAGE THERAPY - DIPLOMA (Resident)

Objective

The Massage Therapist plays an important role in the growing healthcare fields of preventative healthcare, sports and wellness systems. Students learn anatomy and physiology of the body as it relates to soft tissue injury and treatment. Students engage in supervised "hands-on" training in traditional Swedish massage and other modalities such as hydrotherapy, sports massage, clinical protocols, chair massage, reflexology, aromatherapy, lymphatic massage, and therapeutic spa treatments. Students are certified in CPR. This program equips the graduate with the skills and knowledge necessary to meet the requirements of an entry-level Massage Therapist and the ability to assume such a position. After passing the MBLEX exam and gaining licensure through the Oklahoma State Board of Cosmetology and Barbering students will be eligible for positions in a wide range of health related workplaces such as: sports medicine clinics, orthopedic offices, physical/occupational therapy, assisted living facilities or naturopathic clinic are possible options for graduates.

Classroom Procedures

Each course stands alone as a unit of study and is not dependent upon prerequisite training. A student may enter the program at the beginning of any course and continue through the sequence until completion of all courses. Career and Life Development (AH100) is required for any residential students and is taken Monday through Thursday from 8:00am to 1:00pm or 5:30pm to 10:30pm at Community Care College. Massage related courses meet 20 hours per week.

MASSAGE THERAPY - DIPLOMA (Resident)

AH100 Career and Life Development

Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 3

Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.

MT111 Massage Therapy as a Profession

Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1

This course is designed to introduce the student to the vocation of therapeutic massage. It reviews the basic job description and duties of the massage therapist. It goes over a brief history of massage therapy, progress and setbacks over the ages, and overview of basic techniques and modalities. In addition, this course includes lab work in Swedish massage.

MT113 Law and Ethics/HIPAA

Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1

This course is designed to help the student define scope of practice, code of ethics, and standards of profession as a massage therapist, and to clarify state and federal patient care regulations, including HIPAA. In addition, this course includes lab work in Swedish massage.

MT115 Medical Terminology & Body Systems

Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1

This course is based on the use of vocabulary utilized in massage therapy. The emphasis is to equip the student with a thorough working knowledge of medical language. The student will learn and receive an overall view of the basic anatomy of the body systems. In addition, this course includes lab work in Swedish massage.

MT118 Spa Management and Tools of the Trade

Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1

This course is designed to introduce the student to the clinical setting and the role that a massage therapist would play. The value of treatment planning, documentation and scope of practice will be defined. Students will also discuss the tools of the trade and how to identify which ones are most in demand. In addition, this course includes lab work in Swedish and seated massage.

MT217 Skeletal System

Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1

This course is designed to introduce the student to the anatomy and pathologies of the skeletal system and joints. Students will be introduced to Swedish gymnastics and ROM exercises. In addition, this course includes lab work in Swedish massage and role play of related pathologies.

MT121 Muscular System

Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1

This course is designed to introduce the student to the anatomy and pathologies muscular system, its functions, histology, anatomy, chemistry, nomenclature, contractions, and fiber movement. In addition, this course includes lab work in Swedish massage and role play of related pathologies.

MT123 Nervous System

Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1

This course is designed to introduce the student to the anatomy and pathologies of the nervous system of the human body, its functions, structures, and its role in pleasure and pain. In addition, this course includes lab work in Swedish massage, hot stone massage, and role play of related pathologies.

MT124 Allied Modalities

Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1

This course is designed to introduce the student to the various adjunctive forms of therapeutic massage. Students will have hands-on experience in lab with some of the most common modalities utilized in clinical practice. These include but are not limited to studies in Craniosacral therapy, seated massage, pregnancy massage, cupping, and sound therapy.

MT127 Sanitation, Safety, & Hygiene

Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1

This course is designed to introduce the student to correct procedures to ensure a safe massage environment for them and their clients, as well as how to follow clinical protocols for universal precautions. In addition, this course includes lab work in Swedish massage.

MT129 Endocrine System & Reflexology

Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1

This course is designed to introduce the student to the anatomy and pathologies of the endocrine system, its functions, structures, chemistry. In addition, this course includes lab work and study of massage modality of Reflexology.

MT132 Integumentary & Respiratory Systems/CPR

Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1

This course is designed to introduce the student to the anatomy and pathologies of the integumentary and respiratory systems of the human body, its functions, structures, and chemistry. In addition, this course includes lab work in Swedish massage and role play of related pathologies. Students will also complete CPR training and will receive a two-year certification in Basic Life Support (BLS) for the Healthcare Provider.

MT133 Urinary & Reproductive Systems

Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1

This course is designed to introduce the student to the anatomy and pathologies of the urinary and reproductive systems of the human body, its functions, structures, and chemistry. In addition, this course includes lab work in the basics of pregnancy massage and role play of related pathologies.

MT137 Wellness Components

Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1

This course is designed to introduce the student to the components of wellness, client education, and client communication in order to encourage clients to maintain the benefits of their massages. In addition, this course includes lab work in Swedish massage.

MT138 Digestive System and Special Populations**Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1**

This course is designed to introduce the student to the anatomy and pathologies of the digestive system, its functions, structures, and chemistry. This course will also help the student adapt to the unique situations and special needs including physical, emotional, and health related challenges. In addition, this course includes lab work in the basics of pregnancy massage and role play of related pathologies.

MT211 Asian Bodywork Therapy**Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1**

This course is designed to introduce the student to Asian massage therapy. Identify the difference in eastern and western approaches to health and medicine. Describe the Five Element theory and Yin Yang perspective. In addition, this course is designed to introduce the student the basic practice and techniques of shiatsu massage.

MT213 Deep Tissue & Neuromuscular Therapy: Extremities**Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1**

This course is designed to introduce the student to the practice of deep tissue, rehabilitative massage, specific clinical techniques, protocols, and muscles of the appendicular skeleton. In addition, this course includes understanding the physiological effects of each technique, when to implement these techniques and how to pair with Swedish techniques to a massage session.

MT215 Deep Tissue & Neuromuscular Therapy: Torso**Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1**

This course is designed to introduce the student to the practice of deep tissue, rehabilitative massage, specific clinical techniques, protocols, and muscles of the axial skeleton. In addition, this course includes understanding the physiological effects of each technique, when to implement these techniques and how to pair with Swedish techniques to a massage session.

MT222 Clinical Applications & Sports Massage**Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1**

This course will introduce the student to the practice of using specific focused clinical techniques to address pain and to focus on injuries caused by sports, active lifestyles or trauma on athletes and other populations. Students will use their kinesiology and anatomy knowledge to determine specific tissues to be treated. In addition, the student will be introduced to the practice and techniques of event sports massage.

MT223 Therapeutic Spa**Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1**

This course is designed to introduce the student to the latest trends and techniques in therapeutic spa. In addition, the students will receive practical experience in performing the latest treatments.

MT226 Lymphatic and Cardiovascular Systems**Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1**

This course is designed to introduce the student to the anatomy and pathologies of the lymphatic and cardiovascular systems, their functions, structures, chemistry, and the benefit of massage on these systems. In addition, they will learn the cause and effect of blood pressure and heart rate. In addition, the student will be introduced to the techniques and practice of lymphatic drainage massage and role play of related pathologies.

MT227 Biomechanics and Kinesiology**Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1**

This course is designed to introduce the student to the interaction between the skeletal system, joints, muscles, and neural activity. Students will understand how proper body and table mechanics can enhance and protect their massage practice. In addition, this course includes lab work in Swedish massage and side-lying position and draping.

MT229 Business and Marketing**Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1**

This course is designed to help prepare the student for running and marketing a successful private practice and to promote themselves as massage professionals.

MT300 Certification Review**Lecture Hrs: 20 Lab Hrs: 0 Credit Hrs: 1**

This course is designed to prepare student for their program written exam as well as the national massage exams of NCTMB, NCTM, & MBLEX.

Prerequisites: MT111, MT113, MT115, MT217, MT121, MT123, MT127, MT129, MT131, MT133, MT137, MT211, MT213, MT215, MT221, MT223, MT227, MT229

MTEXT200 Student Clinic**Clock Hrs: 180 Credit Hrs: 4**

The Student Clinic is undertaken as practical experience to follow the skills taught in massage labs and training exercises and consists of 180 hours. Students will obtain their Student Clinic hours at locations deemed certified and acceptable by Clary Sage College. The Student Clinic is unpaid and the hours of attendance will be determined by the site. Students can begin accumulating hours for the Student Clinic after passing the required skills sets as outlined by the course curriculum.

MASSAGE THERAPY - DIPLOMA (Part time)

Objective

The Massage Therapist plays an important role in the growing healthcare fields of preventative healthcare, sports and wellness systems. Students learn anatomy and physiology of the body as it relates to soft tissue injury and treatment. Students engage in supervised “hands-on” training in traditional Swedish massage and other modalities such as hydrotherapy, sports massage, clinical protocols, chair massage, reflexology, aromatherapy, lymphatic massage, and therapeutic spa treatments. Students are certified in CPR. This program equips the graduate with the skills and knowledge necessary to meet the requirements of an entry-level Massage Therapist and the ability to assume such a position. After passing the MBLEX exam and gaining licensure through the Oklahoma State Board of Cosmetology and Barbering students will be eligible for positions in a wide range of health related workplaces such as: sports medicine clinics, orthopedic offices, physical/occupational therapy, assisted living facilities or naturopathic clinic are possible options for graduates.

Classroom Procedures

Each course stands alone as a unit of study and is not dependent upon prerequisite training. A student may enter the program at the beginning of any course and continue through the sequence until completion of all courses. Career and Life Development (AH106) will be taken online. Massage related courses meet 10 hours per week.

This course is designed to introduce the student to correct procedures to ensure a safe massage environment for them and their clients, as well as how to follow clinical protocols for universal precautions. In addition, this course includes lab work in Swedish massage.

MT129 Endocrine System & Reflexology

Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1

This course is designed to introduce the student to the anatomy and pathologies of the endocrine system, its functions, structures, chemistry. In addition, this course includes lab work and study of massage modality of Reflexology.

MT132 Integumentary & Respiratory Systems/CPR

Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1

This course is designed to introduce the student to the anatomy and pathologies of the integumentary and respiratory systems of the human body, its functions, structures, and chemistry. In addition, this course includes lab work in Swedish massage and role play of related pathologies. Students will also complete CPR training and will receive a two-year certification in Basic Life Support (BLS) for the Healthcare Provider.

MT133 Urinary & Reproductive Systems

Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1

This course is designed to introduce the student to the anatomy and pathologies of the urinary and reproductive systems of the human body, its functions, structures, and chemistry. In addition, this course includes lab work in the basics of pregnancy massage and role play of related pathologies.

MT137 Wellness Components

Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1

This course is designed to introduce the student to the components of wellness, client education, and client communication in order to encourage clients to maintain the benefits of their massages. In addition, this course includes lab work in Swedish massage.

MT138 Digestive System and Special Populations	Lecture Hrs: 10	Lab Hrs: 10	Credit Hrs: 1
This course is designed to introduce the student to the anatomy and pathologies of the digestive system, its functions, structures, and chemistry. This course will also help the student adapt to the unique situations and special needs including physical, emotional, and health related challenges. In addition, this course includes lab work in the basics of pregnancy massage and role play of related pathologies.			
MT211 Asian Bodywork Therapy	Lecture Hrs: 10	Lab Hrs: 10	Credit Hrs: 1
This course is designed to introduce the student to Asian massage therapy. Identify the difference in eastern and western approaches to health and medicine. Describe the Five Element theory and Yin Yang perspective. In addition, this course is designed to introduce the student the basic practice and techniques of shiatsu massage.			
MT213 Deep Tissue & Neuromuscular Therapy: Extremities	Lecture Hrs: 10	Lab Hrs: 10	Credit Hrs: 1
This course is designed to introduce the student to the practice of deep tissue, rehabilitative massage, specific clinical techniques, protocols, and muscles of the appendicular skeleton. In addition, this course includes understanding the physiological effects of each technique, when to implement these techniques and how to pair with Swedish techniques to a massage session.			
MT215 Deep Tissue & Neuromuscular Therapy: Torso	Lecture Hrs: 10	Lab Hrs: 10	Credit Hrs: 1
This course is designed to introduce the student to the practice of deep tissue, rehabilitative massage, specific clinical techniques, protocols, and muscles of the axial skeleton. In addition, this course includes understanding the physiological effects of each technique, when to implement these techniques and how to pair with Swedish techniques to a massage session.			
MT222 Clinical Applications & Sports Massage	Lecture Hrs: 10	Lab Hrs: 10	Credit Hrs: 1
This course will introduce the student to the practice of using specific focused clinical techniques to address pain and to focus on injuries caused by sports, active lifestyles or trauma on athletes and other populations. Students will use their kinesiology and anatomy knowledge to determine specific tissues to be treated. In addition, the student will be introduced to the practice and techniques of event sports massage.			
MT223 Therapeutic Spa	Lecture Hrs: 10	Lab Hrs: 10	Credit Hrs: 1
This course is designed to introduce the student to the latest trends and techniques in therapeutic spa. In addition, the students will receive practical experience in performing the latest treatments.			
MT226 Lymphatic and Cardiovascular Systems	Lecture Hrs: 10	Lab Hrs: 10	Credit Hrs: 1
This course is designed to introduce the student to the anatomy and pathologies of the lymphatic and cardiovascular systems, their functions, structures, chemistry, and the benefit of massage on these systems. In addition, they will learn the cause and effect of blood pressure and heart rate. In addition, the student will be introduced to the techniques and practice of lymphatic drainage massage and role play of related pathologies.			
MT227 Biomechanics and Kinesiology	Lecture Hrs: 10	Lab Hrs: 10	Credit Hrs: 1
This course is designed to introduce the student to the interaction between the skeletal system, joints, muscles, and neural activity. Students will understand how proper body and table mechanics can enhance and protect their massage practice. The Student Clinic is unpaid and the hours of attendance will be determined by the site. Students can begin accumulating hours for the Student Clinic after passing the required skills sets as outlined by the course curriculum.			

MASTER INSTRUCTOR - DIPLOMA (Resident)

Description

Students enrolled in this course will learn teaching strategies, classroom strategies, classroom management, school management, Oklahoma State Board compliance, and record keeping. Student currently holding their Cosmetology, Esthetic license, Nail Technician, as well as students who are registered for either exam with the Oklahoma State Board of Cosmetology and Barbering may enroll in this program.

Classroom Procedures

Each course stands alone as a unit of study and is not dependent upon prerequisite training. A student may enter the program at the beginning of any course and continue through the sequence until completion of all courses. Classes meet full time (30 hours per week) and part time (20 hours per week or 15 hours per week). Career and Life Development is held at Community Care College. All instruction is residential.

Career Path

In completion of this course, the student will have developed the skills and knowledge necessary for taking the Oklahoma State Board of Cosmetology and Barbering Master Instructor Exam (if holding a Cosmetology license) or the Oklahoma State Board of Cosmetology and Barbering Esthetic Instructor Exam (if holding an Esthetic license) or the Oklahoma State Board of Cosmetology and Barbering Nail Technician Instructor Exam (if holding a Nail Technician license). After completion of the Master Educator course, students who hold a Cosmetology license may teach as a Master Instructor which includes the areas of Cosmetology, Esthetics, Nail Technology, and Master Instructor. Students who complete the Master Educator course while holding an Esthetic license will be able to Esthetics, or Esthetic Instructors and those holding a Nail Technician license will be able to teach Nail Technicians, or Nail Technician Instructors.

AH105 Career and Life Development

Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 2

Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.

MIN102 Introduction to Education

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

This course provides the student with an understanding of the qualities and characteristics desired to be an effective educator. Students will learn self-motivation and time management skills. Emphasis will be placed on developing a positive attitude and winning personality to ensure the student's success. Lesson planning and development will also be discussed. Students will teach both theory and practical lessons in their department of specialty under the direction of a master instructor.

MIN105 Building Relationships

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

In this course students will learn how as educators they will develop strong professional relationships with learners, faculty members, administrative personnel, the industry, family members of learners and the community or public. Students will be assisting in the practical and theory classroom.

MIN107 Program Development

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

This course assists the student in outlining the steps taken when developing educational curriculum. The student will learn how to write learning objectives and outcomes for a topic of instruction. Components of lesson plan development and the advantages to planning lessons will be identified. Students will gain an understanding of the importance of an advisory council when developing curriculum. Students will assist in the Phase 1 classroom.

MIN113 Effective Classroom Management

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

This course provides the student with the skills needed to manage learner behavior in a classroom setting. The student will learn various techniques used when dealing with learner misconduct. Appropriate academic advising and counseling in the educational setting will be discussed. Classroom arrangements and educational activities to promote a positive learning environment will also be addressed. Students will assist with practical applications in the salon clinic.

MIN117 Teaching in a Salon Clinic

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

This course introduces the student to the concept of team work within the school setting. Students will gain understanding of the important role played by the clinic as part of the learning institutions source of revenue. Students will learn how to assist learners with the development of a client base. The importance of a positive public image for success of the institution will be discussed. Students will teach both theory and practical lessons in the Phase 1 classroom under the guidance of a master instructor.

MIN121 Teaching to Diverse Learning Styles

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

This course will introduce the student to the characteristics of adult learners. The student will gain an understanding of the two major elements of how people learn. The student will be able to define the four learning styles and the challenges of each. The 4MAT cycle of learning will also be discussed. Students will teach both theory and practical lessons in the nail technology department under the direction of a master instructor.

MIN123 Multiple Learning Methods

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

This course will introduce the student to various teaching methods and techniques used to inspire the learner in the classroom setting. The student will learn the purpose and benefits of planning field trips and guest speakers as educational tools. The incorporation of group work, workbooks, visual aids, and storytelling into teaching strategies will also be addressed. Students will teach both theory and practical lessons in the Phase 1 classroom under the guidance of a master instructor.

MIN125 Achieving Learner Results

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

In this course the student will learn techniques that can be utilized with learners who have special needs and those with chronic behavior concerns. We will discuss the general barriers to learning as well as effective study habits. Students will assist in the salon clinic.

MIN127 Professional Performance Evaluation

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

This course will assist the student in understanding the purpose of a professional performance evaluation. The general standards and qualities of assessment and evaluation will be discussed. The student will learn how to develop and implement a professional-development plan. The student will understand the importance of continuing education as a master educator. Students will assist with practical applications in the salon clinic.

MIN131 Intro to Oklahoma State Board of Cosmetology and Barbering Rules and Statutes

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

This course will introduce the general provisions, structure, and rules of practice for the Oklahoma State Board of Cosmetology and Barbering. The student will learn the general provisions and licensure of cosmetology schools and other cosmetology establishments. Sanitation and safety standards will be discussed. Students will participate in practical practices to prepare them for the Oklahoma State Board of Cosmetology and Barbering examinations.

MIN135 Theory Classroom Management

Lecture Hrs: 0 Lab Hrs: 30 Credit Hrs: 1

This course will provide the student with advanced practical training in the theory room under the direction of a licensed master instructor in various subjects and courses. The student will practice developing and presenting lesson plans.

MIN137 Theory Classroom Management

Lecture Hrs: 0 Lab Hrs: 30 Credit Hrs: 1

This course will provide the student with advanced practical training in the theory room under the direction of a licensed master instructor in various subjects and courses. The student will practice developing and presenting lesson plans.

MASTER INSTRUCTOR WITH EXPERIENCE - DIPLOMA (Resident)

Description

Students enrolled in this course will learn teaching strategies, classroom strategies, classroom management, school management, Oklahoma State Board compliance, and record keeping. Student currently holding their Cosmetology, Barbering, Esthetic, Nail Technician, as well as 2 years of recent documented experience may enroll in this program.

Classroom Procedures

Each course stands alone as a unit of study and is not dependent upon prerequisite training. A student may enter the program at the beginning of any course and continue through the sequence until completion of all courses. Classes meet full time (30 hours per week) and part time (20 hours per week or 15 hours per week).

Career Path

In completion of this course, the student will have developed the skills and knowledge necessary for taking the Oklahoma State Board of Cosmetology and Barbering Master Instructor Exam (if holding a Cosmetology license) or the Oklahoma State Board of Cosmetology and Barbering Esthetic Instructor Exam (if holding an Esthetic license) or the Oklahoma State Board of Cosmetology and Barbering Nail Technician Instructor Exam (if holding a Nail Technician license) or the Oklahoma State Board of Cosmetology and Barbering Master Barber Instructor Exam (if holding a Barber license). After completion of the Master Educator course and after obtaining the instructor license, students who hold a Cosmetology license may teach as a Master Instructor which includes the areas of Cosmetology, Esthetics, Nail Technology, and Master Instructor. Students who complete the Master Educator course while holding an Esthetic license will be able to teach Esthetics or Esthetic Instructors, and those holding a Nail Technician license will be able to teach Nail Technician, or Nail Technician Instructors. Those students who complete the Master Educator course while holding a Barber license will be able to teach Barbering or Barber instructors.

Diploma

Total Hrs:	300
Total Semester Hours of Credit:	10
Total Weeks:	10 (full time day) or 20 (part time day – 15 hours per week) or 15 (part-time evening)
Clock Hrs:	Lecture/Lab
Credential Earned:	Diploma and qualifies student to take the Oklahoma State Board written and practical examinations
Academic Year:	Academic Year: Full-time – 300 hours/10 weeks (Non term) or Part-time 300 hours/15 weeks (Non term)

Course No.	Course Title	Clock Hours	Credit Hours

The student will be able to define the four learning styles and the challenges of each. The 4MAT cycle of learning will also be discussed. Students will teach both theory and practical lessons in the nail technology department under the direction of a master instructor.

MIN123 Multiple Learning Methods

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

This course will introduce the student to various teaching methods and techniques used to inspire the learner in the classroom setting. The student will learn the purpose and benefits of planning field trips and guest speakers as educational tools. The incorporation of group work, workbooks, visual aids, and storytelling into teaching strategies will also be addressed. Students will teach both theory and practical lessons in the Phase 1 classroom under the guidance of a master instructor.

MIN125 Achieving Learner Results

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

In this course the student will learn techniques that can be utilized with learners who have special needs and those with chronic behavior concerns. We will discuss the general barriers to learning as well as effective study habits. Students will assist in the salon clinic.

MIN127 Professional Performance Evaluation

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

This course will assist the student in understanding the purpose of a professional performance evaluation. The general standards and qualities of assessment and evaluation will be discussed. The student will learn how to develop and implement a professional-development plan. The student will understand the importance of continuing education as a master educator. Students will assist with practical applications in the salon clinic.

MIN131 Intro to Oklahoma State Board of Cosmetology and Barbering Rules and Statutes

Lecture Hrs: 5 Lab Hrs: 25 Credit Hrs: 1

This course will introduce the general provisions, structure, and rules of practice for the Oklahoma State Board of Cosmetology and Barbering. The student will learn the general provisions and licensure of cosmetology schools and other cosmetology establishments. Sanitation and safety standards will be discussed. Students will participate in practical practices to prepare them for the Oklahoma State Board of Cosmetology and Barbering examinations.

NAIL TECHNICIAN - DIPLOMA (Resident)

Description

The Nail Technician Program combines theory & laboratory experiences needed to provide the student with skills necessary to acquire a license through examination by the Oklahoma State Board of Cosmetology and Barbering. Students will learn manicuring and pedicuring, nail repair, artificial nail application and nail art. Along with nail techniques, salon development will also be taught.

Classroom Procedures

Each course stands alone as a unit of study and is not dependent upon prerequisite training. A student may enter the program at the beginning of any course and continue through the sequence until completion of all courses except for completion of Phase I before taking Phase II. Classes meet full time (30 hours per week) and part time (20 hours per week). Career and Life Development is held at Community Care College.

Career Path

After completion of the Nail Technician Program, the student will have developed the skills and knowledge necessary for taking the Oklahoma State Board of Cosmetology and Barbering Nail Technician exam. While some nail technicians choose to work in a salon setting, others choose to work in spas, hotels, or open their own business.

Diploma

These clock hours encompass all requirements of the following Oklahoma State Board of Cosmetology and Barbering requirements: Bacteriology, Sterilization and Sanitation - 40, Nail Structure, Composition, Disorders, and Diseases - 60, Manicuring and Pedicuring - 160, Artificial Nails - 160, Nail Art- 60, Salon Development – 80, Cosmetology Law - 40

NAIL TECHNICIAN - DIPLOMA (Resident)

AH105 Career and Life Development

Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 2

Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.

NAL123 History of Nail Industry

Lecture Hrs: 12 Lab Hrs: 18 Credit Hrs: 1

This course will provide the student with an orientation to the history of nail technology, the dawn of the artificial nail enhancement and technological advancements. Industry opportunities will also be discussed. Students will learn acrylic product ratio as it pertains to consistency and control in application. Students will gain skills necessary to develop proficient acrylic application including safety and sanitation.

NAL152 Nail Structure and Growth, Manicures

Lecture Hrs: 6 Lab Hrs: 24 Credit Hrs: 1

In this course the student will learn sanitation and disinfection and the appropriate usage of each procedure. The Student will learn how to handle and maintain the tools necessary for manicuring. Students will also gain knowledge of the basic manicure, nail shapes, polish application and hand and arm massage for basic and spa manicures.

NAL154 Pedicures

Lecture Hrs: 6 Lab Hrs: 24 Credit Hrs: 1

This course will provide the student with the basic skills needed to perform manicures and pedicures. The supplies and implements to be used in conjunction with a basic pedicure will also be discussed. Students will strengthen their knowledge of sanitation and disinfection with the purpose of handling and maintaining the tools necessary for a basic pedicure. The student will receive instruction on nail assessment along with massage techniques for the feet.

NAL156 Professionalism and Communication

Lecture Hrs: 6 Lab Hrs: 24 Credit Hrs: 1

This course will provide the students with an extensive review of professionalism, client care and salon business courses as they pertain to the nail industry. Students will prepare for State Board written and practical exams.

NAL158 Infection Control

Lecture Hrs: 6 Lab Hrs: 24 Credit Hrs: 1

Students will learn about bacteria. Proper sanitation and disinfection techniques used in the salon will also be discussed and demonstrated. Students will learn about their responsibilities as salon professionals.

NAL160 Anatomy and Physiology

Lecture Hrs: 6 Lab Hrs: 24 Credit Hrs: 1

In this course the student will gain knowledge of anatomy and physiology as it relates to the manicuring profession. Students will learn the importance of recognizing early signs of illness, disease, or poor health and how it can often be observed through the hair and nails since they are appendages of the skin.

NAL162 Histology

Lecture Hrs: 6 Lab Hrs: 24 Credit Hrs: 1

In this course the student will learn to thoroughly analyze the functions and components of the skin and the best way to understand how the skin works. They will also be taught the structures and composition of the nails and how they grow. Various diseases and disorders of the nails will also be discussed.

NAL164 Diseases and Disorders

Lecture Hrs: 6 Lab Hrs: 24 Credit Hrs: 1

This course addresses the applicable nail disorders and diseases that a nail technician needs to be familiar with, as well as the treatment and prevention of diseases. Various infectious agents found in a salon setting will be discussed along with the differences in sanitation and disinfection and the appropriate usage of each procedure. Salon safety issues related to chemical exposures and SDS materials will also be discussed. This course is designed to promote and explain information as it relates to the nail technician profession.

NAL125 Chemistry and Electricity

Lecture Hrs: 6 Lab Hrs: 24 Credit Hrs: 1

This course will provide the student with a basic understanding of chemistry and how it relates to the nail industry. Students will learn the difference between organic and inorganic chemistry, matter, elements compounds and mixtures. The basics of solutions, suspensions and emulsions will be identified. The potential for Hydrogen (pH scale) relating to salon products and product ingredient chemistry will also be discussed.

NAL168 Introduction to State Board Rules and Regulations

Lecture Hrs: 6 Lab Hrs: 24 Credit Hrs: 1

This course will examine the laws, rules, and regulations found in the Oklahoma State Board Rules and Regulations handbook. The students will review the practical and written exams for the state board nail technician license.

NAL127 UV Gels

Lecture Hrs: 6 Lab Hrs: 24 Credit Hrs: 1

After completing this course the student will be familiar with application methods necessary for ultraviolet light cured gels using both sculptured and overlay methods of artificial gel enhancements. Students will learn proper nail preparation methods for product application including LED cured gels, UV cured top coats, soak off gel lacquers, colored gels and safe gel removal.

NAL172 Acrylic Nails and Electric Filing

Lecture Hrs: 6 Lab Hrs: 24 Credit Hrs: 1

In this course students will learn necessary applications for applying and sculpting acrylic nails, using forms and acrylic over tips. The student will gain knowledge on the advanced techniques for two-color acrylic (white and pink powder). The students will receive instruction on types of filing, and the procedure for properly performing a two-color re balance using the electric file. The application of nail art using colored acrylic will also be demonstrated.

NAL174 Tips, Wraps, and No-light Gels**Lecture Hrs: 6****Lab Hrs: 24****Credit Hrs: 1**

In this course the student will be introduced to innovative skills for application of nail tips, wraps, dip nails and no-light gels.

NAL176 Advanced Acrylics**Lecture Hrs: 6****Lab Hrs: 24****Credit Hrs: 1**

This course will assist the student in the advanced acrylic techniques which include using forms and acrylic over tips. The student will gain knowledge on the advanced techniques for two-color acrylic (white and pink powder). The student will be taught how to properly perform a two-colored re balance using the electric file. The application of nail art using colored acrylic will also be demonstrated.

NAL178 Nail Art**Lecture Hrs: 6****Lab Hrs: 24****Credit Hrs: 1**

This course introduces the student to the techniques and tools used when creating nail art. Students will learn the foundation of nail art and various types of nail art performed in the salon setting. Students will demonstrate nail art techniques such as gold leafing, freehand painting, airbrushing, two-color fade and the French Manicure.

NAL182 Salon Development**Lecture Hrs: 6****Lab Hrs: 24****Credit Hrs: 1**

This course will assist the student in preparing for a job and becoming successful in the salon industry. Students will prepare a professional résumé; create a personal portfolio and a personal budget. They will learn interviewing techniques and identify personal qualities needed to succeed in the salon industry. Various types of salon businesses will be defined and compensation methods will be discussed.

NAL129 Sciences Review**Lecture Hrs: 6****Lab Hrs: 24****Credit Hrs: 1**

This course will provide the students with an extensive review of manicures, pedicures, nail disorders and diseases, salon ecology, anatomy, salon development, physiology and histology. Students will prepare for state board written and practical exams.

NAL184 State Board Rules and Regulations Review**Lecture Hrs: 6****Practical Hrs: 24****Credit Hrs: 1**

This course will provide the student with an extensive review of the nail technology textbook. Students will prepare for the state board exams both written and practical.

AUTOMOTIVE TECHNOLOGY – DIPLOMA (Resident)

Program Description

The Automotive Technology diploma program is designed to prepare skilled, entry-level technicians to work in the automotive industry. The program prepares the student to pursue certification through Automotive Service Excellence (ASE) with standards set forth by National Automotive Technicians Education Foundation Inc. (NATEF) in all eight performance areas.

Opportunities for graduates include entry-level positions in dealerships, service stations, automotive parts store, and companies with vehicle fleets as general technicians, positions include specialist in areas such as front-end alignment, brakes, or automatic transmissions, engine performance and others.

Program Outcomes

1. Conduct automotive service and repair with a focus upon customer satisfaction.
2. Apply the learning skills required to continue automotive technical career development.
3. Develop a level of professional image, attitude, and appearance that will contribute to the attainment of his/her employer's goals.
4. Use process-specific specialized service equipment to conduct automotive service.
5. Adapt to, and cope with, the elements of change in the automotive service industry.
6. Demonstrate systematic problem solving strategies in the automotive service setting.
7. Interpret the efficiency/effectiveness principles of the work-place required of an automotive technician.
8. Demonstrate the accurate use of trade-specific jargon.
9. Demonstrate safe service practices.

Program Goals

A graduate of this program should be able to:

- Possess an applied skill level sufficient for entry-level employment and advancement in the field of automotive service and repair.
- Demonstrate appropriate workplace behaviors and pursue ongoing technical skill development sufficient for employment in the field of automotive service and repair.
- Be successfully employed in the field of automotive service and repair.

AUTOMOTIVE TECHNOLOGY – DIPLOMA (Resident)

AH100 Career and Life Development

Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 3

Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.

AT1100 Safety and Industry

Lecture Hrs: 30 Lab Hrs: 45 Credit Hrs: 3

Students will be introduced to shop safety, OSHA, and EPA as it relates to the automotive industry. Students will also be given a general overview and understanding of tools and equipment, as well as various automotive systems. Industry certification will also be addressed in this course.

AT1110 Electrical

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

Students will study automotive electrical and electronic systems including electrical fundamentals, wiring circuits, and testing equipment. Students will learn how electricity flows, battery operation, how to diagnose systems and interpret diagrams, how to properly repair electrical circuit, and be introduced to simple diagnoses of electrical systems.

AT1120 Electrical Accessories

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

This course introduces students to driver information systems, accessory circuits, and starting and charging systems. Students will study starting and charging systems and how they work. Emphasis will be placed on lighting and signal circuits where students will learn to diagnose and repair problems with these components.

AT1130 Electronics

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

Students will be introduced to electronic circuits and safety systems, C.A.N. network system, and module controls. Study will focus on accessory circuits, safety systems and entertainment system circuits. Students will learn proper operation of these components and how to diagnose and repair problems within each.

AT1140 HVAC Principle and Operation

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

This course provides instruction on the principle of automotive heating and air conditioning systems and EPA regulations. Emphasis will be on the HVAC components and operation and EPA requirements for the automotive technician. Students will learn the diagnosis and repair of vehicle HVAC system, including air management, electrical and vacuum controls, refrigerant handling, and recovery.

AT1150 Steering and Suspension

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

Students will apply fundamental knowledge of complete suspension systems and operation. Study will focus on tires & wheel, tire pressure monitoring systems, and steering and suspension system. This will include proper alignment angles and alignment principles on today vehicles.

AT1160 Brake Systems and Operation

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

Student will learn the principles of braking systems, theory and operation of hydraulic and power brake system, disc and drum brake systems, and wheel bearings. This course will cover the functions and operations of the Anti-Lock Brakes and stability control systems. Emphasis will be placed on the diagnoses and operation of the braking system and the electronic stability control system.

AT1170 Engine Repair

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

In this course, students will gain an understanding of basic engine fundamentals, designs, and operations. Emphasis will be placed on the 4 stroke process and their operations, the oil and cooling systems, valve timing, and air flow of the combustion system.

AT1180 Engine Performance

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

This course provides basic instruction in engine performance. Engine malfunctions related to ignition systems and fuel systems, fundamental understanding of the engine inputs and output data within the electronic engine control and emission related systems. Students will focus on the engine management systems and diagnostic systems based on the engine performance, and the diagnoses and operation of these systems.

AT1190 Drivetrain Systems

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

This course introduces students to the basics of all transmissions, transaxles and driveline components. Students will learn the theory and operation of the transmission/transaxle and driveline components. Emphasis is placed on the fundamentals, diagnosis, and repair of these components for operation.

DIESEL TECHNOLOGY – DIPLOMA DIESEL TECHNOLOGY – ASSOCIATE OF OCCUPATIONAL SCIENCE (Resident)

Program Description

The Diesel Technology program will prepare students for employment as entry-level technicians in the maintenance, repair, service, and operation of medium/heavy diesel technology and equipment. The program combines theory with hands-on training designed to simulate the work environment and help students obtain the skills needed to excel in the field. Students will gain knowledge and skills in the following areas: Electronic Circuits, Cooling Systems, Truck Brake Systems, Steering and Drive Trains, Hydraulics, Torque Converters, and Alignment. Opportunities for graduates include entry-level positions in dealerships, service stations, private repair enterprises, franchised truck repair organizations, medium/heavy equipment maintenance shops, and companies with vehicle fleets as general technicians and many others.

The degree emphasizes business operations management, communication, leadership, and entrepreneurship for those students desiring management roles or to own their own business. Career and Life Development, Degree Requirement courses, and General Education courses are held at the Community Care College.

Program Outcomes

- Achieve a high level of craftsmanship and professionalism.
- Inspect, diagnose, and conduct failure analysis and preventive maintenance inspections during repairs.
- Use service resources effectively.
- Apply fundamental skills and concepts to unfamiliar situations.
- Provide superior customer service.
- Follow safe shop practices.
- Select and maintain appropriate tools.
- Demonstrate both oral and written communication skills effectively, and practice productive interpersonal relations.

Program Goals

A graduate of this program should be able to:

- Possess an applied skill level sufficient for entry-level employment and advancement in the field of medium/heavy diesel service and repair.
- Demonstrate appropriate workplace behaviors and pursue ongoing technical skill development sufficient for employment in the field of diesel service and repair.
- Be successfully employed in the field of diesel service and repair.

DIESEL TECHNOLOGY – DIPLOMA DIESEL TECHNOLOGY – ASSOCIATE OF OCCUPATIONAL SCIENCE (Resident)

AH100 Career and Life Development

Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 3

Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.

DT1113 Industry

Lecture Hrs: 50 Lab Hrs: 25 Credit Hrs: 3

Students will be introduced to shop safety, OSHA, and EPA as it relates to the diesel industry. Students will also be given a general overview and understanding of tools and equipment, as well as various diesel systems. Industry certification will also be addressed in this course.

DT1123 Electrical

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

Students will study diesel electrical and electronic systems including electrical fundamentals, wiring circuits, and testing equipment. Student will learn how electricity flows, batter operation, how to diagnose systems and interpret diagrams, how to properly repair electrical circuit, and be introduced to simple diagnoses of electrical systems.

DT1133 Electrical Systems

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

This course introduces students to electrical components and electrical equipment. Emphasis is placed on the electrical fundamentals, of how each system operates and their relationship to other systems. Students will learn the operation, function and diagnosis of the systems as well as various troubleshooting processes.

DT1143 HVAC/R & APU

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

This course provides instruction on the principle of heating, air conditioning, and refrigeration systems and EPA regulations. Emphasis will be on the HVAC components, operation and EPA requirements for the Technician. Students will learn the diagnosis and repair of vehicle HVAC system, including: air management, controls, refrigerant handling and recovery, mobile refrigeration and auxiliary power units.

DT1153 Diesel Engine Construction

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

In this course, students will learn diesel engine design, operation, construction, components and systems. Emphasis will be placed on internal and external components and their relationship to engine function.

DT1163 Diesel Engine Subsystems

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

In this course students will learn fuel systems, turbocharging, and emissions devices. Emphasis will be placed on engine performance, drivability and emissions related devices.

DT1173 Electronics

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

This course introduces students to multiplexing and network systems, Module controls, and advanced electronic systems. Emphasis is placed on the network communication, engine, body accessories, and electronic antilock brake systems. Students will learn to diagnose and repair problems with these systems.

DT1203 Steering and Suspension

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

In this course, students will learn fundamental knowledge of complete suspension systems, steering systems, fifth wheels, and operation. Emphasis will be tires, wheels, steering and suspension system, fifth wheels, and alignment procedures.

DT1213 Brakes

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

In this course, students will learn the principles of braking systems. Student will learn theory and operation of foundation brakes, hydraulic brakes, disc and drum brake systems, and Air brake systems. Emphasis will be on the diagnosis and repair of brakes and brake systems.

DT1223 Transmissions and Clutches

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

In this course students will learn clutches, manual transmissions and automated/ automatic transmissions. Emphasis will be on theory, operation, and repair of clutches and transmissions.

DT1233 Drivetrain, Hydraulics, and PMI

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

This course provides an introduction to drivelines, hydraulics and preventative maintenance. Emphasis is placed on understanding the function, operation, and diagnosis of drive shafts, u joints, wheel bearings, differentials, hydraulic systems, and preventative maintenance of trucks.

BUS2213 Principles of Business

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

Principles of Business will teach students the basis for business operations and professionalism with an emphasis on entrepreneurship and the risks and rewards of starting their own business or improving business processes in an existing business. Working in groups and making effective presentations will also be explored.

BUS2543 Information Technology and Trends

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

This is an introductory course to information systems in business. This course explains the difference between computer literacy and information literacy. Students will gain valuable insight on emerging trends, technologies, and applications. Students will look at the risks associated with information technologies, as well as the value of e-commerce.

MKT2423 Introduction to Marketing**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

Introduction to Marketing will provide the student with the knowledge to build customer relationships through effective marketing, to create and price products that will satisfy the customer and to develop integrated marketing communications.

MGT1373 Human Resources**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

The study of Human Resources will familiarize students with the legal and regulatory environment that pertains to the business world. Hiring, training and development, performance appraisals and compensation will all be discussed.

BUS2573 Entrepreneurship**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

Developing a business plan is one of the most important challenges an entrepreneur will face. The process of developing a good business plan requires an understanding and appreciation for the tools required to do it right. This course will explore some of the pitfalls of starting a business, the responsibilities of the owner and the resources available to help make an informed decision and reach the target market.

ACC2213 Accounting Principles**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

Accounting Principles is designed to give the student a full understanding of the accounting cycle and how to record financial data.

ENG2343 Business Communications**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

Business Communications (ENG 2343) teaches the principles of professional communications. Students will learn to use communication technologies for personal branding. The course also emphasizes effective speaking and listening skills.

BUS1353 Business Math**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

Business Mathematics (BUS 1353) students will receive a rapid review of basic mathematics (i.e., addition, subtraction, multiplication, division, fractions, percentages, and algebraic equations) with a view toward improving speed and accuracy. The Business Math course is designed to provide students with practical learning in key areas of business math applications. These skills include figuring percentages, discounts, taxes, payroll, and interest, and other math concepts.

MGT2213 Principles of Management**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

Principles of Management teach the foundations of management: planning organizing, execution of objectives and the dynamics and impact of leadership.

GEN1113 Critical Thinking and Problem Solving**Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3**

The Critical Thinking and Problem Solving (GEN 1113) course teaches basic principles and techniques in these important skills. This course provides instruction in an overview of critical thinking to include argument, rhetoric as a persuasion tool, fallacies, and types of reasoning. This course will specifically focus on using these critical thinking skills in writing, assessing credibility issues, and forming opinions. Additionally, it addresses problem-solving skills based on using critical thinking.

DIESEL TECHNOLOGY – ASSOCIATE OF OCCUPATIONAL SCIENCE (Hybrid)

Program Description

The Diesel Technology program will prepare students for employment as entry-level technicians in the maintenance, repair, service, and operation of medium/heavy diesel technology and equipment. The program combines theory with hands-on training designed to simulate the work environment and help students obtain the skills needed to excel in the field. Students will gain knowledge and skills in the following areas: Electronic Circuits, Cooling Systems, Truck Brake Systems, Steering and Drive Trains, Hydraulics, Torque Converters, and Alignment. Opportunities for graduates include entry-level positions in dealerships, service stations, private repair enterprises, franchised truck repair organizations, medium/heavy equipment maintenance shops, and companies with vehicle fleets as general technicians and many others. The degree emphasizes business operations management, communication, leadership, and entrepreneurship for those students desiring management roles or to own their own business.

Career and Life Development is held Monday through Thursday, 8 a.m. to 1 p.m. at the Community Care College campus. Degree Requirement courses and General Education courses are taken online.

Program Outcomes

- Achieve a high level of craftsmanship and professionalism.
- Inspect, diagnose, and conduct failure analysis and preventive maintenance inspections during repairs.
- Use service resources effectively.
- Apply fundamental skills and concepts to unfamiliar situations.
- Provide superior customer service.
- Follow safe shop practices.
- Select and maintain appropriate tools.
- Demonstrate both oral and written communication skills effectively, and practice productive interpersonal relations.

Program Goals

A graduate of this program should be able to:

- Possess an applied skill level sufficient for entry-level employment and advancement in the field of medium/heavy diesel service and repair.
- Demonstrate appropriate workplace behaviors and pursue ongoing technical skill development sufficient for employment in the field of diesel service and repair.
- Be successfully employed in the field of diesel service and repair.

DIESEL TECHNOLOGY – ASSOCIATE OF OCCUPATIONAL SCIENCE (Hybrid)

AH100 Career and Life Development

Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 3

Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.

DT1113 Industry

Lecture Hrs: 50 Lab Hrs: 25 Credit Hrs: 3

Students will be introduced to shop safety, OSHA, and EPA as it relates to the diesel industry. Students will also be given a general overview and understanding of tools and equipment, as well as various diesel systems. Industry certification will also be addressed in this course.

DT1123 Electrical

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

Students will study diesel electrical and electronic systems including electrical fundamentals, wiring circuits, and testing equipment. Student will learn how electricity flows, batter operation, how to diagnose systems and interpret diagrams, how to properly repair electrical circuit, and be introduced to simple diagnoses of electrical systems.

DT1133 Electrical Systems

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

This course introduces students to electrical components and electrical equipment. Emphasis is placed on the electrical fundamentals, of how each system operates and their relationship to other systems. Students will learn the operation, function and diagnosis of the systems as well as various troubleshooting processes.

DT1143 HVAC/R & APU

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

This course provides instruction on the principle of heating, air conditioning, and refrigeration systems and EPA regulations. Emphasis will be on the HVAC components, operation and EPA requirements for the Technician. Students will learn the diagnosis and repair of vehicle HVAC system, including: air management, controls, refrigerant handling and recovery, mobile refrigeration and auxiliary power units.

DT1153 Diesel Engine Construction

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

In this course, students will learn diesel engine design, operation, construction, components and systems. Emphasis will be placed on internal and external components and their relationship to engine function.

DT1163 Diesel Engine Subsystems

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

In this course students will learn fuel systems, turbocharging, and emissions devices. Emphasis will be placed on engine performance, drivability and emissions related devices.

DT1173 Electronics

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

This course introduces students to multiplexing and network systems, Module controls, and advanced electronic systems. Emphasis is placed on the network communication, engine, body accessories, and electronic antilock brake systems. Students will learn to diagnose and repair problems with these systems.

DT1203 Steering and Suspension

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

In this course, students will learn fundamental knowledge of complete suspension systems, steering systems, fifth wheels, and operation. Emphasis will be tires, wheels, steering and suspension system, fifth wheels, and alignment procedures.

DT1213 Brakes

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

In this course, students will learn the principles of braking systems. Student will learn theory and operation of foundation brakes, hydraulic brakes, disc and drum brake systems, and Air brake systems. Emphasis will be on the diagnosis and repair of brakes and brake systems.

DT1223 Transmissions and Clutches

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

In this course students will learn clutches, manual transmissions and automated/ automatic transmissions. Emphasis will be on theory, operation, and repair of clutches and transmissions.

DT1233 Drivetrain, Hydraulics, and PMI

Lecture Hrs: 20 Lab Hrs: 55 Credit Hrs: 3

This course provides an introduction to driveline, hydraulics and preventative maintenance. Emphasis is placed on understanding the function, operation, and diagnosis of drive shafts, u joints, wheel bearings, differentials, hydraulic systems, and preventative maintenance of trucks.

BUS2213 Principles of Business

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

Principles of Business will teach students the basis for business operations and professionalism with an emphasis on entrepreneurship and the risks and rewards of starting their own business or improving business processes in an existing business. Working in groups and making effective presentations will also be explored.

BUS2543 Information Technology and Trends

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

This is an introductory course to information systems in business. This course explains the difference between computer literacy and information literacy. Students will gain valuable insight on emerging trends, technologies, and applications. Students will look at the risks associated with information technologies, as well as the value of e-commerce.

MKT2423 Introduction to Marketing

Lecture Hrs: 45 Lab Hrs: 0 Credit Hrs: 3

Introduction to Marketing will provide the student with the knowledge to build customer relationships through effective marketing, to create and price products that will satisfy the customer and to develop integrated marketing communications.

MGT1373 Human Resources**Lecture Hrs: 45****Lab Hrs: 0****Credit Hrs: 3**

The study of Human Resources will familiarize students with the legal and regulatory environment that pertains to the business world. Hiring, training and development, performance appraisals and compensation will all be discussed.

BUS2573 Entrepreneurship**Lecture Hrs: 45****Lab Hrs: 0****Credit Hrs: 3**

Developing a business plan is one of the most important challenges an entrepreneur will face. The process of developing a good business plan requires an understanding and appreciation for the tools required to do it right. This course will explore some of the pitfalls of starting a business, the responsibilities of the owner and the resources available to help make an informed decision and reach the target market.

ACC2213 Accounting Principles**Lecture Hrs: 45****Lab Hrs: 0****Credit Hrs: 3**

Accounting Principles is designed to give the student a full understanding of the accounting cycle and how to record financial data.

ENG2343 Business Communications**Lecture Hrs: 45****Lab Hrs: 0****Credit Hrs: 3**

Business Communications (ENG 2343) teaches the principles of professional communications. Students will learn to use communication technologies for personal branding. The course also emphasizes effective speaking and listening skills.

BUS1353 Business Math**Lecture Hrs: 45****Lab Hrs: 0****Credit Hrs: 3**

Business Mathematics (BUS 1353) students will receive a rapid review of basic mathematics (i.e., addition, subtraction, multiplication, division, fractions, percentages, and algebraic equations) with a view toward improving speed and accuracy. The Business Math course is designed to provide students with practical learning in key areas of business math applications. These skills include figuring percentage, discounts, taxes, payroll, and interest, and other math concepts.

MGT2213 Principles of Management**Lecture Hrs: 45****Lab Hrs: 0****Credit Hrs: 3**

Principles of Management teach the foundations of management: planning organizing, execution of objectives and the dynamics and impact of leadership.

GEN1113 Critical Thinking and Problem Solving**Lecture Hrs: 45****Lab Hrs: 0****Credit Hrs: 3**

The Critical Thinking and Problem Solving (GEN 1113) course teaches basic principles and techniques in these important skills. This course provides instruction in an overview of critical thinking to include argument, rhetoric as a persuasion tool, fallacies, and types of reasoning. This course will specifically focus on using these critical thinking skills in writing, assessing credibility issues, and forming opinions. Additionally, it addresses problem-solving skills based on using critical thinking.

ELECTRICAL TECHNOLOGY – DIPLOMA (Resident)

Description

The Electrical Technology Program will prepare the student for entry-level employment as technicians in the design, operation, service, repair, installation of electrical systems and equipment. The Program combines theory with extensive practical hands-on training designed to simulate the actual work environment and skills needed to excel in this challenging field. Labs afford the student the opportunity to install, repair and/or operate a wide variety of actual field equipment.

Program Outcomes

1. Diagnose, repair and maintain common electrical system problems.
2. Communicate effectively with customers, managers and fellow workers.
3. Adhere to environmental laws and regulations as applied to electrical industry.
4. Demonstrate employability behaviors and work ethics.
5. Demonstrate and use terminology related to the industry.
6. Embrace the model of lifelong learning, accessing new information to remain current in industry trends.

Program Goals

A graduate of this program should be able to:

- Possess an applied skill level sufficient for entry-level employment and advancement in the Electrical field.
- Demonstrate appropriate workplace behaviors and pursue ongoing technical skill development sufficient for employment in the electrical field.
- Be successfully employed in the Electrical industry or maintain independence through self-employment.

Diploma

ELECTRICAL TECHNOLOGY – DIPLOMA (Resident)

AH100 Career and Life Development

Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.

Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 3

ET1101 Electrical Safety and Industry

Electrical safety in the workplace. Keeping electrical work safe. Career skills including work ethics, resume building. Finding the right job for you. How to keep your job and building employee relationships. History of electricity from its founders and their life stories.

Lecture Hrs: 20 Lab Hrs: 20 Credit Hrs: 1

ET2104 Electrical Theory

Electrical theory which pertains to Ohm's law with dc circuitry, Ohm's law expanded for calculation usage. Breakdown of matter to the atomic stage and the motion of sub-atomic particles. Series and parallel circuits and their usage. Article 90 & 110 of the National Electrical Code.

Lecture Hrs: 50 Lab Hrs: 50 Credit Hrs: 4

ET2114 Residential Installation

General information for electrical installations, Electrical symbols and outlets, determining the required number of lighting outlets, receptacle outlets, small appliance circuits. Conductor sizes and types, wiring methods, wire connections, voltage drop, switching outlets.

Lecture Hrs: 50 Lab Hrs: 50 Credit Hrs: 4

ET2124 Residential Lighting & Outlets

Lighting branch circuits, luminaires, ballast, lamps front bedroom, lighting branch circuits for master bedroom, hallway, front entry porch, kitchen, living room, study/ bedroom. Dryer outlets, lighting for laundry, powder room, attic, garage.

Lecture Hrs: 50 Lab Hrs: 50 Credit Hrs: 4

ET2134 Residential HVAC

Water pumps, water heater, cooking equipment, dishwasher & disposal. Heat vent light, electric heat, air conditioning. Service entrances. Introduction to Service Entrances, Wi-Fi systems, and Home Security.

Lecture Hrs: 50 Lab Hrs: 50 Credit Hrs: 4

ET2144 Residential Services

Overcurrent protection, service entrance calculations, swimming pools, smoke alarms, home automation and generators. Introduction to Solar Panels, Natural Gas Generators, and Plug-Ins for Electric Vehicles.

Lecture Hrs: 50 Lab Hrs: 50 Credit Hrs: 4

ET2154 Commercial Installation

Commercial Building Plans, Reading electrical drawing- entry level, calculating the electrical load, branch circuit's witches and receptacles. Motors, appliances, special systems, working drawings upper levels, and special circuits.

Lecture Hrs: 50 Lab Hrs: 50 Credit Hrs: 4

ET2164 Commercial Lighting & Outlets

Panelboard selection and installation, the electric service, lamps and ballast for lighting, luminaires, overcurrent calculations and coordination of overcurrent devices, Overcurrent protection: fuse and circuit breakers. Emergency, legal required stand by and optional stand by systems, equipment and conductor short circuit protection.

Lecture Hrs: 50 Lab Hrs: 50 Credit Hrs: 4

ET2174 National Electrical Codes

Journeyman Electrician exam questions in random order. Pipe bending and wire fill calculations.

Lecture Hrs: 50 Lab Hrs: 50 Credit Hrs: 4

ET2204 Journeyman Exam Preparation

Journeyman Electrician exam questions in random order. Relays, contactors and motor starters.

Lecture Hrs: 50 Lab Hrs: 50 Credit Hrs: 4

HVAC/R (HEATING VENTILATION AND AIR CONDITIONING/REFRIGERATION) – DIPLOMA (Resident)

Program Description

The Heating, Ventilation, Air Conditioning (HVAC), & Refrigeration Program will prepare the student for entry-level employment as technicians in the design, operation, service, repair, installation, and sales of these systems and equipment. The Program combines theory with extensive practical hands-on training designed to simulate the actual work environment and skills needed to excel in this challenging field. Labs afford the student the opportunity to install, repair and/or operate a wide variety of actual field equipment, such as commercial coolers; warm air, hydraulic, electric, gas, and oil furnaces; package and split system A/C; rooftop commercial gas packs; refrigerated sea water systems; liquid chillers; industrial ice machines; centrifugal chillers; cascade refrigeration; pneumatic controls; and direct digital controls. Students learn CFC refrigerants, Indoor Air Quality requirements and increased use of computerized building controls. Prospects for employment are excellent. Employers in this industry include heating contractors, refrigeration contractors, controls contractors, commercial food storage facilities, property management firms, wholesale vendors, hotels, schools, industrial processing plants, and many others.

Program Outcomes

1. Diagnose, repair and maintain common HVAC/R electrical and mechanical system problems.
2. Communicate effectively with customers, managers and fellow workers.
3. Adhere to environmental laws and regulations as applied to HVAC/R.
4. Demonstrate employability behaviors and worth ethics.
5. Demonstrate and use terminology related to the industry.
6. Embrace the model of lifelong learning, accessing new information to remain current in industry trends.

Program Goals

A graduate of this program should be able to:

- Possess an applied skill level sufficient for entry-level employment and advancement in the HVAC/R field.
- Demonstrate appropriate workplace behaviors and pursue ongoing technical skill development sufficient for employment in the field of HVAC/R.
- Be successfully employed in the HVAC/R industry or maintain independence through self-employment.

* Course requires a prerequisite prior to taking course.

HVAC/R (HEATING VENTILATION AND AIR CONDITIONING/REFRIGERATION) – DIPLOMA (Resident)

AH100 Career and Life Development

Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 3

Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.

HVACR101 Heating and Energy Theory

Lecture Hrs: 20 Lab Hrs: 5 Credit Hrs: 1

Students will gain an understanding of temperature, methods of measuring/transferring heat, molecular motion, sensible heat, latent heat, and specific heat. It will review atmospheric pressure and test instruments such as gauges used to measure pressure. It will also cover the broad topics of energy and explore definitions of matter, mass, density, specific gravity, specific volume.

Prerequisites: AH100, HVACR105

HVACR103 Refrigeration and Refrigerants

Lecture Hrs: 20 Lab Hrs: 5 Credit Hrs: 1

Students will review the history of refrigeration and gain a basic understanding of refrigeration process. Students will learn the four major refrigeration components: evaporator, compressor, condenser, and metering device. Students will also review the refrigeration cycle and learn about reciprocating, rotary, scroll, centrifugal, and screw compressors. Refrigerant leak detection, recovery and recycling, cylinder color codes, and chemical makeup are also discussed.

Prerequisites: AH100, HVACR105, HVACR101, HVACR117

HVACR105 Safety and Tools for HVAC

Lecture Hrs: 10 Lab Hrs: 15 Credit Hrs: 1

This course teaches the safety precautions necessary when working with pressure vessels and piping, electrical hazards; heat, cold, mechanical equipment, heavy objects, and chemicals. Students will also learn about heating, air-conditioning, and refrigeration tools and equipment and their use, including general hand tools, specialized hand tools, and specialized service and installation equipment.

Prerequisite: AH100

HVACR107 Fasteners, Tubing and Piping

Lecture Hrs: 10 Lab Hrs: 15 Credit Hrs: 1

Students will learn the detailed description of nails, staples, rivets, and wood screws, including tapping and machine screws. Thread sizes, set screws, anchor shields, wall anchors, toggle bolts, threaded rod, angle steel, and masonry fasteners, etc. Students will also review basic piping operations and techniques, along with soldering and brazing procedures.

Prerequisites: AH100, HVACR105, HVACR101, HVACR117

HVACR109 Leak Detection, System Evacuation and System Clean-up

Lecture Hrs: 10 Lab Hrs: 15 Credit Hrs: 1

Students will learn the purpose and theory of evacuation. The course will review system leak detection, system cleanup procedures.

Prerequisites: AH100, HVACR105, HVACR101, HVACR117

HVACR111 Refrigerants and Oil Chemistry and Management

Lecture Hrs: 10 Lab Hrs: 15 Credit Hrs: 1

Students will learn about refrigerants and the environment; refrigerant blends; EPA regulations; reasons for recovery and recovery methods; recycling; reclaiming; retrofitting; technician certification; and mechanical recovery equipment.

Prerequisites: AH100, HVACR105, HVACR101, HVACR117

HVACR113 System Charging

Lecture Hrs: 10 Lab Hrs: 15 Credit Hrs: 1

Students will learn information on charging refrigeration systems, including vapor and liquid refrigerant charging, weighing refrigerant, and the use of charging devices.

Prerequisites: AH100, HVACR105, HVACR101, HVACR117

HVACR115 Calibrating Instruments

Lecture Hrs: 10 Lab Hrs: 15 Credit Hrs: 1

Students will learn information needed to calibrate instruments and the procedures for temperature-measuring, pressure tests, and electrical test instruments, refrigeration leak-detection device, and analysis instruments. General maintenance procedures for instruments used in the HVAC/R field, will also be discussed.

Prerequisites: AH100, HVACR105, HVACR101, HVACR117

HVACR117 Basic Electricity and Magnetism

Lecture Hrs: 10 Lab Hrs: 15 Credit Hrs: 1

Students will learn the structure of matter, the movement of electrons, conductors, insulators, direct and alternating current, and electrical units of measurement. Student will also review wire sizes, circuit protection devices, and semiconductors or solid-state components.

Prerequisites: AH100, HVACR105

HVACR119 Automatic Control Components and Applications

Lecture Hrs: 10 Lab Hrs: 15 Credit Hrs: 1

Students will learn the types of automatic controls, devices that respond to thermal change, the bimetal device, control by fluid expansion, the thermocouple, and electronic sensing devices. Space temperature controls (low and high voltage), sensing the temperature of solids, pressure-sensing devices, oil pressure safety controls, air pressure controls, devices that control fluid flow, and maintenance of mechanical and electromechanical controls are topics covered in this course.

Prerequisites: AH100, HVACR105, HVACR101, HVACR117

HVACR121 Advanced Automatic Controls and Troubleshooting

Lecture Hrs: 10 Lab Hrs: 15 Credit Hrs: 1

Students will learn the procedures for troubleshooting basic and complex circuits, thermostats, and high-voltage circuits controlled by thermostats, along with procedures for measuring amperage and voltage in low-voltage circuits. Students will also review typical service technician calls, control terminology, applications, and electronic control circuits.

Prerequisites: AH100, HVACR105, HVACR101, HVACR117

HVACR123 Types and Applications of Electric Motors	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
Students will learn starting and running components and characteristics, motor speeds, and power supplies. <i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			
HVACR125 Motor Controls and Troubleshooting	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
Students will learn the components used to close or open the power supply circuit to the motor, such as relays, contactors, and starters. Inherent and external motor protection, the service factor, other temperature-sensing and magnetic overload devices are covered, along with procedures for restarting the motor. This course will also discuss mechanical and electrical motor troubleshooting. <i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			
HVACR127 Evaporators and the Refrigeration System	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
This course focuses on the refrigeration cycle and various temperature ranges of refrigeration. Included are the topics of boiling temperature/coil operating temperature, dehumidification, evaporator heat exchange characteristics, types of evaporators multiple-circuit and liquid-cooling evaporators, and defrost. <i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			
HVACR129 Condensers	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
This course focuses on the types, purpose and operation of condensers. The relationship of condensing refrigerant and ambient air, head-pressure control, and heat reclaim are covered. <i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			
HVACR131 Compressors	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
This course focuses on the types and functions of compressors. Topics of reciprocating compressor efficiency, valve design, and liquid slugging are also discussed. <i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			
HVACR133 Expansion Devices	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
This course covers the various expansion or metering devices used in commercial refrigeration applications. The thermostatic expansion valve is described in detail—each component, the types of bulb charges, and internal and external equalizers. Step-motor expansion valves and algorithms and PID controllers are also discussed in this course. <i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			
HVACR135 Special Refrigeration System Components	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
This course provides information on many special system components and controls, including two-temperature evaporator operation, evaporator pressure controls, multiple evaporators, the CPR valve, relief valves, low-ambient controls, fan cycling, fan speed, and air volume control for regulating head pressure. <i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			
HVACR137 Application of Refrigeration Systems	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
This course reviews various commercial refrigeration systems, such as: reach-in fixtures, chest-type display fixtures, walk-in coolers, beverage coolers, water coolers, and refrigerated air driers. Self-contained, remote condensing units, multiple evaporators and single-compressor applications, multiple compressors, interconnecting piping, defrost, mullion heaters, and condensate removal are also covered. <i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			
HVACR201 Commercial Ice Machines	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
This course provides information on ice-making package equipment. Microprocessors, microprocessor input/output troubleshooting, water filtration and treatment, and cleaning and sanitizing ice machines are also discussed, along with typical service technician calls. <i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			
HVACR203 Special Refrigeration Applications	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
This course covers truck refrigeration systems, railway refrigeration, extra-low-temperature refrigeration, quick-freezing methods, marine refrigeration, and air cargo hauling. <i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			
HVACR205 Troubleshooting and Typical Operating Conditions for Commercial Refrigeration	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
This course provides a comprehensive overview of troubleshooting and typical operating conditions for commercial refrigeration. Preventive refrigeration maintenance and service calls are also discussed. <i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			
HVACR207 Electric Heat	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
This course reviews heating devices and furnaces. Portable electric heaters, radiant heating panels, electric baseboard heating and central forced-air electric furnaces are reviewed. Preventive maintenance and technician service calls are also addressed. <i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			
HVACR209 Hydronic Heat	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
This course provides an introduction to hydronic heat and components of hot water heating systems. Preventive maintenance and technician service calls are also addressed. <i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			
HVACR211 Oil Heat	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
This course describes the characteristics and types of oil furnaces. Fuel oils, wiring diagrams, and safety controls, venting, and piping are also discussed, along with fuel supply systems, the combustion chamber, heat exchangers, and determining the correct airflow across the heat exchanger. <i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			

HVACR213 Gas Heat	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
This course describes the characteristics and types of gas furnaces. Gas fuels, wiring diagrams, and safety controls, venting, and piping are also discussed, along with fuel supply systems, the combustion chamber, heat exchangers, and determining the correct airflow across the heat exchanger.			
<i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			
HVACR215 Indoor Air Quality and Comfort	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
This course describes comfort as it relates to the human body and psychometrics. It also provides information regarding sources of indoor air pollution, contamination source detection and elimination, ventilation, ultraviolet light, filters, electrostatic precipitators, activated charcoal air purifiers, and ion generators, along with duct cleaning and air humidification.			
<i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			
HVACR217 Refrigeration Applied to Air Conditioning	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
This course applies the concepts of refrigeration to the cooling and conditioning of occupied spaces. Types of evaporators, compressors (reciprocating, rotary, and scroll), condensers, expansion devices, air-side components, and installation procedures for air-conditioning are also discussed.			
<i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			
HVACR219 Air Distribution, Balance, and Installation	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
This course reviews the installation techniques for package and split air-conditioning systems, including the duct. Forced-air system, system pressures, air measuring instruments for duct systems are discussed, along with cover sizing and balancing. Types of fans, and fan drives are also covered.			
<i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			
HVACR221 Typical Operating Conditions and Troubleshooting	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
This course teaches the typical operating conditions for the various components of standard and high-efficiency air-conditioning systems. Mechanical and electrical troubleshooting for air-conditioning systems is also included in this course.			
<i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			
HVACR223 Heat Gain and Heat Loss in Buildings	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
This course explains the basic concepts of heat and loss in structures as well as how to calculate the heat gain and loss. Students will receive a comprehensive overview of residential energy auditing, visual inspections, insulation tips, and efficiency testing.			
<i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			
HVACR225 Air Source and Geothermal Heat Pumps	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
This course reviews several types of heat pumps. Concentration is given to heat exchange fluids and geothermal wells and water sources. Reverse-cycle refrigeration, open-loop systems, and closed-loop systems are also discussed.			
<i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			
HVACR227 Domestic Refrigerators and Freezers	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
This course defines and elaborates on domestic refrigeration and freezer service. Various types of evaporators and the defrost cycle are reviewed, along with fan motors, ice makers, wiring and controls.			
<i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			
HVACR229 Room Air Conditioners	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
This course is an introduction to room air conditioning units. Preventative maintenance, service, and installation will be discussed.			
<i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			
HVACR231 High-Pressure, Low-Pressure and Absorption Chilled-Water Systems	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
This course provides insight to both high and low pressure compression cycle chillers and absorption chillers. Students will be introduced to direct-expansion and flooded evaporators, water and air cooled condensers, thermostatic expansion valves, electronic expansion valves, and purge units.			
<i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			
HVACR233 Cooling Towers and Pumps	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
This course provides information on cooling tower function and the types of cooling towers. It discusses flow patterns, the tower sump, makeup water, blow down, and balancing the water flow. Pumps used in cooling towers are also discussed in detail.			
<i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			
HVACR235 Operation, Maintenance, and Troubleshooting of Chilled-Water Air-Conditioning Systems	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
This course provides information on compression-type chiller start-up, chiller operation, air-cooled and water cooled chiller maintenance, and absorption chilled-water system start-up, operation, and maintenance. Typical service technician calls are also introduced.			
<i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			
HVACR237 Commercial Rooftop, Packaged, Variable Refrigerant Flow, and Variable Air Volume Systems	Lecture Hrs: 10	Lab Hrs: 15	Credit Hrs: 1
This course covers packaged rooftop equipment, as well as variable air volume and refrigerant volume systems. It provides insight into the location selection process, installation, concepts of free-cooling and mechanical ventilation.			
<i>Prerequisites: AH100, HVACR105, HVACR101, HVACR117</i>			

WELDING BASICS (Resident)

Diploma

Total Hrs:	300
Total Semester Hours of Credit:	12
Total Weeks:	12 (day) or 15 (evening)
Clock Hrs:	Lecture/Lab
Credential Earned:	Diploma
Academic Year:	Day - 12 credits/12 weeks Evening - 12 credits/15 weeks

The Welding Basics course is designed to provide a student with a very basic understanding of three structural welding processes, Shielded Metal Arc Welding, Gas Metal Arc Welding, and Flux Core Arc Welding. Students will learn the basics of blueprint reading, welding symbols, and basic shop math and will practice the skill of welding in the 2F, 2G, 3F, and 3G positions.

Course No.	Course Title	Clock Hours	Credit Hours
WT124	SMAW Structural	30/70	4
WT134	GMAW Structural	30/70	4
WT144	FCAW Structural	30/70	4

SMAW - Shielded Metal Arc Welding
GMAW - Gas Metal Arc Welding
FCAW - Flux Core Arc Welding

WT124 SMAW Structural

Lecture Hrs: 30 Lab Hrs: 70 Credit Hrs: 4

This is a **basic course in welding principles, shop math, basic blueprint reading, safety, ethics, maintenance of equipment, oxy-fuel cutting, air arc gouging and grinding**. Students begin structural welding using SMAW process in 2F, 3F, 2G and 3G positions.

WT134 GMAW Structural

Lecture Hrs: 30 Lab Hrs: 70 Credit Hrs: 4

This course covers structural welding using the GMAW (MIG) welding process. Students will also study blueprint reading, weld symbols, and shop math. In the shop, student will use the GMAW (MIG) welding process to perform welding in the 2F, 3F, 2G, and 3G positions.

WT144 FCAW Structural

Lecture Hrs: 30 Lab Hrs: 70 Credit Hrs: 4

This course covers structural welding using the FCAW (Fluxcore) welding process. Students will also study blueprint reading, weld symbols, and shop math. In the shop, student will use the FCAW (Fluxcore) welding process to perform welding in the 2F, 3F, 2G, and 3G positions.

The Welding Basics program is approved by the Oklahoma Board of Private Vocational Schools only.

ADVANCED WELDING (Resident)

Diploma

Total Hrs:	300
Total Semester Hours of Credit:	12
Total Weeks:	12 (day) or 15 (evening)
Clock Hrs:	Lecture/Lab
Credential Earned:	Diploma
Academic Year:	Day - 12 credits/12 weeks Evening - 12 credits/15 weeks

The Advanced Welding course is designed to provide a student that currently has basic welding knowledge and skills with advanced techniques utilized in the welding industry. The students will focus on learning Gas Tungsten Arc Welding on both plate and pipe applications. Students will receive training on various metals, pipe sizes, and welding positions.

Course No.	Course Title	Clock Hours	Credit Hours
WT164	GTAW on Pipe	20/80	4
WT174	Advanced GTAW on Pipe	20/80	4
WT184	H.F. GTAW/Career Prep	20/80	4

GTAW - Gas Tungsten Arc Welding
MIG - Metal Inert Gas
TIG - Tungsten Inert Gas

WT164 GTAW on Pipe

Lecture Hrs: 20 Lab Hrs: 80 Credit Hrs: 4

This course provides an overview of GTAW equipment and procedure setup, metal identification, tungsten preparation and safety, and an introduction to the GTAW process on plate and pipe. Pipe bevel preparation is taught. Perform TIG multiple pass stringer welds on T-plate. Perform TIG root, fill and cap in the 2G and 5G pipe positions.

WT174 Advanced GTAW on Pipe

Lecture Hrs: 20 Lab Hrs: 80 Credit Hrs: 4

Students will practice GTAW welding on pipe as well as stainless GTAW welding. Advanced pipe welding projects and industrial applications, concentration on performing GTAW welding on mild steel and stainless pipe and using various pipe sizes and schedules in 6G pipe position. Operation requirements for portable equipment, weld test lab procedures and purging of stainless steel pipe. Perform mild steel GTAW welding on pipe in (6G GTAW, 6G combination GTAW and SMAW, 6G 309 stainless GTAW) using GTAW stringer, fill, and cap.

WT184 H.F. GTAW/Career Prep

Lecture Hrs: 20 Lab Hrs: 80 Credit Hrs: 4

This course covers thin alloy welding of aluminum and stainless steel, methods to maintain clean work environment, procedures for heat settings on thin gauge applications, selection of proper tungsten types, proper weld cleaning prep on aluminum and stainless steel, perform aluminum and stainless steel welding on plate using TIG in various positions with different filler wire sizes. This course will also prepare students for jobs in the welding field. Students will receive instruction on weld test rigors, proper appearance, and job attitude.

The Advanced Welding program is approved by the Oklahoma Board of Private Vocational Schools only.

WELDING – DIPLOMA (Resident)

Description

This diploma program is designed to prepare students for entry-level positions in the welding and metal fabricating industry. Students will receive instruction in cutting; shielded metal arc (stick), gas metal arc (mig), and gas tungsten arc (tig), plate, and structural shapes. Reading and interpretation of industrial blueprints, basic metallurgy, basic electricity, and welding safety are also presented. The Welding program follows the Standards for Education and Testing established by the American Welding Society.

Program Outcomes

- Become familiar with the terms, tools, equipment, and techniques used in the welding trade.
- Understand and use terminology related to the trade.
- To demonstrate the safe and proper use and care of welding tools, materials, and equipment.
- Use appropriate safety appliances when engaged in practical activities.
- Develop effective use of tools and equipment in order to develop entry-level skills in the workplace.
- To establish a systematic routine for setting up a welding workstation and for putting away materials and equipment in the workplace or school setting.
- To apply some principles of science to the welding trade.
- Introduce students to the issues surrounding safe, fair, and cooperative workplace practices including an awareness of the potential dangers to fellow workers.
- Identify and explain health and safety hazards in the workplace so that the potential for personal injury and damage to the equipment and/or the environment are minimized.
- To use critical evaluation skills in order to judge quality welding workmanship.

Program Goals

A graduate of this program should be able to:

- Possess an applied skill level sufficient for entry-level employment and advancement in the field of welding.
- Demonstrate appropriate workplace behaviors and pursue ongoing technical skill development sufficient for employment in the field of welding.
- Be successfully employed in the field of welding.

Diploma

Total Hrs:	760
Total Semester Hours of Credit:	31
Total Weeks:	31 (day) or 38 (evening)
Clock Hrs:	Lecture/Lab
Credential Earned:	Diploma
Academic Year:	Day - 24 credits/32 weeks (Term Type B) Evening - 24 credits/30 weeks (Term Type A)

Course No.	Course Title	Clock Hours	Credit Hours
AH100	Career and Life Development	50/10	3
WT124	SMAW Structural	30/70	4
WT134	GMAW Structural	30/70	4
WT144	FCAW Structural	30/70	4
WT154	SMAW on Pipe	30/70	4
WT164	GTAW on Pipe	20/80	4
WT174	Advanced GTAW on Pipe	20/80	4
WT184	H.F. GTAW/Career Prep	20/80	4

SMAW - Shielded Metal Arc Welding
 GMAW - Gas Metal Arc Welding
 FCAW - Flux Core Arc Welding
 GTAW - Gas Tungsten Arc Welding
 MIG - Metal Inert Gas
 TIG - Tungsten Inert Gas

WELDING – DIPLOMA (Resident)

AH100 Career and Life Development

Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 3

Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.

WT124 SMAW Structural

Lecture Hrs: 30 Lab Hrs: 70 Credit Hrs: 4

This is a basic course in welding principles, shop math, basic blueprint reading, safety, ethics, maintenance of equipment, oxy-fuel cutting, air arc gouging and grinding. Students begin structural welding using SMAW process in 2F, 3F, 2G and 3G positions.

WT134 GMAW Structural

Lecture Hrs: 30 Lab Hrs: 70 Credit Hrs: 4

This course covers structural welding using the GMAW (MIG) welding process. Students will also study blueprint reading, weld symbols, and shop math. In the shop, student will use the GMAW (MIG) welding process to perform welding in the 2F, 3F, 2G, and 3G positions.

WT144 FCAW Structural

Lecture Hrs: 30 Lab Hrs: 70 Credit Hrs: 4

This course covers structural welding using the FCAW (Fluxcore) welding process. Students will also study blueprint reading, weld symbols, and shop math. In the shop, student will use the FCAW (Fluxcore) welding process to perform welding in the 2F, 3F, 2G, and 3G positions.

WT154 SMAW on Pipe

Lecture Hrs: 30 Lab Hrs: 70 Credit Hrs: 4

This course covers techniques of basic pipe fitting, use of 90's, T's, flanges, valves, take offs, use of pipe blueprints, sketches, and templates. Perform SMAW pipe welding with 6010 electrode stringer and 7018 electrode remainder in uphill pipe positions of 2G, 5G and 6G.

WT164 GTAW on Pipe

Lecture Hrs: 20 Lab Hrs: 80 Credit Hrs: 4

This course provides an overview of GTAW equipment and procedure setup, metal identification, tungsten preparation and safety, and an introduction to the GTAW process on plate and pipe. Pipe bevel preparation is taught. Perform TIG multiple pass stringer welds on T-plate. Perform TIG root, fill and cap in the 2G and 5G pipe positions.

WT174 Advanced GTAW on Pipe

Lecture Hrs: 20 Lab Hrs: 80 Credit Hrs: 4

Students will practice GTAW welding on pipe as well as stainless GTAW welding. Advanced pipe welding projects and industrial applications, concentration on performing GTAW welding on mild steel and stainless pipe and using various pipe sizes and schedules in 6G pipe position. Operation requirements for portable equipment, weld test lab procedures and purging of stainless steel pipe. Perform mild steel GTAW welding on pipe in (6G GTAW, 6G combination GTAW and SMAW, 6G 309 stainless GTAW) using GTAW stringer, fill, and cap.

WT184 H.F. GTAW/Career Prep

Lecture Hrs: 20 Lab Hrs: 80 Credit Hrs: 4

This course covers thin alloy welding of aluminum and stainless steel, methods to maintain clean work environment, procedures for heat settings on thin gauge applications, selection of proper tungsten types, proper weld cleaning prep on aluminum and stainless steel, perform aluminum and stainless steel welding on plate using TIG in various positions with different filler wire sizes. This course will also prepare students for jobs in the welding field. Students will receive instruction on weld test rigors, proper appearance, and job attitude.

CATALOG ADDENDUM

Addendum A51 contains College Calendar, Tuition & Fees, College Scholarships Criteria and Deadlines, and Single Course Options

All information in this College Course Catalog, Volume 51, is certified as true and correct in policy and content, by the President. This catalog is not complete without Addendum A51.

This catalog and addendum was printed on November 22, 2019 and are effective on December 16, 2019.

**Catalog 51 – Effective December 16, 2019
Addendum A51.2 – Effective June 1, 2020**

- Maintain 90% attendance and 3.5 GPA to remain eligible
- Demonstrate leadership abilities and experience
- First time college graduate

Deadline:

- April 30
- July 31
- October 31
- January 31

❖ **Brighter Future Presidential Scholarship**

Receive up to a maximum of 50% scholarship to be applied towards tuition

Criteria:

- US Citizen or Permanent Resident
- Submit essay and/or other supporting documents as required
- Provide 2 professional letters of recommendation
- Maintain 90% attendance and 3.5 GPA to remain eligible

Deadline:

- April 30
- July 31
- October 31
- January 31

❖ **High School Graduation Scholarship - \$1,500**

Receive up to \$1,500 scholarship towards institutional charges

Criteria:

- Applicant must enroll within 60 days of graduating high school
- Applicant must be a US Citizen or Permanent Resident
- Submit essay and/or other supporting documents as required

Deadline:

- Offered 12 months per year, to be identified prior to enrollment

❖ **GED Recipient Scholarship - \$1,500**

Receive up to \$1500 scholarship towards institutional charges

Criteria:

- Applicant must enroll within 60 days of passing the GED exam.
- Submit essay and/or other supporting documents as required

Deadline:

- Offered 12 months per year, to be identified prior to enrollment

❖ **Veteran/Military Scholarship**

Receive up to a maximum of \$6000 scholarship to be applied towards institutional charges (excluding tuition, books, and mandatory fees)

Criteria:

- Applicant must show proof of service in a US military branch
- Submit essay and/or other supporting documents as required

Deadline:

- Offered 12 months per year as funds allow; to be identified prior to enrollment

❖ **Military Spouse Scholarship**

Receive up to \$1,500 scholarship towards institutional charges

Criteria:

- Applicant must show proof of marriage to a current member/veteran of the US military
- Submit essay and/or other supporting documents as required

Deadline:

- Offered 12 months per year as funds allow; to be identified prior to enrollment

❖ **Alumni Scholarship**

Receive up to \$1,000 scholarship towards institutional charges

Criteria:

- Successful graduate of a program at Community Care College, Clary Sage College, or Oklahoma Technical College
- Submit an essay and/or other artifact

Deadline:

- Offered 12 months per year as funds allow; to be identified prior to enrollment

Catalog 51 – Effective December 16, 2019
Addendum A51.2 – Effective June 1, 2020

❖ **Alumni Family Scholarship**

Receive up to \$1,000 scholarship towards institutional charges

Criteria:

- Applicant must be an immediate family member of a successful graduate of a program at Community Care College, Clary Sage College, and Oklahoma Technical College
- Graduate must submit letter indicating relationship to applicant directly to Financial Aid
- Submit essay and/or other supporting documents as required

Deadline:

- Offered 12 months per year as funds allow; to be identified prior to enrollment

❖ **CHE - Pay It Forward**

Scholarships are offered to any diploma or degree program at Community Care College, Clary Sage College, and Oklahoma Technical College. These awards are made possible by gifts given to Community HigherEd by corporations, foundations and friends of the Colleges. Criteria for these scholarships can vary based on numerous factors including donor stipulations and intent of scholarship, and recipients are selected based on scholarship-specific requirements that are published online as applicable.

Criteria:

- GPA and attendance requirements vary per scholarship and are posted online as applicable
- Submit essay and/or other supporting documents as required
- Scholarships limited to availability

Deadline:

- Offered 12 months per year as funds allow; to be identified prior to enrollment

❖ **Cosmetology Education (ACE) Scholarship**

Receive up to \$1,000 scholarship towards institutional charges

Criteria:

- Enroll in an eligible program (Cosmetology, Esthetician, Nail Technician, Makeup Artistry, Barber, or Massage)
- Submit essay and/or other supporting documents as required
- Scholarships limited to availability per program

Deadline:

- Offered 12 months per year as program availability allows

❖ **CARES Scholarship**

Receive up to \$1,000 scholarship towards institutional charges

Criteria:

- Enroll in an eligible program
- Submit essay and/or other supporting documents as required
- Scholarships limited to availability per program

Deadline:

- Offered 12 months per year as program availability allows

❖ **Concurrent Enrollment Scholarship**

Receive up to a maximum 50% scholarship towards tuition

Criteria:

- Enroll in an eligible program
- Submit essay and/or other supporting documents as required
- Scholarships limited to availability per program
- Recipients must maintain a 3.0 GPA throughout their program
- Cannot be combined with another scholarship

Deadline:

- Offered 12 months per year as program availability allows

❖ **Experience Day Scholarship - \$1,000**

Receive up to \$1,000 scholarship towards institutional charges

Criteria:

- Applicant must enroll within 60 days of attending Experience Day at Community Care College, Clary Sage College, or Oklahoma Technical College
- Applicant must be a US Citizen or Permanent Resident
- Submit essay and/or other supporting documents as required
- Applicant must be a new student that has never attended Community Care College, Clary Sage College, or Oklahoma Technical College

Deadline:

- Offered 12 months per year, to be identified prior to enrollment

Catalog 51 – Effective December 16, 2019
Addendum A51.2 – Effective June 1, 2020

❖ **Competition Scholarship**

Scholarships are offered to any high school student who competes in the career related competitions hosted by the Colleges. Applicants will receive a scholarship award that will range from \$500 up to 100% to be applied towards tuition.

Criteria:

- Applicant must be a current high school student
- Applicant must compete in a career related competition hosted by the colleges
- Applicant must be a US Citizen or Permanent Resident

Deadline:

- Offered 12 months per year, to be identified prior to enrollment

❖ **Workforce Development Scholarship**

Receive up to 100% scholarship to be applied towards tuition. Recipients will be awarded at the discretion of the President.

Criteria:

- Receive a referral from a partner, non-profit organization
- US Citizen or Permanent Resident
- First time college graduate
-

Deadline:

- Offered 12 months per year, to be identified prior to enrollment

Applications: All applications are submitted to the Scholarship Committee. Institutional scholarships have no cash redemption value. If an institutional scholarship creates a credit balance on the student account, the amount of the institutional scholarship will be reduced to cover only the amount owed as covered on the enrollment agreement.

Meeting the scholarship eligibility requirement does not guarantee the scholarship will be awarded. All scholarships are subject to availability.

Master Instructor with Experience, Cosmetology to Barber Crossover, and Barber to Cosmetology Crossover programs are only eligible to receive the Military/Veteran Scholarship.

Catalog 51 – Effective December 16, 2019
Addendum A51.2 – Effective June 1, 2020

Single Course Options - (The Single Course Option is a stand-alone meant to be used independent of the larger, broader Programs Catalog of the College(s)).

Basic Life Support (BLS) CPR
Community Care College

Course Description: The student will be instructed on the skills needed to recognize and respond to various life-threatening situations for victims of all ages. Emergencies such as respiratory arrest, cardiac arrest, and foreign-body airway obstruction will be addressed. With successful completion of this CPR program the student will receive a two-year certification in Basic Life Support (BLS) for the Healthcare Provider.

Cost: \$60.00

Length: 4 hours

Schedule: Friday 8:00 am – 4:00 pm or Saturday 8:00 am – 4:00 pm

Refund Policy: Requested refunds require written cancellation notice at least 24 hours prior to the start of any class, and will be paid within 30 days of cancellation. Students terminating training after starting the program are not entitled to any tuition refund. Discontinued Class: In case a class is discontinued by the school, all tuition monies paid to the school will be refunded. The school will have 30 days to restart the class or pay the refund.

1 Hour MBA
Community Care College

Course Description: The 1 Hour MBA is designed to provide a real-world understanding of how business really works. It is a unique approach to understanding the relationship between accounting, marketing, economics, management, and profit. It is a dynamic network of information designed for current and future entrepreneurs, business students and those who need to compete in today's marketplace.

Cost: \$65.00

Length: 90 minutes

Schedule: Times and days will vary

Refund Policy: Requested refunds require written cancellation notice at least 24 hours prior to the start of any class, and will be paid within 30 days of cancellation. Students terminating training after starting the program are not entitled to any tuition refund. Discontinued Class: In case a class is discontinued by the school, all tuition monies paid to the school will be refunded. The school will have 30 days to restart the class or pay the refund.

OSBCB Licensed Programs
Clary Sage College

Course Name: State Board Review Hours

Course Description: This course will prepare students to gain/regain their license through the Oklahoma State Board of Cosmetology and Barbering. Students will be able to complete state board required review hours under the supervision of a Master Barber or Master Cosmetology Instructor.

Cost: \$100.00 enrollment fee and \$10.00 per hour as needed. Enrollment fee includes Oklahoma State Board of Cosmetology and Barbering student registration and exam fee. Students must complete hours within their contracted time frame.

Length: 40-250 hours

Schedule: Times and days will vary

Refund Policy: Requested refunds require written cancellation notice at least 24 hours prior to the start of any class, and will be paid within 30 days of cancellation. Students terminating training after starting the program are not entitled to any tuition refund. Discontinued Class: In case a class is discontinued by the school, all tuition monies paid to the school will be refunded. The school will have 30 days to restart the class or pay the refund.

Eyelash Extensions
Clary Sage College

Course Description: Our two-day, hands-on training course is designed to certify licensed cosmetologists and estheticians in the art of eyelash extensions. Current cosmetology and esthetics students with a current student registration are also eligible for certification. Each Master Educator is certified to fully equip each student with the knowledge and products to launch their eyelash extension business. Class sizes are limited. This course covers all aspects to become a successful lash artist including: lash anatomy, health and sanitation guidelines, eyelash application and aftercare practices. All students will receive a kit that includes all supplies needed for the course, as well as supplies needed to begin their business. Students are required to bring a live model.

AH105 Career and Life Development

Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.

Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 2

Page 116 – Revised

MIN177 Clinic Salon Management – 177

In this course the student will guide and teach the learners on the clinic floor and classroom under the direction of a licensed master instructor in various subjects and courses. The student will practice developing and presenting lesson plans.

Lecture Hrs: 0 Lab Hrs: 30 Credit Hrs: 1

**Catalog 51 – Effective December 16, 2019
Addendum A51.2 – Effective June 1, 2020**

MIN179 Clinic Salon Management – 179

Lecture Hrs: 0 Lab Hrs: 30 Credit Hrs: 1

In this course the student will guide and teach the learners on the clinic floor and classroom under the direction of a licensed master instructor in various subjects and courses. The student will practice developing and presenting lesson plans.

DIESEL TECHNOLOGY – ASSOCIATE OF OCCUPATIONAL SCIENCE (Hybrid)

Page 128 – Current

Career and Life Development is held Monday through Thursday, 8 a.m. to 1 p.m. at the Community Care College campus. Degree Requirement courses and General Education courses are taken online.

Page 128 – Revised

Career and Life Development is held Monday through Thursday, 8 a.m. to 1 p.m. at the Community Care College campus. Degree Requirement courses and General Education offers two options, courses are taken online or courses will meet 3 hours per week on campus and the remaining hours will be completed online.

**DENTAL ASSISTANT - DIPLOMA
(Hybrid)**

Objective

The Dental Assistant plays a vital role in the organized delivery of dental services. Theory and practical application in the fundamentals of chair side assisting and administrative procedures are taught for use in any size dental practice, specialty practice, or clinic. Students are certified in CPR. In addition, students engage in “hands-on” training with regard to dental equipment, instruments, and tray set-ups. Students are taught proper dental health and laboratory procedures. This program equips the graduate with the skills and knowledge necessary to meet the requirements of an entry-level Dental Assistant and the ability to assume such a position.

Classroom Procedures

Each course stands alone as a unit of study and is not dependent upon prerequisite training. A student may enter the program at the beginning of any course and continue through the sequence until completion of all courses. Career and Life Development (AH106) is required for all hybrid students and is taken online. All other courses will meet two evenings per week for 5 hours each for a total of 10 hours on campus and the remaining hours will be completed online.

Externship

The externship is undertaken following the successful completion of all classroom training and consists of 180 hours. Students may locate their own externship site for consideration or may use sites previously established with the College. This externship is unpaid and the hours of attendance are determined by the externship site. Students are required to attend at least 20 hours per week while fulfilling externship requirements. **Standard dental office hours do not take place during evenings or weekends therefore, externships may only be completed during daytime office operational hours.**

**DENTAL ASSISTANT - DIPLOMA
(Hybrid)**

AH106 Career and Life Development

Lecture Hrs: 50 Lab Hrs: 10 Credit Hrs: 3

Career and Life Development teaches the foundational skills required for success as a student and professional. The three primary areas of focus are: High Performance Skills including time management, learning styles, and study skills; Mobile Technologies that are applied to personal branding and the workplace; and Financial Literacy focusing on managing debt, personal budgeting, and saving for the future. In addition, professionalism and career-building skills are discussed.

HPHI1153 Medical Law and Ethics

Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1

This course covers legal relationships of physicians and patients, contractual agreements, professional liability, malpractice, medical practice acts, informed consent, and bioethical issues. Emphasis is placed on HIPPA, legal terms, professional attitudes, and the principles and basic concepts of ethics and laws involved in providing medical services.

HBIO1316 Anatomy & Physiology

Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1

This course is a study in human anatomy and physiology. This course will focus on an in-depth study of the human muscular system and skeletal system. Particular emphasis will be on the head and neck.

HBIO1387 Nutrition

Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1

The student will learn tools for nutritional assessment and will be provided with the skills to educate patients on current trends and diets that work especially those that are endorsed by the medical community.

HAH225 Sterilization Procedures/OSHA

Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1

This course introduces the infection and hazard control procedures necessary for the safe practice of healthcare. Topics include microbiology, practical infection control, sterilization and monitoring, chemical disinfectants, aseptic technique, infectious diseases, OSHA standards, and applicable laws. Students are introduced to the autoclave and accessories as well as surgical instrument preparation, processing and wrapping. Upon completion, students should be able to understand infectious diseases, disease transmission, infection control procedures, biohazard management, OSHA standards, and applicable laws.

HAH115 Medical Emergencies and CPR

Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1

In this course the student will learn basic first aid and CPR training. The student will be instructed on the skills needed to recognize and respond to various life-threatening situations for victims of all ages. Emergencies such as respiratory arrest, cardiac arrest, and foreign-body airway obstruction will be addressed. With successful completion of this CPR program the student will receive a two-year certification in Basic Life Support (BLS) for the Healthcare Provider. The fundamentals of first aid will also be covered.

HAH220 Introduction to Pharmacology

Lecture Hrs: 20 Lab Hrs: 0 Credit Hrs: 1

This course is an introduction to pharmacology which includes terminology, drug category, use, side effects, contraindications, and interactions. Common dosage ranges and routes of administration will also be examined.

HDA1115 Dental Terminology

Lecture Hrs: 20 Lab Hrs: 0 Credit Hrs: 1

Students will learn the parts and functions of bodies being treated in dentistry. Emphasis is placed on abbreviations, prefixes, root words, suffixes and their meanings.

HDA1111 Practice Management/Patient Relations

Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1

This course provides an overview of the business aspect of the dental practice and the role of the business office auxiliary. This course focuses on several key behavioral concepts and techniques for effective patient management and interpersonal office skills. Students will learn to function as a successful professional in health care delivery and will develop knowledge of the psychology of individuals and groups.

HDA1113 Introduction to Dental Assisting

Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1

This course covers an introduction to the basic knowledge of dentition and the principles of morphology. Student will also place their focus on identifying the landmarks and anatomy of the head and neck.

Catalog 51 – Effective December 16, 2019
Addendum A51.2 – Effective June 1, 2020

HDA1114 Pre-Clinical This course emphasizes the names and uses of a wide range of dental instruments and equipment. The student will be taught the ergonomics of dental assisting and concepts of four-handed dentistry.	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
HDA1213 Preventative This course covers the skills and concepts for preventing periodontal disease, oral hygiene instruction, nutritional counseling, and plaque control and fluoride therapy.	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
HDA1215 Periodontics This course covers different types of periodontal disease, treatment, prevention and instruments and materials used in this specialty.	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
HDA1118 Introduction to Dental Radiography This course covers the basic concepts in radiation and principles of radiography, focusing on patient and operator safety. Students will learn the principles of x-ray production, x-ray film processing techniques, methods of evaluation in identifying exposure errors, and occupational radiation safety.	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
HDA1119 Dental Laboratory This course covers the use of dental materials and gypsum products.	Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1
HDA1229 Fixed Prosthodontics This course includes instruction in assisting with the preparation of fixed crowns and bridges. The student will be taught the fixed prosthodontic procedures, suctioning, tray set-up, retracting, dental charting, impression taking, provisional making, and post-operative instructions specific to fixed prosthodontics.	Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1
HDA1225 Operative This course includes instruction in assisting with the removal of dental caries, and placement of filling materials. The student will be taught the composite restorations, suctioning, retracting, tray setup, dental charting, and post-operative instructions specific to composite restorations procedures.	Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1
HDA1227 Dental Implants This course includes instruction in assisting with the placement of dental implants, abutments, and implant supported restorations. The student will be taught implant surgery procedures, post-operative instructions specific to implant procedures and the various supported restorations used by the dental professionals.	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
HDA1221 Pedodontics This course covers the prevention, diagnosis, and treatment of children's dental health problems.	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
HDA1223 Orthodontics This course will focus on the growth and development of the jaws and face, the positioning of teeth, influences on development, and prevention and correction of malocclusions.	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
HDA1126 Endodontics This course will focus on the dental specialty concerned with the treatment of pulpal and periapical diseases of the teeth. The student will learn proper chair side techniques for assisting with pulp capping, pulpotomy, pulpectomy, instrumentation and obturation of infected root canals, and removal of diseased periapical tissues.	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
HDA1181 Dental Sciences This course will focus on Embryology, histology of the life cycle of the tooth, tooth structure and components of the periodontium. Students will also be taught Microbiology, groups of microorganisms, and the disease of major concern to the dental assistant.	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
HDA1129 Oral Pathology/Oral Surgery In the duration of this course, the student will focus on the aseptic techniques, suctioning, retracting, dental charting, proper instrument handling, tray setup and post-operative instructions for procedures involving a variety of oral surgeries.	Lecture Hrs: 15 Lab Hrs: 5 Credit Hrs: 1
HDA1131 Essentials of Dental Radiography – Bisecting/Paralleling This course will focus on placement exposure and processing of the radiograph using the bisecting and paralleling method. Darkroom procedures and mounting are included.	Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 1
HDA1133 Essentials of Dental Radiography-Lab This course is lab intensive; the student will continue to expand practical skill based knowledge and will practice proof of competency on manikins.	Lecture Hrs: 10 Lab Hrs: 10 Credit Hrs: 0.5
DAEXT311 Externship In this course the student will spend 180 hours in a dental facility.	Clock Hrs: 180 Credit Hrs: 4
